

## CONTENTS

Preface

How to Use This Handbook

|            |                              |
|------------|------------------------------|
| Table I.   | Element Types                |
| Table II.  | Material Properties          |
| Table III. | Analysis Capabilities        |
| Table IV.  | Other Capabilities           |
| Table V.   | Operating Systems            |
| Table VI.  | Availability of the Programs |

### INTRODUCTION

|  |   |
|--|---|
| A Commentary on Commercial Finite Element Systems<br><i>H.H. Fong, PDA Engineering, California, U.S.A.</i> | 3 |
|--|---|

### CURRENT FINITE ELEMENT SYSTEMS

|  |    |
|--|----|
| ABAQUS - A General Purpose Linear and Nonlinear Finite Element Code<br><i>H.D. Hibbitt, Hibbitt, Karlsson and Sorensen, Inc.</i> | 21 |
|--|----|

|   |    |
|---|----|
| The Use of ADINA in Engineering Practice<br><i>K. -J. Bathe, Massachusetts Institute of Technology, U.S.A.<br/>&amp; G. Larsson, Adina Engineering AB, Sweden</i> | 59 |
|---|----|

|   |    |
|---|----|
| ANSYS<br><i>P.C. Kohnke, Swanson Analysis Systems, Inc., U.S.A.</i> | 79 |
|---|----|

|  |    |
|--|----|
| APPLE-SAP Structural Analysis System<br><i>M. Galluzzi, M. Giovagnoni &amp; G.M. Manfredini, Italimpianti S.p.A. Italy</i> | 87 |
|--|----|

|  |     |
|--|-----|
| ASAS - A Large-Scale, Sophisticated Finite Element Analysis System<br><i>J.B. Spooner, Atkins Research &amp; Development</i> | 107 |
|--|-----|

|  |     |
|--|-----|
| The ASKA Finite Element System<br><i>R. Goos, Ikoss GmbH</i> | 115 |
|--|-----|

|  |     |
|--|-----|
| BEASY Boundary Element Analysis System<br><i>C.A. Brebbia, D. Danson &amp; J. Baynham<br/>C.M. Beasy Ltd, Southampton, England</i> | 141 |
|--|-----|

|   |     |
|---|-----|
| A Description of the BERSAFE System<br><i>T.K. Hellen, Central Electricity Generating Board, U.K.</i> | 159 |
|---|-----|

|  |     |
|--|-----|
| The CASTEM Finite Element System<br><i>A. Combescure &amp; A. Hoffmann, CEA-DEMT &amp; P. Pasquet, CISI</i>  | 175 |
| CA.ST.OR. : Structure Analysis Softwares on mega and micro-computers<br><i>M. Afzali &amp; P. Devalan, CETIM, France</i>   | 187 |
| CHALMFEM - A Package of Computer Programs for FEM-Analysis of Engineering Problems<br><i>N-E. Wiberg, Chalmers University of Technology, Sweden</i>  | 223 |
| COMET-PR: The First Computer Implementation of the P-Version of the Finite Element Method<br><i>B. Szabo, Washington University, U.S.A. &amp; A. Peano, ISMES, Italy</i>   | 233 |
| COSMOS7 A Structural Analysis Finite Element Program<br><i>M. Lashkari &amp; V.I. Weingarten, University of Southern California, U.S.A.</i>  | 245 |
| DART - A Computer Program for the Design of Axisymmetric Reservoirs, Water Towers, Etc.<br><i>W.S. Doyle &amp; A.R. Lloyd, University of Cape Town, South Africa</i>   | 259 |
| DIAL Finite Element Analysis System<br><i>G.H. Ferguson &amp; N.A. Cyr, Lockheed Missiles &amp; Space Company, California, U.S.A.</i>  | 279 |
| DIANA - A Comprehensive, but Flexible Finite Element System<br><i>R. de Borst, Ger M.A. Kusters, P. Nauta &amp; F.C. de Witte, TNO Institute for Building Materials and Building Structures, the Netherlands</i> | 299 |
| A Finite Element Elastic Buckling Analysis for Slender Frames<br><i>C. Tahiani &amp; H. Hearty, Royal Military College of Canada, Canada</i>   | 313 |
| FASOR - A Program for Stress, Buckling and Vibration of Shells of Revolution<br><i>G.A. Cohen, Structures Research Associates, U.S.A.</i>  | 327 |
| The FEGS Limited Pre - and Post - Processing Programs<br><i>G.A. Butlin, Fegs Limited, England</i>   | 351 |
| FELCOG - An Interactive Fortran Code Based on Conjugate Gradients for the Solution of Large Sets of Finite Elements Equations<br><i>A.M. Perdon-Giuseppe Gambolati, University of Padova, Italy</i>              | 357 |
| The FEMALE Modelling Language<br><i>P.A. Newton, SIA Ltd.</i>  | 363 |
| FENRIS - A General Purpose Nonlinear Finite Element Program<br><i>P.G. Bergan, The Norwegian Institute of Technology and SINTEF, &amp; A. Arnesen, The Norwegian VERITAS, Norway</i>                             | 381 |
| FIDAP - Fluid Dynamics Analysis Package<br><i>M.S. Engelman, Fluid Dynamics International, U.S.A.</i>  | 397 |

|  |     |
|--|-----|
| The Finite Element Programs FLASH 2 and STATIK<br><i>U. Walder, Walder &amp; Partners, Bern &amp; D. Green, Glasgow University, Scotland</i>   | 407 |
| The HIFINEL Concept: An Adaptive F.E.M. Program Based on Hierarchical,<br>Hermitian Finite Elements<br><i>V. Hoppe, T. Knudsen &amp; S. Lassota, M.A.N. -B&amp;W-Diesel, Denmark</i>   | 427 |
| RAFTS and LAWPILE - The Development of a Foundation Analysis and Design<br>Suite<br><i>L.A. Wood, Queen Mary College, London</i>   | 439 |
| The LUSAS System<br><i>L.P.R. Lyons &amp; D.J. Irving, Finite Element Analysis Ltd., L.H. Boswell, City<br/>University, A. Stamenkovic, Kingston Polytechnic England and S.H. Zhang,<br/>The Ministry of Communications, China</i> | 461 |
| An Overview of the MARC General Purpose Finite Element Program<br><i>E. Hulst, MARC Analysis Research Corporation, The Netherlands</i>   | 473 |
| MBB-MAN-ICES-STRUDL<br><i>O. Ohtmer, MBB Munchen, Germany</i>  | 483 |
| MICAS - An Interactive Minicomputer Based General Purpose Finite Element<br>Analysis and Design System<br><i>L.M. Rand &amp; S.E. Soper, The Rand Group, U.S.A.</i>  | 511 |
| The Philosophy and Implementation of MODEL - A Modular Finite Element<br>Research Code<br><i>D. Harrison, T.J.W. Ward &amp; J.R. Whiteman, The Institute of Computational<br/>Mathematics, U.K.</i>                                | 527 |
| MODULEF : A Library of Computer Procedures for Finite Element Analysis<br><i>M. Bernadou, P.L. George &amp; M. Vidrascu, INRIA, France</i>   | 541 |
| MSC/NASTRAN<br><i>S. Horne, MacNeal-Schwendler GmbH</i>  | 557 |
| The PAFEC Finite Element Analysis System<br><i>P.M. Wheeler, PAFEC Ltd., UK</i>  | 565 |
| PATRAN - The Computational Laboratory<br><i>C. Hayden Hamilton, and R.S. Gallagher, PDA Engineering, U.S.A.</i>  | 577 |
| A Three-Dimensional B.I.E.M. Program<br><i>M. Doblare &amp; E. Alarcon, Polytechnic University, Spain</i>  | 595 |
| PREFEM and SERFEM - Special Purpose Programs for Elastic Plate Bending<br>and In-Plane Analysis of Plates<br><i>L. Bolteus, Gothenburg Universities Computing Centre, Sweden</i>   | 617 |
| Boundary Enhancement of SAP and LISA Systems<br><i>Shengnian Qu, Peking University, China</i>  | 627 |

|   |     |
|---|-----|
| SCIA's Finite Element System on Desktop Computers<br><i>J.P. Rammant, SCIA S.V. Belgium</i>   | 639 |
| Application of Finite Element Systems for Calculation of Fatigue Growth of Surface and Internal Cracks<br><i>I. Lotsberg, Det Norske Veritas, Norway</i>                                    | 659 |
| SET - A Program Chain for Design Computations in Structural Engineering<br><i>H. Werner, Technical University of Munich, Germany</i>  | 679 |
| The Place of a Special-Purpose Program System in a Multi-Purpose System World<br><i>V. Svalbonas, Koppers Company Inc. U.S.A.</i>   | 697 |
| New Implementations in Structural Code STDYNL<br><i>B.A. Ovunc, University of Southwestern Louisiana, U.S.A.</i>  | 713 |
| THAFEM - A Finite Element Program for Heat Transfer Analysis<br><i>D. Loyd &amp; G. Andersson, Linkoping Institute of Technology, Sweden and<br/>M. Froier, University of Lulea, Sweden</i> | 721 |
| TITUS: A General Finite Element System<br><i>P. Bougrelle, Framatome, France</i>  | 733 |
| United Computing's Guide to the F.E. Jungle!<br><i>D. Churchill, United Computing Systems, UK</i>   | 751 |
| The Finite Element Method in Education<br><i>G.D. Alford &amp; D.H.B. Gibbs, Teesside Polytechnic, UK</i>   | 755 |
