

# TABLE OF CONTENTS

|      |   |     |
|------|---|-----|
|      | PREFACE   | v   |
|      | INTRODUCTION  | 1   |
| 1    | BASIC PRINCIPLES AND MATHEMATICAL MODELS OF<br>ENGINEERING MECHANICS PROBLEMS       | 7   |
| 1.0  | Introduction  | 7   |
| 1.1  | Ideal-Fluid Flow  | 9   |
| 1.2  | Porous Media Flow   | 19  |
| 1.3  | Fickian Diffusion   | 25  |
| 1.4  | Heat Flow   | 26  |
| 1.5  | Elasticity Problems   | 28  |
| 1.6  | Use of Laplace Equation   | 41  |
| 1.7  | Mathematical Modeling   | 43  |
| 1.8  | Computational Mechanics and Hydraulics  | 47  |
| 1.9  | Modeling of Potential Problems  | 50  |
| 2    | A REVIEW OF COMPLEX VARIABLE THEORY   | 53  |
| 2.0  | Introduction  | 53  |
| 2.1  | Preliminary Definitions   | 53  |
| 2.2  | Polar Forms of Complex Numbers  | 56  |
| 2.3  | Limits and Continuity   | 58  |
| 2.4  | Derivatives: Analytic Functions   | 59  |
| 2.5  | The Cauchy-Riemann Equations and Harmonic Functions                                 | 60  |
| 2.6  | Complex Line Integration  | 62  |
| 2.7  | Cauchy's Integral Theorem   | 68  |
| 2.8  | The Cauchy Integral Formula   | 69  |
| 2.9  | Taylor Series   | 75  |
| 2.10 | Program I: A Complex Polynomial Approximation<br>Method                             | 85  |
| 2.11 | Complex Variables and Two-Dimensional Fluid Flow                                    | 93  |
| 3    | MATHEMATICAL DEVELOPMENT OF THE COMPLEX VARIABLE<br>BOUNDARY ELEMENT METHOD (CVBEM) | 101 |
| 3.0  | Introduction  | 101 |
| 3.1  | Basic Definitions   | 102 |
| 3.2  | Characteristics of the Linear Global Trial Function                                 | 106 |
| 3.3  | The $H_1$ Approximation Function  | 109 |
| 3.4  | Higher Order $H_k$ Approximation Functions  | 129 |
| 3.5  | Using $\phi$ or $\psi$ Functions as Boundary Conditions                             | 136 |
| 4    | A COMPUTER ALGORITHM FOR THE COMPLEX VARIABLE<br>BOUNDARY ELEMENT METHOD            | 156 |
| 4.0  | Introduction  | 156 |
| 4.1  | A Complex Variable Boundary Element Approximation<br>Model                          | 156 |
| 4.2  | The Analytic Function Defined by the Approximation<br>$\hat{\omega}(z)$             | 176 |
| 4.3  | Program 2: A Linear Basis Function Approximation $\hat{\omega}(z)$                  | 185 |
| 4.4  | A Constant Boundary Element Method  | 201 |
| 4.5  | Summary of Basic CVBEM Modeling Algorithm   | 204 |

|     |  |     |
|-----|--|-----|
| 5   | REDUCING CVBEM APPROXIMATION ERROR                         | 210 |
| 5.0 | Introduction   | 210 |
| 5.1 | Application of the CVBEM to the Unit Circle                | 210 |
| 5.2 | Approximation Error from the CVBEM                         | 217 |
| 5.3 | A CVBEM Modeling Strategy to Reduce Approximation Error    | 221 |
| 5.4 | A Modified CVBEM Numerical Model                           | 229 |
| 5.5 | Program 3: A Modified CVBEM Numerical Model                | 237 |
| 5.6 | Determining Some Useful Error Bounds for the CVBEM         | 246 |
| 6   | THE APPROXIMATIVE BOUNDARY                                 | 253 |
| 6.0 | Introduction   | 253 |
| 6.1 | Expansion of the $H_k$ Approximation Function              | 253 |
| 6.2 | Upper Half Plane Boundary Value Problems                   | 266 |
| 6.3 | The Approximative Boundary for Error Analysis              | 271 |
| 6.4 | Program 4: Analytic Continuation Model                     | 274 |
| 6.5 | Locating Additional Nodal Points on $\Gamma$               | 285 |
| 7   | CVBEM MODELING TECHNIQUES                                  | 295 |
| 7.0 | Introduction   | 295 |
| 7.1 | Sources and Sinks  | 295 |
| 7.2 | Program 5: Source and Sink Model                           | 297 |
| 7.3 | Regional Inhomogeneity                                     | 298 |
| 7.4 | Program 6: Nonhomogeneous Domain                           | 303 |
| 7.5 | The Poisson Equation                                       | 324 |
| 7.6 | Computer-Aided-Analysis and the CVBEM                      | 325 |
| 8   | CVBEM APPLICATIONS   | 334 |
| 8.0 | Introduction   | 334 |
| 8.1 | Modeling Nonuniform St. Venant Torsion                     | 334 |
| 8.2 | Numerical Calibration of Domain Models                     | 343 |
| 8.3 | Modeling Steady State, Advective Contaminant Transport     | 353 |
| 8.4 | A Simple Model of Soil Water Phase Change                  | 358 |
| 8.5 | Modeling Two-Dimensional Steady State Soil Freezing Fronts | 367 |
|     | REFERENCES   | 375 |
|     | LIST OF SYMBOLS  | 381 |
|     | MATHEMATICAL NOTATIONS                                     | 388 |
