

## CONTENTS

Preface	v
Contents	vii
(1) Computational methods for local singularities, <i>J.E. Akin</i>	1
(2) Eulerian and Lagrangian techniques for elastic and inelastic large deformation processes, <i>J.H. Argyris, J. St. Doltsinis, W.C. Knudson, J. Szimmat, K.J. Willam and H. Wüstenberg</i>	13
(3) Reliable error estimation and mesh adaptation for the finite element method, <i>I. Babuska and W.C. Rheinboldt</i>	67
(4) Large displacement calculations of flexible pipe-lines by finite element and non-linear programming methods, <i>J.F. Bourgat, J.M. Dumay and R. Glowinski</i>	109
(5) Multistep methods for quasilinear parabolic equations, <i>J.H. Bramble</i>	177
(6) Derivation of nonlinear plate models from three-dimensional elasticity, <i>P.G. Ciarlet</i>	185
(7) Three-dimensional finite element analysis including material and geometric nonlinearities, <i>C.S. Desai and H.V. Phan</i>	205
(8) The numerical simulation of miscible displacement in porous media, <i>J. Douglas, Jr.</i>	225
(9) Wave propagation in fine periodic structures, <i>G. Duvaut</i>	239
(10) On mixed finite element methods for a class of nonlinear boundary value problems, <i>G.J. Fix, R.A. Nicolaides and M.D. Gunzberger</i>	245
(11) On finite element methods in shallow water long wave flow analysis, <i>M. Kawahara</i>	261
(12) On a mixed finite element scheme for linear buckling analysis of plates, <i>F. Kikuchi</i>	289

(13) Some computational aspects of elastic-plastic large strain analysis, <i>J.C. Nagtegaal and J.E. de Jong</i>	303
(14) Finite element approximations for free boundary problems, <i>J.A. Nitsche</i>	341
(15) Analysis of mixed methods using mesh dependent spaces, <i>J.E. Osborn</i>	361
(16) A numerical method for shallow water motion onto a beach, <i>C.E. Pearson</i>	379
(17) A finite deformation formulation for elasto/viscoplastic beam structures, <i>P.M. Pinsky and R.L. Taylor</i>	393
(18) On the finite element approximation of nonlinear problems, <i>P.A. Raviart</i>	413
(19) Lipschitz constants and robust ODE codes, <i>L.F. Shampine</i>	427
(20) The quasi-Newton method in finite element calculations, <i>G. Strang</i>	451
(21) Long-time predictions in nonlinear dynamics, <i>V. Szebehely</i>	457
(22) A new algorithm for the numerical solution of nonlinear parabolic partial differential equations, <i>D.H. Tang and G.F. Pinder</i>	463
(23) Mathematical problems in plasticity, <i>R. Temam</i>	475
(24) Interior penalty Galerkin procedures for miscible displacement problems in porous media, <i>M.F. Wheeler and B.L. Darlow</i>	485
(25) Numerical solution of a two dimensional coupled viscous flow/heat transfer problem, <i>J.R. Whiteman and D. Harrison</i>	507
(26) The Ritz procedure and its extension in finite element analysis, <i>Y. Yamamoto</i>	519
