

CONTENTS

| | |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| On Estimation via Optimal Stochastic Approximation Procedures <i>S.N. Abdelhamid</i> | 1 |
| Asymptotic Deficiency of the Jackknife Estimator, II <i>M. Akahira</i> | 27 |
| Parametric Estimation of a Wider Class of the Location-Scale Model of a Symmetric Distribution Which also has Asymmetric Distributions <i>S. Aki</i> | 43 |
| Further Elaboration of the Dynamical Law <i>E.W. Barankin</i> | 53 |
| A Model for Life Testing and for Estimating Safe Dose Levels <i>A.P. Basu and J.P. Klein</i> | 69 |
| Variability and Biases of Infant Mortality Rates <i>Z.W. Birnbaum and M.G. Sirken</i> | 81 |
| Minimum-Distance Discrimination for Spherical Distributions <i>T. Cacoullos and M. Koutras</i> | 91 |
| Central Limit Theorem for Linear Rank Statistics Process <i>M.A. Carlson and M.L. Puri</i> | 103 |
| Estimation of a Linear Transformation with Correlated Errors <i>N.N. Chan and T.K. Mak</i> | 147 |
| Moments and Asymptotic Normality of an Estimator Arising in Life Testing <i>A.L. Chao</i> | 153 |
| A Characterization of Multivariate Distributions <i>Y. Chikuse</i> | 159 |
| Hotelling's Trace under Moderate Nonnormality, and Other Applications of the Invariant Polynomials <i>A.W. Davis</i> | 167 |
| Characterizations of the Multivariate Ornstein-Uhlenbeck Diffusion Process in the Context of Home Range Analysis <i>J.E. Dunn and I.L. Brisbin, Jr.</i> | 181 |
| Model-Fidelity of the Maximum Likelihood Estimator in a Curved Exponential Family <i>S. Eguchi</i> | 207 |
| On the Role of Principles in Statistical Inference <i>M. Evans, D.A.S. Fraser and G. Monetta</i> | 225 |
| Two Methods for Estimation of Dimensionality in Canonical Correlation Analysis and Multivariate Linear Model <i>Y. Fujikoshi</i> | 233 |
| On Prediction from a Structural Model <i>M.S. Haq</i> | 241 |

| | |
|--------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| On the Distribution of a Quadratic Form of a Matrix t -Variate <i>T. Hayakawa</i> | 249 |
| A Necessary and Sufficient Condition for Uniform Asymptotic Equivalence with Application <i>S. Ikeda and T. Matsunawa</i> | 257 |
| The Asymptotic Distribution of a Conditional Likelihood Ratio Function Given a Maximum Likelihood Estimator <i>N. Inagaki</i> | 269 |
| A Vector Space Approach for Obtaining a Condition for Admissibility of Statistical Decision Functions <i>K. Isii and K. Noda</i> | 291 |
| On a Weighted Regression Estimator for Model Identification <i>N. Kanda</i> | 315 |
| A New Concept of Second Order Efficiency and Its Application to a Missing Data Problem <i>T. Kariya</i> | 331 |
| On the Information for Discrimination between Two Probability Distributions <i>H. Kuboki</i> | 355 |
| An Improved Procedure for the Estimation of a Correlation Matrix <i>Shang P. Lin and M.D. Perlman</i> | 369 |
| Exact and Asymptotic Procedures in the Distribution of Multivariate Test Statistics <i>A.M. Mathai</i> | 381 |
| On Robust Estimation of the Location of a Symmetric Distribution <i>K. Matsusita and S. Aki</i> | 419 |
| The Sampling Densities of Some Robust Estimators <i>J.F. Monahan</i> | 433 |
| A Comparison of the Value of Information in 2-State 2-Action Statistical Decision Problem.— A Dominance Criterion — <i>M. Murakami</i> | 445 |
| Rarefied Sets and Their Statistical Comprehension <i>K. Nagasaka</i> | 455 |
| A Structural Analysis of the Ratio of Out- and In-Patients in Recent Japan <i>M. Naito et al.</i> | 461 |
| A Cohort Analysis of Deaths by Cause in Japan, 1900 - 1980 <i>M. Naito et al.</i> | 473 |
| The Probability Contents Boundary Analysis <i>T. Nakamura</i> | 485 |
| Exact $n^{-2/3}$ Rate in the Empirical Bayes Estimation: Case of Retracted Distributions <i>Y. Nogami</i> | 499 |

| | | |
|------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------|-----|
| Stochastic Prediction of the Position of the Center of a Typhoon | <i>M. Ogawara</i> | 519 |
| On the Application of Linear Models to Local Regions in Regression | <i>M. Ohtaki</i> | 529 |
| Asymptotic Theory for Two Estimators of the Generalized Failure Rate | <i>B.L.S. Prakasa Rao and J. Van Ryzin</i> | 547 |
| On an Optimal $C(\alpha)$ -Test of the Poisson Hypothesis against Compound Poisson Alternatives | <i>P.S. Puri</i> | 565 |
| On Tests for the Two-Sample Problem Based on Higher Order Spacing Frequencies | <i>J.S. Rao and R.L. Schweitzer</i> | 583 |
| Preliminary Test Prediction in General Multivariate Linear Models | <i>A.K. Saleh and P.K. Sen</i> | 619 |
| Bayes Estimation of a Finite Population Mean for the Analysis of a Covariance Model in the Presence of Non-Response | <i>R. Sekkappan</i> | 639 |
| On the Symmetrical Bivariate Negative Binomial Distribution | <i>A.K. Sinha</i> | 649 |
| Asymptotic Confidence Cut-Off Points in the Discriminant Analysis with the Studentized Statistic Z^* | <i>M. Siotani</i> | 659 |
| Some Applications of log-Linear Model Analysis | <i>H. Solomon</i> | 675 |
| On Some Concepts of a Dependent Convolution and a Dependent Outlier | <i>G. Suzuki</i> | 701 |
| Statistical Methods for Multiple Response Items and Their Applications | <i>Y. Tanaka and T. Tarumi</i> | 709 |
| Third Order Efficiency of the Maximum Likelihood Estimator in Gaussian Autoregressive Moving Average Processes | <i>M. Taniguchi</i> | 725 |
| Safe vs Optimal Decision: Applications | <i>J. Tiago de Oliveira</i> | 745 |
| Consistent Directions of the Least Squares Estimators in Linear Models | <i>C.F. Jeff Wu and Song-Gui Wang</i> | 763 |
| Estimating Prevalence and Incidence of Disease from a Diagnostic Test | <i>T. Yanagawa and F. Kasagi</i> | 783 |
| Program of the Conference | | 803 |
