PREFACE	v
1 ELEMENTS OF PROBABILITY THEORY	1
1. Events and probability	1
2. Measures on finite-dimensional spaces	5
3. Measurable functions and random variables	7
4. Sequences of events and random variables	11
5. Expectation of random variables	15
6. Convergence concepts	18
7. Independence and conditional expectation	24
2 STOCHASTIC PROCESSES	37
1. Definition and preliminary considerations	37

2.	Separability and measurability	41
3.	Gaussian processes and Brownian motion	46
4.	Continuity	55
5.	Markov processes	61
6.	Stationarity and ergodicity	66
3	SECOND-ORDER PROCESSES	74
1.	Introduction	74
2.	Second-order continuity	77
3.	Linear operations and second-order calculus	78
4.	Orthogonal expansions	81
5.	Wide-sense stationary processes	88
6.	Spectral representation	97
7.	Lowpass and bandpass processes	105
8.	White noise and white-noise integrals	109
9.	Linear prediction and filtering	116
4	STOCHASTIC INTEGRALS AND STOCHASTIC DIFFERENTIAL EQUATIONS	139
1.	Introduction	139
2.	Stochastic integrals	141
3.	Processes defined by stochastic integrals	145
4.	Stochastic differential equations	149
5.	White noise and stochastic calculus	155
6.	Generalizations of the stochastic integral	163
7.	Diffusion equations	169
5	ONE-DIMENSIONAL DIFFUSIONS	180
1.	Introduction	180
2.	The Markov semigroup	182
3.	Strong Markov processes	190
4.	Characteristic operators	193
5.	Diffusion processes	198
6	MARTINGALE CALCULUS	209
1.	Martingales	209
2.	Sample-path integrals	217
3.	Predictable processes	222
4.	Isometric integrals	227
5.	Semimartingale integrals	233

6. Quadratic variation and the change of variable formula	236
7. Semimartingale exponentials and applications	241
7 DETECTION AND FILTERING	250
1. Introduction	250
2. Likelihood ratio representation	254
3. Filter representation—change of measure derivation	257
4. Filter representation—innovations derivation	262
5. Recursive estimation	269
8 RANDOM FIELDS	279
1. Introduction	279
2. Homogenous random fields	280
3. Spherical harmonics and isotropic random fields	285
4. Markovian random fields	292
5. Multiparameter martingales	296
6. Stochastic differential forms	303
