

CONTENTS

	<i>Preface</i>	vii
1	Introduction to the simulation method	1
	1.1 General background. Modelling	1
	1.2 Principal characteristics of Monte Carlo methods	3
	1.3 Simulation models. Classification	8
	1.4 A model of market fluctuations	10
	1.5 A model of a car washing station	12
	Exercises	15
2	Construction of simulation programs	16
	2.1 Basic approaches	16
	2.2 Data structures	23
	2.3 The implementation of event lists	31
	2.4 Simulation languages. SIMSCRIPT, GPSS and SIMULA	34
	2.5 Debugging of a simulation program	40
	Exercises	41
3	Simulation examples	42
	3.1 A versatile warehouse model	42
	3.2 The machine interference model	46
	3.3 A system with priorities	50
	3.4 A queueing network model	57
	Exercises	63
4	Pseudo-random number sequences	65
	4.1 Uniform variables	65
	4.2 Random sampling from different populations	69
	4.3 Statistical tests	76
	4.4 When to use what distribution	82
	Exercises	85
5	Collection and analysis of simulation data	86
	5.1 Estimation of parameters	86
	5.2 Confidence intervals	92
	5.3 Short-run and long-run performance	95
	5.4 The regenerative method	99
	5.5 Estimating distributions	103
	Exercises	105

6	Variance reduction methods	106
6.1	Common random number streams	106
6.2	Replacing random variables by their expectations	108
6.3	Antithetic variates	111
6.4	Control variables	113
	Exercises	115
7	Design and analysis of simulation experiments	116
7.1	Analysis of variance	116
7.2	Linear regression	121
	Exercises	126
Appendix 1	A SIMULA primer	128
1.	General features. Input/output	128
2.	The class concept	133
3.	Prefixing. Hierarchical structures	136
4.	Class <i>SIMSET</i>	139
5.	Class <i>SIMULATION</i>	143
6.	System-defined procedures	147
Appendix 2	A probability theory primer	150
1.	Sample points, events and probabilities	150
2.	Random variables	152
3.	Mean, Variance and Covariance. Inequalities	155
4.	Bernoulli trials. The geometric and binomial distributions	158
5.	The exponential distribution and the Poisson process	160
6.	The normal distribution and related topics	163
7.	Simple queueing systems	165
	<i>Tables</i>	169
	<i>References</i>	181
	<i>Index</i>	183
