

Table of Contents

One	
Computers and Programming	
2	1.1 The Digital Computer, 3
	1.2 Programming the Computer, 5
	1.3 A Concise Introduction to FORTRAN, 6
Two	
Approximate Computations	
16	2.1 Successive Approximations, 17
	2.2 Errors, 20
	2.3 Taylor Series Expansions, 21
	2.4 Synthetic Substitution, 26
	2.5 Checking of Tables by Differences, 28
	Problems, 32
Three	
Differentiation, Integration, Interpolation, and Extrapolation	
36	3.1 Pivotal Points, 37
	3.2 Differentiation Formulas, 38
	3.3 Integration Formulas, 43
	3.4 Parabolic Interpolation and Extrapolation, 50
	3.5 Lagrangian Interpolation, 52
	3.6 Richardson's Extrapolations, 54
	Problems, 56

Four

Solution of Algebraic and Transcendental Equations	58
4.1 Solution of Algebraic Equations by Formula,	59
4.2 Real Roots of Algebraic Equations by Iteration,	61
4.3 Real Roots of Transcendental Equations, 64 Problems,	67

Five

Simultaneous Linear Algebraic Equations	70
5.1 Pivotal Condensation of Determinants,	71
5.2 Gauss's Elimination Methods,	74
5.3 Matrix Inversion by Elimination,	76
5.4 Gauss-Seidel Iteration Method,	78
5.5 Homogeneous Equations and Eigenvalues, 80 Problems,	83

Six

Ordinary Boundary-value Problems	86
6.1 Second-order Boundary-value Problems,	87
6.2 Higher-order Boundary-value Problems,	89
6.3 Characteristic-value Problems, 90 Problems,	91

Seven

Ordinary Initial-value Problems	94
7.1 Starting the Solution,	95
7.2 Euler's Methods,	96
7.3 Runge-Kutta Methods,	100
7.4 Milne's Predictor-corrector Method,	102
7.5 Simultaneous and Higher-order Equations,	103
7.6 The Direct Integration Forward of Higher-order Equations,	105
7.7 Solution of Boundary-value and Characteristic-value Problems by Forward Integration,	107
7.8 Accumulation of Error, 109 Problems,	111

Eight

Two-dimensional Problems	114
8.1 Pivotal Points, Partial Operators, and Double Interpolation,	115
8.2 Double Integration,	120
8.3 Integration of Elliptic Equations,	123
8.4 Parabolic Equations,	126
8.5 Hyperbolic Equations, 128 Problems,	130
