

## VOLUME 3

### ACOUSTICS

- An Optimization Method in Inverse Acoustic Scattering** 3  
*(Invited contribution)*  
*A. Kirsch, R. Kress*
- Boundary Integral Equation Approach to Structural-Acoustic  
Coupling Problems *(Invited contribution)* 19  
*M. Tanaka, Y. Masuda*
- Integro-Differential Formulation and Boundary Element Method  
Resolution of an Acoustic Scattering Problem 35  
*A. Bamberger, F. Starling*
- The Underwater Sound Scattering Problem from the Floating  
Elastic Shell 53  
*Y. Iwasaki, H. Kawabe and M. Bessho*
- Numerical Computation of Scattering Frequencies 65  
*M. Lenoir, M. Vullierme-Ledard*
- ### DYNAMIC PROBLEMS
- Laplace Transform – Boundary Element Method for Time  
Dependent Problems *(Invited contribution)* 83  
*J. Brilla*

A Mathematical Analysis of Boundary Integral Equations in the Scattering Problems of Transient Waves ( <i>Invited contribution</i> ) <i>T. Ha Duong</i>	101
Boundary Elements and Perturbation Theory for Certain Classes of Hyperbolic and Parabolic Problems <i>G.S. Gipson, D.D. Reible and S.A. Savant</i>	115
Application of the Boundary Element Method in the Study of Surface and Internal Waves in Channels of Variable Depth with Two Fluid Layers <i>M.S. Ingber, A.K. Mitra</i>	129
Three Dimensional Elastodynamic Inclusion Analysis <i>M. Kitahara, M. Koshimizu and K. Nakagawa</i>	139
An Approximate BEM for Wave Propagation in the Half-Plane <i>D.P.N. Kontoni, D.E. Beskos</i>	149
Horizontal Nonlinear Sloshing Using Boundary Elements <i>J.P. Pauwelussen</i>	167
Fluid Oscillations Under Reduced Gravity <i>J. Siekmann, U. Schilling</i>	187
Green's Function for Dynamic Soil-Structure Interaction Problems <i>A. Umek, A. Strukelj</i>	201
<b>HEAT TRANSFER AND DIFFUSION</b>	
Boundary Integral Equations of the First Kind for the Heat Equation ( <i>Invited contribution</i> ) <i>D.N. Arnold, P.J. Noon</i>	213
Galerkin Method for Boundary Integral Equations in Transient Heat Conduction ( <i>Invited contribution</i> ) <i>K. Onishi</i>	231
Application of BEM to Problem of Unsteady Heat Transfer with Moving Heat Sources <i>J. Drewniak, S. Wojciech</i>	249
On the Galerkin Approximation of Nonsmooth Boundary Integral Equations Arising in Radiative Heat Transfer <i>J. Gwinner</i>	257
Solution of Transient Heat Conduction Problems Using Boundary-Only Formulation <i>A.J. Nowak</i>	265
Thermal Modelling of Hybrid Circuits <i>L. Rottiers, G. De Mey</i>	277

Boundary Element Method Self Adaptive Grid Treatment of Nonlinear Time Dependent Radial Heat Flow <i>B. Sarler, A. Alujevic and G. Kuhn</i>	289
Three-Dimensional Steady State Diffusion-Convection <i>P. Skerget, I. Zagar and A. Alujevic</i>	303
Boundary Element Method for Neutron Diffusion <i>A. Trkov, M. Najzer, L. Skerget and A. Alujevic</i>	313
<b>POROUS MEDIA FLOW</b>	
Computation of the Transient Seepage Problem in Anisotropic Porous Media by the Boundary Element Method <i>E. Bruch, S. Grilli</i>	329
Coupled Boundary Element Method for Salt-Water Wedge Diffusion <i>M. Kanoh, N. Tosaka and T. Kuroki</i>	343
A Solution of Darcy's Flow with Variable Permeability by Means of BEM and Perturbation Technique <i>R. Rangogni</i>	359
An Efficient Boundary Element Formulation for Zoned Porous Media Problems with Free Surfaces <i>D. Ouazar, A. Namli, A. Saidi and C.A. Brebbia</i>	369
<b>FLUID MECHANICS</b>	
The Application of Boundary Element Techniques to Dynamic Fluid Flow ( <i>Invited contribution</i> ) <i>P.H.L. Groenenboom</i>	389
Natural Convection Flow Problems by BEM ( <i>Invited contribution</i> ) <i>P. Skerget, A. Alujevic, G. Kuhn and C.A. Brebbia</i>	401
A Boundary Element Method for Viscous Flows at Low Reynolds Number <i>C.V. Camp, G.S. Gipson</i>	419
Characteristics and Boundary Elements for Navier Stokes Flows <i>F.K. Hebecker</i>	433
Flow Through a Cascade <i>D.B. Ingham, M.L. Hildyard and P.J. Heggs</i>	443
Viscous Flow Analysis Including Thermal Convection <i>K. Kitagawa, C.A. Brebbia, L.C. Wrobel and M. Tanaka</i>	459
Second Kind Integral Equation Solution of Stokes Flows Past n Bodies of Arbitrary Shapes <i>H. Power</i>	477

Numerical Simulations of Laminar and Turbulent Flows by Using an Integral Equation 489  
*N. Tosaka, K. Kakuda*

Coupling of the Integral Equation for the Potential Flow with the Boundary Layer Equations on a Prolate Spheroid 503  
*H. Schmitt, G.R. Schneider*

## **AERODYNAMICS**

The Panel Method – A Unique Tool for the Aerodynamic Analysis of Complex Configurations in Subsonic and Supersonic Flow 519  
*(Invited contribution)*  
*S.N. Wagner*

Conformal Transformation in Boundary Element Methods 539  
*(Invited contribution)*  
*J.C. Wu*

Transonic Airfoil Computation Using the Integral Equation With and Without Embedded Euler Domains 553  
*O.A. Kandil, H. Hu*

Boundary Element Methods in Two-Dimensional Transonic Flows 567  
*W. Ogana*

Determining of the Air Mass Matrix for Air-Supported Structures 583  
*R. Sygulski*

## **ELECTROMAGNETIC PROBLEMS**

Boundary Integral Equations and Instability of Resonances 591  
*(Invited contribution)*  
*P. Werner*

The Use of Boundary Element – Finite Element Coupling Method in Electrical Engineering 611  
*M. Burnet-Fauchez*

Coupled Boundary Integral and Analytical Solution for Electromagnetic Fields in Levitation 625  
*T.G. Phemister, A.H. Whitfield and A. Lowdon*

Three-Dimensional Eddy Current Analysis by Hybrid Finite Element and Boundary Element Method 635  
*T. Yamamura, T. Onuki, T. Yokoi and K. Hasegawa*
