

CONTENTS

PREFACE

SECTION 1 - FUNDAMENTALS

Application of the Generalized Boundary Element Method to Nonlinear Problems 3
Nobuyoshi Tosaka

Domain and Boundary Approach in BEM Thermoelasticity 13
G. Karami

A General Boundary Integral Formulation for the Numerical Solution of
Bending Multilayer Sandwich Plates 25
G. Davi

Green's Functions for Inhomogeneous Media for Boundary Elements 37
Gautam Dasgupta

A New Hybrid Displacement Variational Formulation of BEM for Elastostatics 47
T.G.B. DeFiguereado and C.A. Brebbia

On Two Different Methods for Transforming Domain Integrals to the Boundary 59
C.A. Brebbia

SECTION 2 - ADAPTIVE TECHNIQUES, ERROR AND CONVERGENCE

Absolute p-Refinement of Boundary Elements for Two-Dimensional Elasticity
Problems 77
Timothy J. Urekeu and Joseph J. Rencis

An h-p Version of BEM for Plane Mixed Boundary Value Problems 95
B.Q. Guo, T. von Petersdorff and E.P. Stephan

Further Developments on Error Indicators and Estimators for Adaptive Hierarchical Boundary Elements <i>Pedro Parreira</i>	105
On the Accuracy of Boundary and Finite Element Techniques for Crack Problems in Fracture Mechanics <i>A. Portela and M.H. Aliabadi</i>	123
Multilevel Solution Methods and Automatic Node Moving for the Boundary Element Method <i>W.S. Hall and T.T. Hibbs</i>	139
Numerical Error Estimates for the Three-Dimensional Boundary Element Method <i>S.H. Crook and R.N.L. Smith</i>	153
<i>A Posteriori</i> Error Estimates for Linear and Quadratic Boundary Element Formulations <i>Joseph J. Rencis and Kwo-Yih Jong</i>	163
SECTION 3 - NUMERICAL METHODS	
An Integration Method for Two-Dimensional Potential Problems Over Curvilinear Geometries <i>C.V. Camp and G.S.. Gipson</i>	181
Analytical Integration of the Fundamental Solution $1/R$ Over Panel Boundary Element <i>R. Rangogni</i>	195
Numerical Integration of Kernel Shape Function Products for Singular Boundary Elements <i>J.Q. Zhen and D.J. Cartwright</i>	201
Treatment of Corner Node Problems in Boundary Element Method <i>Geng Yan and Feng-Bao Lin</i>	215
Accurate Integration of Singular Kernels in Boundary Methods <i>M. Cerrolaza, E. Alarcón and J. Molina</i>	227

SECTION 4 - COMPUTATIONAL ASPECTS

Numerical Experiments with a Boundary Element Technique for Corners <i>L.J. Gray</i>	243
Boundary Elements with Macro Shape Functions <i>Gautam Dasgupta</i>	253
Iterative Solvers for BEM Systems of Equations <i>F.C. Araújo and W.J. Mansur</i>	263
Semianalytic Boundary Element Solution of Time Dependent Partial Differential Equations <i>M.M. Aral and Y. Tang</i>	275
