

# CONTENTS

<b>1</b>	<b>TAYLOR POLYNOMIALS</b>	<b>1</b>
1.1	The Taylor polynomial	1
1.2	The error in Taylor's polynomial	6
1.3	Polynomial evaluation	11
<b>2</b>	<b>COMPUTER REPRESENTATION OF NUMBERS</b>	<b>17</b>
2.1	The binary number system	17
2.2	Floating-point numbers	24
<b>3</b>	<b>ERROR</b>	<b>33</b>
3.1	Errors: definitions, sources, examples	33
3.2	Propagation of error	46
3.3	Summation	53
<b>4</b>	<b>ROOTFINDING</b>	<b>61</b>
4.1	The bisection method	62
4.2	Newton's method	68
4.3	Secant method	78
4.4	Ill-behaved rootfinding problems	83
<b>5</b>	<b>INTERPOLATION</b>	<b>91</b>
5.1	Polynomial interpolation	92
5.2	Divided differences	101
5.3	Error in polynomial interpolation	112
5.4	Interpolation using spline functions	121
<b>6</b>	<b>APPROXIMATION OF FUNCTIONS</b>	<b>133</b>
6.1	The best approximation problem	134
6.2	Chebyshev polynomials	140
6.3	A near-minimax approximation method	145
<b>7</b>	<b>NUMERICAL INTEGRATION AND DIFFERENTIATION</b>	<b>155</b>
7.1	The trapezoidal and Simpson rules	156
7.2	Error formulas	167

7.3 Gaussian numerical integration	179
7.4 Numerical differentiation	188
<b>8 SOLUTION OF SYSTEMS OF LINEAR EQUATIONS</b>	<b>199</b>
8.1 Systems of linear equations	200
8.2 Gaussian elimination	205
8.3 Matrix arithmetic	220
8.4 The LU factorization	235
8.5 Error in solving linear systems	246
8.6 Least squares data fitting	256
8.7 The eigenvalue problem	268
<b>9 THE NUMERICAL SOLUTION OF DIFFERENTIAL EQUATIONS</b>	<b>285</b>
9.1 Theory of differential equations: An introduction	286
9.2 Euler's method	295
9.3 Convergence analysis of Euler's method	302
9.4 Taylor and Runge–Kutta methods	310
9.5 Multistep methods	325
9.6 Stability of numerical methods	337
9.7 Systems of differential equations	348
<b>Appendix A Mean Value Theorems</b>	<b>361</b>
<b>Appendix B Mathematical Formulas</b>	<b>371</b>
<b>Appendix C Numerical Analysis Software Packages</b>	<b>381</b>
<b>ANSWERS TO SELECTED PROBLEMS</b>	<b>387</b>
<b>REFERENCES</b>	<b>407</b>
<b>INDEX</b>	<b>411</b>
