Contents

I. Engineering in General

Some Recent Investigation on Linear Elastic and Inelastic Problems for Solid Mechanics by Boundary Element Method
DU Qinghua, CEN Zhangzhi and LU Xilin 3

Progress in 3-D Boundary Element Analysis via Examples
Banerjee, P. K., Raveendra, S. T. and Ahmad, S. 19

On the Complete Solution of Differential Equations and Boundary Element Methods
HE Gaungqian and PENG Xiaolin 39

Application of a Boundary Element Method in Geology
LIU Jun, Beer, G., Swoboda, G. and Meek, J. L. 47

Large Deflection Analysis of Shallow Spherical Shell Using an Integral Equation Method
Tosaka, N. and Miyake, S. 59

Applications of Boundary Element-Finite Element Combined Method to Three-Dimensional Viscoelastodynamic Problems
Kobayashi, S., Nishimura, N. and Mori, K. 67

II. General Methods

The Coupling of BEM and FEM for Exterior Boundary Value Problems
Hsiao, G. C. and Porter, J. F. 77

Nonlinear Quasi-static and Trasnient Response Analysis of Shallow Shells: Formulations and Interior/ Boundary Element Algorithms
Zhang, J. D. and Atluri, S. N. 87

A New Integral Equation for Plane Harmonic Functions
SHEN Xinzhuo and HU Haichang 111

Analysis of Consolidation by Boundary Integral Equation Method
Nishimura, N., Umeda, A. and Kobayashi, S. 119

Approximation of Boundary Condition at Infinity and its Application to Boundary Element Methods
HAN Houde and WU Xiaonan 127

On the Mathematical Foundations of the Boundary Element Methods
Zhu Jialin 135

The Convergence of BEM for the Stationary Stokes Problem in Three Dimensions 143
WANG Hong

An Algorithm for Solving Large System of Unsymmetric Linear Equations in Boundary Element Method
HUA Bohao and YE Xianrong 151

On Fredholm Operators in Elasticity (abstract)
Rieder, G. 159

III. Fluid Mechanics and Thermo-mechanics

Numerical Simulations of the Unsteady-State Incompressible Viscous Flows Using an Integral Equation
Tosaka, N. and Kakuda, K. 163

Boundary Element Method for Transonic Flow About Three Dimensional Wings
YANG Zuosheng 173

Seepage Flow Analysis of Elastic Porous Media by Boundary Elements
Aramaki, G., Onishi, K. and Kuroki, T. 181

Studies on Green's Function Method for the Numerical Solution of Steady-state Incompressible Viscous Fluid Flow
WU Jianghang, HAN Qingshu and YANG Dequan 187

Sound Propagation Above Inhomogeneous Grounds: Integral Equations and Numerical Techniques
Habault, D. and Gaitan, P. 193

A Boundary Element Method for the Floating Body Problem
Hsiao, G. C., Kleinman, R. E. and Liu, Y. W. 199

Integral Representation on Pressure Distribution
Wang, C. M. 207

KYOKAI. F - A Small Thermal Flow Solver
Ohura, Y., Kobayashi, K., Onishi, K. and Tosaka, N. 215

Boundary Finite Element Method for Heat Conduction Equation
YANG Danping 219

Boundary Element Method to Solve Conjugate Heat Transfer Problems — the Case of Fully Developed Laminar Flow in Tubes
ZHANG Ping, LEE Li and WANG Chaoyang 227

Boundary Element Method in Analysing the Temperature Field
JIN Zailu and LI Tie 235

An Efficient Algorithm of BEM to Stefan Problems with Radiative Boundary Conditions
WANG Chaoyang and TU Chuanjing 243

BEM Solution of Multi-dimensional Heat Conduction Equations
CHANG Huiliu 251

IV. Solid Mechanics

Boundary Element Analysis in Plasticity and Mathematical Programming
Maier, G., Nappi, A. and Novati, G. 261

Boundary Element Modeling of Crack Singularities in 3-D Elastostatics
Tanaka, M. and Itoh, H. 275

An Alternative Quasi-linear Solution of Elastoplasticity in Boundary Element Method
LOU Zhiwen and YANG Wuhua 287

Investigation in Weighted Function and Optimization of Isoparametric Singular Boundary Elements' Size in 3-D Crack Problem
ZHANG Yongyuan and Feng Wei 295

On the BEM Solution of Rotationally Symmetrical Body Under Nonsymmetrical Surface Load
LE, M. F., TONG, Y. W. and WEI, J. F. 303

A Coupled Finite Element — Boundary Element Method for Three Dimensional Elastoplasticity Analysis
CEN Zhangzhi, WANG Xucheng and DU Qinghua 311

A New Method of BEM for Solving Orthotropic Plate with Hole
TIEN Chungrou 319

Solving Plane Thermoelasticity Problems by the Boundary Element Method
WANG Yuanchun, Matsumoto, E. and ZHANG Jian 327

Improvement of the Boundary Element Method Applied to Contact Problems and Its Applications in 3-D Problems
Liu Shubin, He Defang and Wang Yongjia 335

Boundary Integral Method Applied to Photoelasticity
GUO Huaizhi 343

V. Plates and Shells

An Integral Equation Formulation for Elastic and Inelastic Shell Analysis
Mukherjee, S. and Poddar, B. 353

Finite Deflection Analysis of Heated Elastic Plates by the Boundary Element Method
YE, T. Q. and LIU Yijun 367

Spline Boundary Element Method for Shallow Thin-shells
WANG, Y. C., YE, J. Q. and WANG, Z. H. 375

Boundary Element Analysis of Plate Bending Problem With Nonlinear Boundary Conditions
Kamiya, N. and Sawaki, Y. 383

A Boundary Integral Equation for Anisotropic Plates with Simply-supported Smooth Edges
Zastrow, U. 393

Boundary Element Method for Kirchhoff Type Plate Bending Problems by the Nonsingular Integration Technique
LU Xilin and DU Qinghua 403

Application of Boundary Element Method in Bending Problem of Thin Plates with Large Deflection
FENG Zhengnong and LI Zengfu 411

Boundary Element Analysis of Laminated Plates
YE Biquan 419

Spline Boundary Element Method for Plate Bending Problems
WANG, Y. C., JIANG, L. Z., LI, J. and WANG, Z. H. 427

VI. Dynamics

The Double Layer Potential for Periodic Elastic Waves in R^3
Nedelec, J. C. 439

Sound Radiation by a Baffled Cylindrical Shell: Boundary Elements Method and Fourier Series Solution
Filippi, P. J. T. and Habault, D. 449

Mixed Method of BIEM and FEM to Solve Free Vibration of Reissner's Plate
LEI Xiaoyan and HUANG Maokuang 455

Boundary Element Method for Two-dimensional Transient Elastodynamics
YIN Jiaju, JI Xing and ZHENG Guaying 461

On the Analysis of the Dynamic Soil-Structure Interaction by a Hybrid Method (SH-Waves)
Hadjikov, L., Dineva, P. and Rangelov, Ts. 469

A Simplified Boundary Integral Equation Formulation for Free Vibration Analysis of Thin Plate
YAO Minwu 475

Three Dimensional Dynamic Response of the Ship-wave Interaction by Coupling BE/FE
FENG Zhenxing and HUANG, T. C. 483

Application of the Boundary Element Method in Coupling Vibration of FLuid-Structure System
SUN Keming, LIN Gao and ZHAO Jincheng 491

Application of Triangular and Rectangular Boundary Elements to the Analysis of Soil-foundation Dynamic Interactions
CHEN, Y. M., SONG, B. Q. and TONG, J. Y. 499

Dynamic Soil-Structure Interaction Problem Including Viscous Damping
Zhou Zi-Reng, Wiberg, N. E. and Tullberg, O. 507

VII. Applications

BIE Applied to 3D Transient Thermo-elasticity
Chaudouet, A. 523

Application of Coupled FEM-BEM Analysis for Three-Dimensional Tunnel Analysis
Swoboda, G. A., Mertz, W. G. and Beer, G. 537

Boundary Element Technique in Infinite and Semi-infinite Plane Domain
ZHANG Chuhan and Song Chongmin 551

Improvement of Structural Design of Heald Frame Beams
Matsumoto, E., Ohtani, K. and Sekiya, T. 559

An Analysis on the Consolidation of Soft Clay Foundation by Boundary Element Method
LIN Feng and CHEN Huan 569

Shape Optimization of Gravity Dam by BEM
CHANG Yang and SHEN Jiayin 577

An Advanced Boundary Element Approach with Application on Structures of Tall Buildings
Peng Xiaolin and ZHANG Zhihong 585

A Boundary Element - Finite Element Method of Analysis for Viscoelasticic Stress in Tunnels
LIU Guangjun and WANG Guifang 593

The Application of Non-Linear Boundary Element Method in Cut-and-fill Mining Systems
YE Qianyuan 601

The Basic Solution of the Three Dimensional Anchor Bolt Element and the Numerical of BEM
GAO Tong and LI Yonghe 609

Nonlinear Analysis of Reinforced Concrete Deep Beam by Boundary Element Method
LU Hexiang, ZHAO Jincheng and YANG Guoxian 617

The Correction for Indirect Boundary Element Method
ZHANG Youtian, WANG Lei and CHEN Ping 625

Coupling Method Applied to Elastoplastic Problems in Hydraulic Engineering
SHEN Jiayin and ZHANG Yang 633

VIII. Miscellaneous

Viscoelastic Boundary Element Method for Analyzing Polymer Crazing as Quasi-fracture (abstract)
SUN, B. N. and Hsiao, C. C. 643

Two-dimensional Shape Optimal Design by the Boundary Element Method (abstract)
ZHANG Guihua, LE Meifeng and Cai Huaicong 644

Boundary Element Method for the Coupled Motion Problem of Fluid and Solid (abstract)
ZANG Yuelong, JI Xing and DU Qinghua 645

The Boundary Element Method Applied to Some Quasi-nonlinear Problems (abstract)
HUANG Qingping and DU Qinghua 646

The Boundary Element Methods of Ionized Plasma Diffusion Problem Under Some Orthogonal Curvilinear Coordinate Systems (abstract)
ZHAO Zhongsheng and ZHANG Henjui 647

Comparison Between Boundary Element Method and Finite Element Method for Three-dimensional Flow Over Spillway (abstract)
ZHENG Bangmin and SHAO Xiaomin 648

A Boundary Integral Formulation for Transient Wave Problems (abstract)
DAI Danong, WANG Xucheng and DU Qinghua 649

Influence of Friction on Contact Pressure in Boundary Element Analysis of Contact Problems (abstract)
WANG Junshu 650

A Regular Indirect Method Using an Intermittent Auxiliary Boundary for Potential Problems
XU Hanzhong 651

Deduction of Boundary Element Formulations Based on Variational Principles
CHENG Liangsheng 659

A Direct Method for Deriving Fundamental Solution of Halfplane Problem
HUANG Yuying and WUHAN Hubei 665

On Calculation of Integral Displacements and Stresses in the Region Near Surface of the Body by Boundary Element Method
SHEN, G. and XIAO, H. 673

Investigation in Improving the Computational Accuracy of Local "Uncracked Stress" in Pipe-shaped Structure Using Isoparametric Boundary Element Method
ZHANG Yongyuan, Luo Gangming and Wu Ronghua 681

The Coupling of BEM and FEM Used in Stress Analysis of the Structure on the Half Infinite Foundation
Chen, G. R. and Qian, J. 689

Dynamic Response of Multi-storey Buildings on Layered Soil Due to Earthquake
Huh, Y. and Schmid, G. 697

Space-Time Variational Formulation for the Kirchoff Integral Equation
Ding, Y., Forestier, A. and Ha Duong, T. 707

Contributors 717
