

CONTENTS

PREFACE

SECTION 1 - POTENTIAL PROBLEMS

- An Effective Solution of the Numerical Problems at Multi-Domain Points for Anisotropic Laplace Problems 3
E. Bruch and A. Lejeune
- Singularity in Darcy Flow Around a Cutoff Wall 15
Jeng-Tzong Chen and Hong-Ki Hong
- Radioisotope Diffusion in Grain Textures by the Boundary Element Method 27
Z. Rek, I. Zagar, A. Alujevic and P. Skerget
- Boundary Element Analysis of Quasilinearised Infiltration 37
A.J. Pullan and I.F. Collins

SECTION 2 - THERMAL STUDIES

- Boundary Approximation Methods for Solving Singularity Problems 65
Z.C. Li and Rudolf Mathon
- Three-Dimensional Buoyancy Driven Flows in Inclined Cylinders 71
G. Kuhn, P. Skerget, A. Alujevic and I. Zagar
- The Multiple Reciprocity Method of Solving Transient Heat Conduction Problems 81
A.J. Nowak
- On the Application of a Combined Finite Element Boundary Element Method for Thermal Analysis 95
J.L. Wearing, M.A. Sheikh and S. Noroozi

Efficiency of Heat Transfer on Extended Surfaces by the Boundary Element Method 107
B. Namestnik, D. Beader, P. Skerget and A. Alujevic

Modelling 3D Band Thermal Radiation Problems in Cavities Using BEM 117
R. Bialecki

Heat Transfer in Cracked Nuclear Fuel Pellets by Boundary Elements 137
I. Zagar, Z. Rek, A. Alujevic and P. Skerget

SECTION 3 - ELECTRICAL AND ELECTROMAGNETIC PROBLEMS

Boundary Element Modeling of Galvanic Corrosion in Non-Homogeneous Electrolytes 149
Juan C. Ortiz and G. Steven Gipson

Coupled Two and Three Dimensional BEM Calculation of Self Capacitance Effects in Planar Resistors 161
Stefaan N. Demurie and Gilbert De Mey

Edge Effect of Strip Capacitors by the Boundary Element Method 173
Hitoshi Nishiyama and Mitunobu Nakamura

Magnetic Field Analysis by the Boundary Element Method Using Vector Potential 185
Hajime Tsuboi, Motoo Tanaka and Takayoshi Misaki

Optimal Design Technique for Magnetic Field Problems using Hybrid Finite-Boundary Element Method and Mathematical Programming Method 195
A. Ishiyama, H. Amano and T. Onuki

On Approximation of Nonlinear Boundary Integral Equations for the Combined Method 207
M. Greguš, B.N. Khoromsky, G.E. Mazurkevitch and E.P. Zhidkov

SECTION 4 - WAVE PROPAGATION

Error and Stability of Numerical Solution of Time Marching Boundary Element Method in Wave Problems 221
Takuo Fukui and Kouji Tani

Dual Reciprocity Boundary Element Formulation for Transient Elastic Wave Propagation Analysis in Infinite Domains <i>C.F. Loeffler and W.J. Mansur</i>	231
Computation of Wave Transformation in Finite Region <i>Kazumasa Mizumura</i>	241
The Modelling of Nonlinear Water Wave Interaction with Maritime Structures <i>Stéphan Grilli and Ib A. Svendsen</i>	253
The Modelling of Highly Nonlinear Waves: Some Improvements to the Numerical Wave Tank <i>Stéphan Grilli and Ib A. Svendsen</i>	269
The Long Time Behaviour of a Vectorized Boundary Element Code for Water Wave Problems <i>A. Nachbin and G.C. Papanicolaou</i>	283
 SECTION 5 - ACOUSTICS 	
Using the Boundary Element Method to Investigate Internal Earmuff-Earcanal Resonances <i>K.M Mourad, L.H. Royster and R.D. Ciskowski</i>	297
The Application of a Coupled Finite-Element Boundary-Element Technique to Large-Scale Structural Acoustic Problems <i>H.A. Schenck and G.W. Benthien</i>	309
Element and Eigenfunction Expansion Forms for an Embedding Integral Equation Approach to Acoustics <i>Richard Paul Shaw and S.C. Huang</i>	319
Boundary Element Analysis of Structural-Acoustic Problems with Complicated Boundary Conditions <i>S. Suzuki</i>	341
The Use of the Boundary Element Method to Quantify the Radiation Efficiency of Acoustic Sources <i>K. Cunefare, G.H. Koopmann and J.K. Brod</i>	355

Computing Acoustic Design Sensitivity Information using Boundary
Element Methods 369
David C. Smith and Robert J. Bernhard

Boundary Element Analysis of Acoustic Radiation and Scattering from
Elastic Bodies 385
A.F. Seybert and T.W. Wu

A New Numerical Method for Fluid-Structure Interaction Problems 399
Jalel Ben Mariem and Mohamed Ali Hamdi

SECTION 6 - FLUID FLOW

A Hybrid Boundary - Finite Element Method for Axisymmetric Inviscid
Flows 419
N. Pelekasis, J.A. Tsamopoulos and G.D. Manolis

Classical Potential Theory: a Tool for Solving the Evolution of Radial
Fingering in a Hele-Shaw Cell 433
Henry Power

Application of Vortex Shedding Method to Oscillatory Flow 445
Kazumasa Mizumura

Updating Boundary Element Mesh Coordinates using Finite Element
Integration in Transient Free-Surface Flow 451
S.A. Stothoff and G.F. Pinder

Boundary Element Solutions for Diffusive Transport 463
M. Kanoh, T. Kuroki, K. Onishi and T. Ueda

Boundary Element Methods in Three-Dimensional Transonic Flows 473
W. Ogana
