Preface
Committees

MATHEMATICAL ASPECTS 1

Heat Conduction Analysis Using Single Layer Heat Potential
K. ONISHI 3

A Variational Approach to Boundary Element Methods
C. POLIZZOTTO & M. ZITO 13

BEM Formulations for Body Forces Using Particular Integrals
P.K. BANERJEE & D.P. HENRY 25

NUMERICAL ASPECTS 35

The Error Estimation of the Boundary Element Method on the Multi-regional and Non-linear Potential Problems
T. TAKEDA & T. KUWAHARA 37

The Use of Continuous Finite Elements in Electron Optics
R. PUSENJAK & M. OBLAK 47

Comparison of the Boundary Collocation and the Boundary Element Methods
J.A. KOLODZIEJ & G. MUSIELAK 53

Efficient Numerical Integration for Boundary Integral Methods in Two-dimensional and Axisymmetric Potential Problems
H. TSUBOI & Y. ASATOMI 63

Improved Galerkin Methods for Integral Equations on Polygons and Polyhedral Surfaces
E.P. STEPHAN 73

A Self-adaptive Boundary Element Technique for 2-D Potential Analysis
J.J. RENCIS & K.-Y. JONG 81

BEASY - An Advanced Boundary Element Analysis System
H. MIZOGUCHI, C.A. BREBBIA & R. ADEY 91

POTENTIAL PROBLEMS 103

An Analysis of the Axisymmetric Modified Helmholtz Equation by Using the Boundary Element Method
M. TSUCHIMOTO, T. HONMA, A. YONETA, S. TANAKA & K. MIYA 105

ELASTICITY 115

Application of Advanced BEM Code to Three-dimensional Stress Analysis and Fracture Mechanics Analysis
T.A. CRUSE & S.T. RAVEENDRA 117

BIEM for Crack Problems and Application to the Fracture Process Zone in Concrete, Ceramics and Rock
H. HORII 129

A Fundamental Solution and Boundary Element Method for Torsion Problems of a Bonded Dissimilar Elastic Solid
H. HASEGAWA 139

3D-BEM Analysis of Surface Cracks by Supercomputer
T. MIYOSHI & M. SHIRATORI 149

Boundary Integral Equation of a Three-dimensional Semi-infinite Crack
F.G. BENITEZ & A.J. ROSAKIS 159

Boundary Element Analysis of the Elastic Contact Problem by a Penalty Function Method
K. YAMAZAKI & M. MORI 169

Boundary Element Analysis of the Stress Intensity Factors for an Interface Crack in Dissimilar Materials
R. YUUKI & S.-B. CHO 179

Fracture Mechanics Research Using the Surface Integral and Finite Element Hybrid Methods
B.S. ANNIGERI, W.D. KEAT & M.P. CLEARY 191

ELASTOPLASTICITY 203

Accurate Boundary Element Analysis of Two-dimensional Elasto-plastic Problems
T. MATSUMOTO & R. YUUKI 205

Symmetric Formulation of an Indirect Boundary Element Method for Elastic-plastic Analysis and Relevant Extremum Properties
G. MAIER, G. NOVATI & S. SIRTORI 215

ELASTODYNAMICS 225

Hypersingular Integral Formulas and Wave Scattering with the Boundary Element Method
G. KRISHNASAMY, T.J. RUDOLPHI, L.W. SCHMERR & F.J. RIZZO 227

On a Method to Analyze Scattering Problems of an Inclusion with Spring Contacts
M. KITAHARA, K. NAKAGAWA & J.D. ACHENBACH 239

Elastodynamic Crack Analysis by BIEM
N. NISHIMURA, Q.C. GUO & S. KOBAYASHI 245

Application of BEM to Transient Analysis of a 3-D Crack
S. HIROSE & J.D. ACHENBACH 255

Wave Propagation Analysis for the Ground with Dipping Interface and Semi-Infinite Layers using a Combined Boundary Element and Finite Element Method
S. AKIYAMA, S. NAKAMURA & N. YOSHIDA 265

FLUID MECHANICS 275

Boundary Element Method for Salt Water Wedge Diffusion
M. KANOH, T. KUROKI, G. ARAMAKI & K. ONISHI 277

Three-dimensional Analysis of a Fresh Water Lens in an Island
T. FUKUI, T. FUKUHARA & T. FURUICHI 285

Boundary Element Solution of a Three-dimensional Convective Diffusion Equation for Large Peclet Numbers
Y. TANAKA & T. HONMA 295

The Generalized Boundary Element Approach for Viscous Fluid Flow Problems
K. KAKUDA & N. TOSAKA 305

AERODYNAMICS 315

Rotary Wing Aerodynamics Research at UTRC Using the Boundary Element Method
K. TSENG 317

A Potential-Vorticity Decomposition for the Analysis of Viscous Flows
L. MORINO & P. BEAUCHAMP 325

ELECTROMAGNETICS & ACOUSTICS 335

Discretization Error in the 3-D Surface Charge Method
Y. KUNO, A. YAGI & Y. UCHIKAWA 337

Hybrid Boundary Element and Finite Element Analysis of Eddy Current Problems
T. ONUKI & H. SHIMAMOTO 347

Doubly Asymptotic Approximations for Electromagnetic Scattering Problems
T.L. GEERS & P. ZHANG 357

Boundary Element Vocal Tract Models and their Acoustic Characteristic
T. YAMABUCHI, T. TAKARADA, T. MURAI & K. KAGAWA 371

OPTIMIZATION 381

uoundary Element Synthesis for Shape Modification Based on First-order Sensitivities
S. NAKAGIRI & K. SUZUKI 383

Structural Optimization by an Adaptive Boundary Element Method
N. KAMIYA & E. KITA 393

On Shape Optimization Study with Automatic Mesh Division of Two-dimensional Bodies by BEM
Y. MIYAMOTO, S. IWASAKI, H. DETO & H. SUGIMOTO 403

Optimal Design Technique for Magnetostatic Fields
A. ISHIYAMA, T. YOKOI & T. ONUKI 413

A Boundary Element Formulation for Design Sensitivities in Materially Nonlinear Problems
S. MUKHERJEE & A. CHANDRA 423

INVERSE PROBLEMS 433

A Boundary Element Approach to some Inverse Problems in Elastodynamics
M. TANAKA, M. NAKAMURA & K. YAMAGIWA 435

An Inverse Method for the Reduction of Stress Concentration in the Two-dimensional Elastic Problem
H. KAWABE, H. MANO & M. BESSHO 445

Boundary Element Analysis of the Inverse Problem in Galvanic Corrosion
K. KISHIMOTO, H. MIYASAKA & S. AOKI 453

Experimental Determination of the Thermal Properties of Carbon Steel with the Aid of Boundary Element Methods
J. KIHARA, T. AIZAWA & K. TANEDA 463

NON-LINEAR PROBLEMS 473

On the Consideration of Finite Strain Analysis by Boundary Element Methods
T. AIZAWA & J. KIHARA 475

Bifurcation Analysis for Thin Elastic Bodies by Using an Integral Equation Method
S. MIYAKE & N. TOSAKA 483

Boundary Element Methods and Nonlinear Problems
N. TOSAKA 491

Uplift and Slippage of 3-D Rigid or Flexible Surface Foundations Using a Direct Time Domain BEM-FEM
D.L. KARABALIS & A.P. GAITANAROS 501

WAVE PROPAGATION 511

Scattering of Plane P and SV Waves by Topographical Irregularities Using 2-D Time Domain BEM
M. OHMI & N. TOSAKA 513

An Investigation of Wave Propagation in Viscoelastic Media Modeled by Fractional Derivative Using the Boundary Element Method
K.-j. XIE, R.D. CISKOWSKI & L.H. ROYSTER 523

COUPLED PROBLEMS 533

Boundary Element Analysis of Linear Coupled Thermoelasticity Problems by Using Laplace Transformation
I.-g. SU & N. TOSAKA 535

Boundary Element Solution to Predict Transient Response of a 3-D Coupled Fluid Cavity-Elastic Structure System
R.D. CISKOWSKI & L.H. ROYSTER 545

Author Index 555
