PART I MATHEMATICAL INTRODUCTION

Chapter 1	Numerical Computation	1
1.1.	Representation of Numbers	1
1.2.	On the Origin and Growth of Errors	3
1.3.	Numerical Cancellation	7
1.4.	Algorithms and Complexity	10
1.5.	Use of Computers	13
Chapter 2	Vectors and Matrices	15
2.1.	Vectors	15
2.2.	Matrices	18
2.3.	Eigenvalues and Eigenvectors	22
2.4.	Matrix Norms	26
2.5.	Matrix Functions	29
2.6.	Localization of Eigenvalues	31
2.7.	Normal Forms	32
2.8.	Rectangular Matrices	34
Chapter 3	Series Expansions	43
3.1.	Power Series	43
3.2.	Generating Functions	46
3.3.	Asymptotic Series	48
3.4.	Fourier Series	50
3.5.	Bernoulli Numbers and Bernoulli Polynomials	55
3.6.	Continued Fractions	60

Chapter 4	Orthogonal Functions	63
4.1.	General Concepts	63
4.2.	Orthogonal Polynomials	65
4.3.	Legendre Polynomials	71
4.4.	Laguerre Polynomials	74
4.5.	Hermite Polynomials	76
4.6.	Chebyshev Polynomials	77
Chapter 5	Linear Operators	80
5.1.	General Properties	80
5.2.	Special Operators	81
5.3.	Representation with Differences	82
5.4.	Factorials and Stirling Numbers	85
Chapter 6	Difference Equations	90
6.1.	General Concepts	90
6.2.	Linear, Homogeneous Difference Equations	92
6.3.	Differences of Elementary Functions	94
6.4.	Partial Difference Equations	96
Chapter 7	Special Functions	99
7.1.	Analytic Functions and Complex Integration	99
7.2.	The Gamma Function	103
7.3.	The Beta Function	107
7.4.	Some Functions Defined by Definite Integrals	109
7.5.	The Riemann Zeta Function	111
7.6.	Bessel Functions	114
7.7.	Spherical Harmonics	122
Chapter 8	Laplace Transformation	128
8.1.	Basic Theory	128
8.2.	Laplace Transforms of Some Special Functions	133
Chapter 9	Calculus of Variations	141

PART II EQUATIONS

Chapter 10	Systems of Linear Equations	149
10.1.	Gaussian Elimination	150
10.2.	Error Analysis	153
10.3.	Overdetermined Systems of Equations	155
10.4.	Iterative Methods	157
10.5.	Gradient Methods	164

Chapter 11	Nonlinear Equations and Systems of Equations	169
11.1.	Equations in One Variable	169
11.2.	Horner's Scheme	169
11.3.	Interpolation Methods for Real Roots	172
11.4.	Fixed-Point Methods	178
11.5.	Laguerre's Method	181
11.6.	Systems of Nonlinear Equations	183
11.7.	Minimization Methods	184
Chapter 12	Algebraic Eigenvalue Problems	189
12.1.	Iterative Methods	189
12.2.	Transformation Methods	196
Chapter 13	Linear Programming	209
13.1.	The Simplex Method	209
13.2.	The Transportation Problem	217
13.3.	Quadratic, Integer, and Dynamic Programming	223
PART III	APPROXIMATION	
Chapter 14	Interpolation	231
14.1.	Polynomial Interpolation	231
14.2.	Divided Differences	235
14.3.	Interpolation by Use of Differences	240
14.4.	Extrapolation	242
14.5.	Special Features	244
Chapter 15	Function Representation and Curve Fitting	250
15.1.	Least-Squares Polynomial Approximation	250
15.2.	Trigonometric Interpolation	254
15.3.	The Fast Fourier Transform	255
15.4.	Approximation with Trigonometric Functions	256
15.5.	Approximation with Exponential Functions	257
15.6.	Approximation with Chebyshev Polynomials	258
15.7.	Spline Approximation	262
15.8.	Rational Approximations	264
Chapter 16	The Monte Carlo Method	269
16.1.	Random Numbers	269
16.2.	Random Walks	273
16.3.	Computation of Definite Integrals	275
16.4.	Simulation	276

PART IV INTEGRATION AND SUMMATION

Chapter 17 Numerical Integration	281
17.1. General Rules	281
17.2. Methods Based on Equidistant Node Points	284
17.3. Formulas of Gauss Type	288
17.4. Multiple Integrals	296
Chapter 18 Summation	303
18.1. Sums of Factorials and Powers	303
18.2. Euler–McLaurin’s Summation Formula	305
18.3. Stirling’s Formula	307
18.4. Euler’s Transformation and Alternating Series	309
18.5. Summation by Use of Riemann’s Zeta Function	311

PART V DIFFERENTIAL AND INTEGRAL EQUATIONS

Chapter 19 Ordinary Differential Equations	317
19.1. Existence of Solutions	317
19.2. Euler’s Method	322
19.3. Taylor Series Expansion	324
19.4. Runge–Kutta (RK) Methods	326
19.5. Stiff Differential Equations	329
19.6. Multi-Step Methods	331
19.7. Cowell–Numerov’s Method	340
19.8. Systems of First-Order Linear Differential Equations	343
19.9. Boundary Value Problems	344
19.10. Eigenvalue Problems	351
Chapter 20 Partial Differential Equations	357
20.1. Classification	357
20.2. Hyperbolic Equations	359
20.3. Parabolic Equations	364
20.4. Elliptic Equations	373
20.5. The Finite Element Method (FEM)	380
20.6. Eigenvalue Problems	382
Chapter 21 Integral Equations	391
21.1. Classification	391
21.2. Fredholm’s Inhomogeneous Equation of the Second Kind	392
21.3. Fredholm’s Homogeneous Equation of the Second Kind	397
21.4. Fredholm’s Equation of the First Kind	400

21.5.	Volterra's Equations	401	
21.6.	Numerical Treatment of Integral Equations	403	
21.7.	Connections Between Differential and Integral Equations	405
