

CONTENTS

SECTION 1 - INELASTIC PROBLEMS

INVITED PAPER

- Implicit Solution Techniques for Inelastic Boundary Element Analysis 3

J.C.F. Telles and J.A.M. Carrer

INVITED PAPER

- Structural Nonlinear Analysis by Boundary Element Methods 17

N. Kamiya

INVITED PAPER

- Viscous Extrusion Problems 29

M.B. Bush

- Boundary Element Method for Three Dimensional Extrusion 45

T. Tran-Cong and N. Phan-Thien

- The Elastic-Plastic Analysis of Dual-Phase Steel by Boundary Element Method 61

H. Shen and D. Qiao

- Modelling of Metal Forming by the Boundary Element Method 71

I. Potrc, A. Alujevic and G. Kun

- Elasto-Plastic-Cracking Analysis of Reinforced Concrete Structures using Boundary Element Method 79

C. Channakeshava, N. Gopala Rao,

K.T. Sundara Raja Iyengar and B.K. Ranghu Prasad

INVITED PAPER

- Dual Reciprocity Process Applied to Solve Bending Plates on Elastic Foundations 95

N.A. Silva and W.S. Venturini

- Boundary Element Algorithm to Solve Discontinuity Problems 107

F.S. Rocha and W.S. Venturini

- BEM Dynamic Analysis of Materially Nonlinear Problems 119

D.P.N. Kontoni and D.E. Beskos

INVITED PAPER	
Some Boundary Integral Approaches to the Flow of Elastic Fluids	133
<i>C.J. Coleman</i>	
Direct B.E.M. Solution of Low Reynolds Number 2-D Flow in Infinite Viscous Media	141
<i>M. Kelmanson</i>	
SECTION 2 - FRACTURE MECHANICS	
INVITED PAPER	
From Rags to Riches? - Developments in the BEM for the Solution of Elastic Fracture Problems	155
<i>R.N.L. Smith</i>	
INVITED PAPER	
Boundary Element Analysis of a Strip Yield Crack at a Hole	177
<i>D.J. Cartwright and M.H. Aliabadi</i>	
Multi-Domain Boundary Element Modelling of Crack Closure Problems	185
<i>G. Karami</i>	
Three-Dimensional Weight Functions for a Cracked Bar	195
<i>M.H. Aliabadi, D.P. Rooke and D.J. Cartwright</i>	
INVITED PAPER	
Cracks with Frictional Surfaces: A Boundary Element Approach	211
<i>A.P.S. Selvadurai and M.C. Au</i>	
An Elastic Analysis of Three Dimensional Crack by Combination of Finite Elements and Boundary Elements	231
<i>Z. Cen, H. Zhu and Q. Du</i>	
A Coupling of Boundary Elements and Singular-Integral Equations for the Solution of the Fatigue Cracked Body	239
<i>S-T. Tu and R-Y. Cai</i>	
INVITED PAPER	
On the use of Strongly Singular Integral Equations for Crack Problems	249
<i>T.J. Rudolphi, G. Krishnasamy, L.W. Schmerr and F.J. Rizzo</i>	

Singular Integral Equation Method for Cracks Embedded in Poroelastic Space 265
A.H-D. Cheng, T. Badmus and E. Detournay

A Different Approach to 2-Dimensional Boundary Element Method in Orthotropic Linear Elasticity Theory 279
A. Kreis

A Boundary Element Method Formulation for Elastoplastic Contact Problems 293
G. Karami

SECTION 3 - CONTACT PROBLEMS

INVITED PAPER

Friction Multicontact Problems with B.E.M. 305
F. Paris and J.A. Garrido

A Three Dimensional Boundary Element Formulation for Thermo-Elastohydrodynamic Contact Problems 321
A. Gakwaya

INVITED PAPER

On B.E.M. Solutions of Elastic Frictionless Contact Problems 337
A. Tralli, C. Alessandri and S. Alliney

Analysis of Contact Problems in Elastic Bodies using a B.E.M. Flexibility Approach 353
S. Takahashi and C.A. Brebbia

An Alternative Analysis of Clamped Elastic Plates using BEM 381
G. Turoutsev

Analytic Integration Procedures for Plate Bending Analysis 391
A. Abdel-Akher and G.A. Hartley

SECTION 4 - PLATE BENDING

INVITED PAPER

Kirchhoff Plates 409
F. Hartmann

Analysis of Thick Plates by Three-Dimensional Boundary Elements 425
T.Q. Ye and D. Zhang

Large Deflections of Thin Plates by the Boundary Element Method 435
J.T. Katsikadelis and M.S. Nerantzaki

A Mixed Boundary Integral–Finite Difference Approach to Plate Buckling Problems 457
M. Jin

Boundary Point Collocation Method for the Vibration of a Mindlin Thick Plate 465
M.M. Akkari and J.R. Hutchinson

SECTION 5 - DESIGN SENSITIVITY AND OPTIMIZATION

INVITED PAPER
Optimization Techniques and Boundary Element Method 479
M. Defourny

INVITED PAPER
Shape Optimization by Using B.E.M. 491
L. Gracia and M. Doblare

Shape Design Sensitivity Analysis using the Boundary Element Method 515
Z. Zhao and R.A. Adey

The Optimization of a Shell Structure 533
Kuan-Chen Fu and Awad Harb

SECTION 6 - APPLICATIONS

INVITED PAPER
Mechanical Aspects in the Formulation of Elastostatic Problems as Boundary Integral Equations 547
U. Heise

The Application in Engineering and Computational Technique of 3-Dimensional Boundary Element 571
B. Hua, Z. Mao and H. Xiong

INVITED PAPER
Specifications for a Useful Boundary Element Analysis Tool 579
for Industry
A. Wanderlingh

The Treatment of Thermoelastic Problems with Concentrated 591
and Distributed Heat Sources
S.M. Niku and C.A. Brebbia

Stress Analysis of an Aircraft Fitting using BEASY 601
M.Z. Mannan

SECTION 7 - COMPUTER CODES

INVITED PAPER
From Program EITD to Software CA.ST.OR 3D : Ten Years of 623
Developments in the Three-Dimensional Boundary Element
Method
A. Chaudouet-Miranda

BECOUP - A Program for Coupled Boundary and Finite Element 639
Analysis in 3-D Elasto-Statics
J.L. Meek and B. Bandyopadhyay

Quadratic Isoparametric Boundary Elements: An Implementation 657
on the ICL DAP
A.J. Davies

Boundary Element Method - Improved Technique for 667
Microcomputers
T.T. Al-Shemmeri and P.L. Betts

Developing a Personal Computer Based Boundary Element Code 675
for Coupled Three-Dimensional Fluid-Structure Problems
R.D. Ciskowski and L.H. Royster
