

CONTENTS

VOLUME I

PREFACE

INTRODUCTION – The Future of the Boundary Element Method
C.A. Brebbia

SECTION I HEAT TRANSFER

- Thermo-Elastic Analysis by Coupling Procedure Using Boundary and Finite Elements 3
T. Ohkami, Y. Mitsui
- Approximate Solutions with Heat Polynomials for Heat Conduction Problems by Boundary Residual Method 17
N. Kitahara, H. Yano and A. Kieda
- Uniform Convergence Theorem for Boundary Element Solutions of Heat Equation with the Second Initial-Boundary Value Problem 29
Y. Iso
- Boundary Element Method Applied to Spontaneous Combustion of Coal Storage 35
S. Takahashi, M. Morita, K. Hayashi and T. Nishimoto
- A Boundary Element Method for Nonlinear Transient Heat Conduction Problems 47
M. Kikuta, H. Togoh and M. Tanaka
- A Dual Reciprocity Boundary Element Formulation for Axisymmetric Diffusion Problems 59
L.C. Wrobel, J.C.F. Telles and C.A. Brebbia
- Accuracy of Boundary Element Method in Non-Stationary Heat Transfer Problems 71
J. Kihara, T. Umeda and K. Taneda

SECTION II ACOUSTICS

- Underwater Sound Radiated From a Vibrating Ship Hull 83
M. Bessho, H. Kawabe and Y. Iwasaki
- Radiated Sound Analysis from Vibrating Structures Using Boundary Element Method 95
M. Yaoi, I. Hagiwara and Y. Sakurai
- ACOUST/BOOM – A Noise Level Predicting and Reducing Computer Code 105
S. Suzuki, M. Imai and S. Ishiyama

SECTION III STRESS CONCENTRATION – FATIGUE AND FRACTURE MECHANICS

- Stress Concentration Factor of Unidirectional Fibre Reinforced Composite with a Hole 117
H. Ishikawa, H. Takagi
- Stress Analysis of Bolted Connections by Boundary Element Method 123
M. Tanaka

A New Family of Crack Elements for Stress Intensity Factor Computation in Elastostatics by Boundary Element Method <i>M. Tanaka, H. Itoh</i>	131
Stress Analysis of a Rectangular Plate with a Crack by Body Force Doublet Method <i>H. Nisitani, H. Noguchi and K. Mori</i>	143
Boundary Element Analysis for Some Crack Problems <i>H. Kisu, R. Yuuki and T. Matsumoto</i>	159
Scattering of Elastic Waves by a Three Dimensional Crack <i>S. Hirose, Y. Niwa</i>	169
An Application of the Boundary Element Method to the A-C Field Measurement Crack Detection Technique <i>K.H. Lee, M.O. Lai and T.H. Tan</i>	179
A Boundary Element Procedure for Estimating the Residual Fatigue Life of Three Dimensional Crack Problem under Cycle Loadings with Varying Amplitudes <i>W. Feng, Y-Y. Zhang</i>	193
SECTION IV GEOMECHANICS	
Stability Analysis of Pillars in a Room and Pillar Exploitation <i>G. Carosso</i>	205
The Dynamic Response of Two Rigid Surface Foundations by BEM <i>M. Ohmi, N. Tosaka</i>	215
Analyses of Elastic Wave Scattering Due to Geo-Surface Structures <i>M. Ohtsu, S. Uesugi</i>	227
Boundary Element Method for Semi-Infinite Region Problems <i>Wang Cheng-bo, Liu Xing-yeh</i>	237
SECTION V ELECTROSTATICS & ELECTROMAGNETIC PROBLEMS	
Boundary Element Simulation of Electrical Impedance Nondestructive Inspection <i>Y. Kagawa, T. Murai and T. Nakasai</i>	249
Original Treatment of Singularities in a B.E. Program Applied to Electrostatics <i>M. Defourny</i>	259
Application of Boundary Element Method to Galvanic Corrosion Problem of Cast Iron – Stainless Steel Couple <i>K. Kishimoto, S. Aoki, M. Sakata and M. Miyasaka</i>	269
How to Face the Problem of Layers of Different Conductivity in Sea Water when using B.E.M. for Cathodic Protection Problems <i>P. Cicognani, G. Mattolini</i>	279
Analysis of Capacitive Transducer for Displacement Measurement by Boundary Element Method <i>M. Hirasawa, M. Nakamura</i>	289

Hybrid Finite Element and Boundary Element Method for Three-Dimensional Electromagnetic Field Analysis <i>T. Onuki, T. Yokoi</i>	297
An Analysis of Three-Dimensional Electromagnetic Field by Using Boundary Element Method <i>H. Tsuboi, T. Misaki</i>	307
Boundary Integral Method for some Problems Arising in Electromagnetics <i>C. Devys, A. Ziani</i>	317
Boundary Elements vs Infinite Elements for Electromagnetic Field <i>Y. Akahoshi, G. Yagawa, T. Horie</i>	329
Application of Boundary Element Method to Analysis of Charged-Beam Trajectories <i>T. Sekihara, T. Ichiyonagi and H. Kotera</i>	339
Nonlinear Analysis of MHD Equilibria of Toroidal Plasmas Using Boundary Element Method <i>M. Tsuchimoto, T. Honma, S. Yatsu and I. Kaji</i>	349
Three Dimensional Magnetostatic Field Analysis for a Deflection Yoke in CRT <i>T. Nakagawa, T. Nomura and S. Nakamura</i>	359
Nonlinear Analysis of Magnetic Field by Boundary Element Method Taking Account of External Power Source <i>M. Enokizono, R. Kagawa and T. Nakamura</i>	369
Boundary Element Method for Magnetic Field Analysis Including External Power Source and Eddy Current <i>M. Enokizono, T. Todaka</i>	381
Combination of Finite and Boundary Element Including External Power Source for Magnetic Field Analysis <i>M. Enokizono, S. Nagata</i>	391
SECTION VI OPTIMIZATION	
On Study of Shape Optimization of 2-Dimensional Elastic Bodies by BEM <i>Y. Miyamoto, S. Iwasaki and H. Sugimoto</i>	403
SECTION VII DYNAMICS AND VIBRATIONS	
Direct Boundary Element Method for the Wave Equation <i>V. Caputo, P. De Simone</i>	415
A BIE Analysis of Wave Propagation in Anisotropic Media <i>N. Nishimura, S. Kobayashi, T. Kishima</i>	425
Transient Boundary Element Elastodynamics Using the Dual Reciprocity Method and Modal Superposition <i>D. Nardini, C.A. Brebbia</i>	435
Numerical Solution of Kirchhoff Integral Equation by Boundary Elements <i>W.J. Mansur, A. Castro</i>	445

SECTION VIII STRUCTURAL PROBLEMS

- Application of Boundary Element Method in the Design of Pressure Diecasting Dies 461
T. H. Siau
- Some Further Works for the Kirchhoff Plate Bending Problems by Highly Conforming Boundary Element Method 475
Q. H. Du, X. L. Lu
- BEM Approach to Analysis of Bridge Structures 487
Y. Miyamoto, S. Iwasaki and H. Deto
