Contents

Preface
List of contributors

M. ARIAS, P. MARTINEZ-AMORES & R. ORTEGA 1
Some notes on a forced semilinear wave equation

G. BARLES & P.L. LIONS 4
Remarks on existence and uniqueness results for first-order Hamilton-Jacobi equations

L. BARTHELEMY 16
Application de la théorie des operateurs sous-potentiels au contrôle stochastique

A. BENSOUSSAN 30
Some remarks on ergodic control problems

J. BLAT 39
Bifurcation to positive solutions in systems of elliptic equations

H. BREZIS 47
Liquid crystals and S^2-valued maps

J. CARRILLO 55
On the uniqueness of the solution of a class of elliptic equations with nonlinear convection

T. CAZENAVE 69
Nonlinear Dirac equations: existence of stationary states

M. CHIPOT 79
Some results on the compressible Reynolds equation

G. DÍAZ 91
Uniqueness and interior L^∞-estimates for fully nonlinear equations in $\mathbb{R}^N$ without conditions at infinity

J. ESQUINAS & J. LÓPEZ-GÓMEZ 103
Optimal multiplicity in local bifurcation theory

M.J. ESTEBAN 112
Variational approach to the existence of skyrmions

E. FERNÁNDEZ-CARA & C. MORENO 123
Exact regularization and critical point approximation

J. HERNÁNDEZ 137
Continuation and comparison methods for some nonlinear elliptic systems

J.M. LASRY 148
EDP et anticipations rationnelles (à partir du modèle de J. Scheinkman et L. Weiss)

Y. MEYER 158
Les ondelettes

X. MORA 172
Finite-dimensional attracting invariant manifolds for damped semilinear wave equations

J-M. MOREL & L. OSWALD 184
Remarks on the equation $-\Delta u = \lambda f(u)$ with f nondecreasing

I. PERAL ALONSO 193
Some remarks on semilinear wave equations in $\mathbf{R}^n$

B. PERTHAME 210
Recent results on the quasi-variational inequality of the impulsive control

M. PIERRE 220
An L^1-method to prove global existence in some reaction-diffusion systems

J. SABINA & J. FRAILE 232
Directional wave fronts in reaction-diffusion systems: existence and asymptotic behaviour

JUAN L. VAZQUEZ 249
Convexity properties of the solutions of nonlinear heat equations

L. VÁZQUEZ 267
Some open computational problems in quantum lattice theory

J.M. VEGAS 276
Irregular variations of the domain in elliptic problems with Neumann boundary conditions

L. VERON 288
Singularities of some degenerate elliptic equations
