

Contents

- CHAPTER 1 The Design of a Function Subroutine, 1**
- 1.1 Introduction, 1
 - 1.2 General Considerations in Writing a Function Subroutine, 2
 - 1.3 Relation of the Function Subroutine to the Computer System, 3
 - 1.4 The Three Main Types of Function Subroutine, 4
 - 1.5 Special Programming Techniques, 7
 - 1.6 Subroutine Errors, 7
 - 1.7 Final Steps, 9
- CHAPTER 2 General Methods of Computing Functions, 10**
- 2.1 Introduction, 10
 - 2.2 Application of Infinite Expansions, 11
 - 2.3 Recurrence and Difference Relations, 23
 - 2.4 Iterative Techniques, 27
 - 2.5 Integral Representations, 28
 - 2.6 Differential Equations, 29
 - 2.7 Tabular Data, 32
 - 2.8 Convergence Acceleration, 33
- CHAPTER 3 Least Maximum Approximations, 42**
- 3.1 Introduction, 42
 - 3.2 Properties of Least Maximum Approximations, 43
 - 3.3 Nearly Least Maximum Approximations, 46
 - 3.4 Rational Approximation, 51
 - 3.5 Segmented Approximation, 54
 - 3.6 Computation of the Tables, 55

CHAPTER 4 The Choice and Application of Approximations, 58

- 4.1 Introduction, 58
- 4.2 Domain Considerations, 58
- 4.3 Machine Considerations, 62
- 4.4 Conditioning of Approximations, 65
- 4.5 Polynomial Forms, 67
- 4.6 Rational Forms, 73
- 4.7 Transformation Algorithms, 78

CHAPTER 5 Description and Use of the Tables, 82

- 5.1 Introduction, 82
- 5.2 Function Notes, 82
- 5.3 Accuracy of the Coefficients, 83
- 5.4 How to Use the Tables, 86
- 5.5 Preparation of the Tables, 88

CHAPTER 6 Function Notes, 89

- 6.1 Square Root, Cube Root, 89
- 6.2 Exponential and Hyperbolic Functions, 96
- 6.3 The Logarithm Function, 105
- 6.4 Trigonometric Functions, 112
- 6.5 The Inverse Trigonometric Functions, 120
- 6.6 The Gamma Function and Its Logarithm, 130
- 6.7 The Error Function, 136
- 6.8 Bessel Functions, 141
- 6.9 Complete Elliptic Integrals, 150

APPENDIX A Conversion Algorithms, 155

APPENDIX B Bibliography of Approximations, 161

APPENDIX C Decimal and Octal Constants, 181

REFERENCES, 184

CHAPTER 7 Tables of Coefficients, 189

INDEX, 341
