

## TABLE OF CONTENTS

Chapter 1: Flow Processes and Mathematical Models . . . . .	1
1.0 Introduction . . . . .	1
1.1 Ideal Fluid Flow . . . . .	3
1.2 Steady State Heat Flow . . . . .	7
1.3 Saturated Groundwater Flow . . . . .	8
1.4 Steady State Fickian Diffusion . . . . .	9
1.5 Use of the Laplace Equation . . . . .	10
Chapter 2: A Review of Complex Variable Theory . . . . .	11
2.0 Introduction . . . . .	11
2.1 Preliminary Definitions . . . . .	11
2.2 Polar Forms of Complex Numbers . . . . .	13
2.3 Limits and Continuity . . . . .	15
2.4 Derivatives . . . . .	16
2.5 The Cauchy-Riemann Equations and Harmonic Functions.	16
2.6 Complex Line Integration . . . . .	18
2.7 Cauchy's Integral Theorem . . . . .	24
2.8 The Cauchy Integral Formula . . . . .	25
2.9 Taylor Series . . . . .	29
2.10 Program 1: A Complex Polynomial Approximation Method . . . . .	33
2.11 Potential Theory and Analytic Functions . . . . .	44

<b>Chapter 3: Mathematical Development of the Complex Variable Boundary Element Method . . . . .</b>	<b>46</b>
<b>3.0 Introduction . . . . .</b>	<b>46</b>
<b>3.1 Basic Definitions . . . . .</b>	<b>46</b>
<b>3.2 Linear Global Trial Function Characteristics . . . . .</b>	<b>50</b>
<b>3.3 The <math>H_1</math> Approximation Function . . . . .</b>	<b>53</b>
<b>3.4 Higher Order <math>H_k</math> Approximation Functions . . . . .</b>	<b>74</b>
<b>3.5 Engineering Applications . . . . .</b>	<b>81</b>
<b>Chapter 4: The Complex Variable Boundary Element Method . . . . .</b>	<b>101</b>
<b>4.0 Introduction . . . . .</b>	<b>101</b>
<b>4.1 A Complex Variable Boundary Element Approximation Model . . . . .</b>	<b>101</b>
<b>4.2 The Analytic Function Defined by the Approximator <math>\hat{\omega}(z)</math></b>	<b>123</b>
<b>4.3 Program 2: A Linear Basis Function Approximator <math>\hat{\omega}(z)</math>.</b>	<b>134</b>
<b>4.4 A Constant Boundary Element Method . . . . .</b>	<b>153</b>
<b>4.5 The Complex Variable Boundary Element Method (CVBEM) .</b>	<b>157</b>
<b>Chapter 5: Reducing CVBEM Approximation Relative Error . . . . .</b>	<b>162</b>
<b>5.0 Introduction . . . . .</b>	<b>162</b>
<b>5.1 Application of the CVBEM to the Unit Circle . . . . .</b>	<b>162</b>
<b>5.2 Approximation Error from the CVBEM . . . . .</b>	<b>169</b>
<b>5.3 A CVBEM Modeling Strategy to Reduce Approximation Error . . . . .</b>	<b>173</b>
<b>5.4 A Modified CVBEM Numerical Model . . . . .</b>	<b>181</b>
<b>5.5 Program 3: A Modified CVBEM Numerical Model . . . . .</b>	<b>187</b>
<b>5.6 Determining some Useful Relative Error Bounds for the CVBEM . . . . .</b>	<b>197</b>

Chapter 6: Advanced Topics . . . . .	205
6.0 Introduction . . . . .	205
6.1 Expansion of the $H_k$ Approximation Function . . . . .	205
6.2 Upper Half Plane Boundary Value Problems . . . . .	218
6.3 Sources and Sinks . . . . .	225
6.4 The Approximative Boundary for Error Analysis . . . . .	227
6.5 Estimating Boundary Spatial Coordinates . . . . .	237
Bibliography . . . . .	242
