

CONTENTS

PREFACE

SECTION 1 - ADVANCES IN LINEAR PROBLEMS

- Application of the Boundary Element Method to Generalized Coupled Thermoelasticity Problems 3
Ill-gyo Suh and Nobuyoshi Tosaka
- A Boundary Element Procedure for Plane Elasticity based on Cauchy's Integral Formula 15
R. Piltner and R.L. Taylor
- Hybrid Stress Analysis of Boundary and Finite Elements by Super-Element Method 27
K. Kohno, T. Tsunada, H. Seto and M. Tanaka
- A BEM-Like Method Fully Integrated in Structural Analysis Formulations 39
Manuel de Azeredo

SECTION 2 - NONLINEAR PROBLEMS

- A Boundary Element Method Formulation for Fractional Operator Modeled Viscoelastodynamic Structures 55
Ke-jun Xie, Larry H. Royster and Robert D. Ciskowski
- Variational Theorems in Elastoplastic Boundary Element Analysis 65
J.A. Teixeira de Freitas

SECTION 3 - FRACTURE MECHANICS

- Stress Intensity Factor Weight Functions for Cracks at Holes and Half-Plane 83
M.H. Aliabadi, D.J. Cartwright, D.W. Naehring, W.A. Doney
- Scattering from an Elliptic Crack by the Time-Domain Boundary Integral 99
Equation Method
S. Hirose
- Stress and Stress Intensity Factor Analysis in Cracked Elastic Bars under 111
Torsion by Boundary Element Method
B. Štok and B. Bukovec
- A New Procedure for Calculating Three-Dimensional Stress Intensity Factors 123
using Boundary Elements
M.H. Aliabadi and D.P. Rooke

SECTION 4 - CONTACT MECHANICS

- Three Dimensional Conforming Frictionless Contact using BEM 135
J.A. Garrido, A. Foces and F. Paris
- Boundary Element Stress Analysis Involving Contact Using BEASY 151
R.A. Adey and S.M. Niku
- A Boundary Element and Mathematical Programming Approach for Frictional 163
Contact Problems
A. Gakwaya and D. Lambert

SECTION 5 - OPTIMIZATION PROBLEMS

- Defect Shape Identification by Means of Elastodynamic Boundary Element 183
Analysis and Optimization Technique
Masataka Tanaka, Masayuki Nakamura and Takashi Nakano

Shape Optimization - A Numerical Consideration <i>Zhiye Zhao and R.A. Adey</i>	195
---	-----

SECTION 6 - GEOMECHANICS

An Application of FEM/BEM Coupling to Foundation Analysis <i>T. Messafer and L.E. Coates</i>	211
---	-----

Application of the Boundary Element Method for Monitoring Underground Cavities <i>K. Saleh, G. Ballivy, D. Boudignon and F. Charette</i>	225
---	-----

SECTION 7 - PLATES AND SHELLS

Finite Deflection Analysis of Plates by Dual Reciprocity Boundary Elements <i>Y. Sawaki, K. Takeuchi and N. Kamiya</i>	239
---	-----

Further Developments of Boundary Element Formulation for Zoned Domain Problems <i>W.S. Venturini</i>	251
---	-----

High-Order Elements for the BEM Stability Analysis of Imperfect Plates <i>A. Elzein, S. Syngellakis</i>	269
--	-----

A BEM Solution to Dynamic Analysis of Plates with Variable Thickness <i>J.T. Katsikadelis and E.J. Sapountzakis</i>	285
--	-----

Boundary Element Analysis of Shallow Spherical Shell Bending Problems describing with Displacement Vector Components <i>Shahei Miyake, Hiromi Yamazaki, Kazuto Yokayama and Nobuyoshi Tosaka</i>	303
---	-----

SECTION 8 - VIBRATIONS

Time Domain Boundary Elements: a Comparative Study <i>José Domínguez and Rafael Gallego</i>	319
--	-----

A New Boundary Element Formulation for Transient Elastodynamic Problems with Damping Based on Time-Stepping Schemes 331
Masataka Tanaka and Toshiro Matsumoto

Scalar Wave Propagation - Calculation Capabilities of a 3D Time Domain Boundary Element Method 343
H. Antes and Th. Meise

Kinematic and Inertial Soil-Structure Interaction by Time Domain BEM 359
Dimitris L. Karabalis and Chu-Feng D. Huang

SECTION 9 - INDUSTRIAL APPLICATIONS

Determination of the Maximum Thread Stress in Threaded Structures Using the Boundary Element Method 377
A. Wanderlingh

Computer Interaction and the CVBEM in Engineering Design 393
Theodore V. Hromadka II

Three-Dimensional Boundary Element Analysis with Automated Solid Modeling System 405
Junta Doi, Kou Fujimata and Tetsuo Miyake

BEASY: an Analysis Tool for Design Engineers 417
Shan Nageswaran and C.A. Brebbia

BEASY used for Optimization of Rotor Stress 435
Paul R. Hearn
