CONTENTS

Preface v
Conference Organising Committee vii
The Computational Mathematics Group ix
Acknowledgments xi

INVITED PAPERS 1

RECENT DEVELOPMENTS IN THE FINITE ELEMENT METHOD 2
A.R. Mitchell
University of Dundee, Dundee, Scotland

THE CHANGING SCENE IN COMPUTATIONAL FLUID DYNAMICS 15
M. Holt
University of California, Berkeley, California, U.S.A.

THE SIMULATION OF TIME DEPENDENT PROBLEMS USING BOUNDARY ELEMENTS 31
C.A. Brebbia
University of Southampton, Southampton, England

FINITE DIFFERENCE METHODS FOR FLUID FLOW 51
R.W. Davis
National Bureau of Standards, Washington D.C., U.S.A.

MATHEMATICAL ANALYSIS AS THE FOUNDATION FOR SUCCESSFUL COMPUTATION 70
R.S. Anderssen
CSIRO Division of Mathematics & Statistics, Canberra, Australia

COMPUTATION IN INDUSTRY: ACHIEVEMENTS & POTENTIAL 91
A.O. Currie
Compumod Pty. Ltd., Sydney, Australia

FINITE DIFFERENCE METHODS 105

THIRD-ORDER UPWINDING AS A RATIONAL BASIS FOR COMPUTATIONAL FLUID DYNAMICS 106
B.P. Leonard
City University of New York, Staten Island, U.S.A.

GENERALIZED VARIABLE GRID SIZE METHODS WITH APPLICATION TO THE DIFFUSION EQUATION 121
R. Braddock
Griffith University, Queensland, Australia
B.J. Noye
University of Adelaide, Adelaide, South Australia

THE NUMERICAL SOLUTION OF PARTIAL DIFFERENTIAL EQUATIONS USING THE METHOD OF LINES 139
N.G. Barton
CSIRO Division of Mathematics & Statistics, Lindfield, Australia

ADE METHODS FOR THE SOLUTION OF TWO-DIMENSIONAL PROBLEMS IN COMPUTATIONAL SOLIDIFICATION 151
R.S. Anderssen & B.A. Ellem
CSIRO Division of Mathematics & Statistics, Canberra, Australia

SOME ASPECTS OF THE NUMERICAL SOLUTION OF A STEADY STATE CONVECTION–DIFFUSION EQUATION 163
F. de Hoog & D. Jackett
CSIRO Division of Mathematics & Statistics, Canberra, Australia

A NEW METHOD OF DERIVING FINITE DIFFERENCE FORMULAS FOR ARBITRARY MESHES 173
S.K. Kwok
University of Western Australia, Nedlands, Australia

A NUMERICAL MODEL OF DROPLET FORMATION 182
L.E. Cram
CSIRO Division of Applied Physics, Sydney, Australia

FINITE ELEMENT METHODS 189

UPPER BOUND A-POSTERIORI ERROR ESTIMATES FOR THE FINITE ELEMENT METHOD APPLIED TO LINEAR ELASTICITY 190
D.W. Kelly & J. Donovan
University of New South Wales, Sydney, Australia

THE APPLICATION OF A FINITE ELEMENT PACKAGE TO ROAD VEHICLE AERODYNAMICS 207
P.D. Cenek
Ministry of Works & Development, Wellington, New Zealand
G.F. Fitz-Gerald & J.W. Saunders
Royal Melbourne Institute of Technology, Australia

GENERATION OF FINITE ELEMENT MESHES FROM NODAL ARRAYS 223
M.B. McGirr, D.J.H. Corderoy, P.C. Easterbrook & A.K. Hellier
University of New South Wales, Sydney, Australia

THE AUTOMATIC GENERATION OF ARRAYS OF NODES WITH VARYING DENSITY 229
M.B. McGirr & P. Krauklis
University of New South Wales, Sydney, Australia

THE PERFORMANCE OF AN AUTOMATIC, SELF-ADAPTIVE FINITE ELEMENT TECHNIQUE 236
M.B. McGirr, D.J.H. Corderoy, A.K. Hellier & P.C. Easterbrook
University of New South Wales, Sydney, Australia

ADAPTIVE TECHNIQUES IN FINITE ELEMENT ANALYSIS 241
A.D. Miller
Australian National University, Canberra, Australia

INCOMPRESSIBLE FLOW IN NOZZLES USING THE GALERKIN FINITE ELEMENT METHOD 256
T. Doan & R.D. Archer
University of New South Wales, Sydney, Australia

BOUNDARY INTEGRAL METHODS 263

BOUNDARY ELEMENTS IN FLUID MECHANICS 264
M.B. Bush
University of Sydney, New South Wales, Australia

THE EFFECT OF APPROXIMATING THE GEOMETRY FOR A SIMPLE BOUNDARY INTEGRAL EQUATION 277
W. McLean
Australian National University, Canberra, Australia

MESH GRADING FOR BOUNDARY INTEGRAL EQUATIONS 289
G.A. Chandler
University of Queensland, Brisbane, Australia

NUMERICAL INTEGRATION OF A SINGULAR INTEGRAL EQUATION 297
B.L. Karihaloo
The University of Newcastle, New South Wales, Australia

A HYBRID DISTINCT ELEMENT – BOUNDARY ELEMENT METHOD FOR SEMI-INFINITE & INFINITE BODY PROBLEMS 307
B.H.G. Brady & M.A. Coulthard
CSIRO Division of Geomechanics, Victoria, Australia
J.V. Lemos
University of Minnesota, Minneapolis, U.S.A.

THE GROWTH OF FINGERS BETWEEN TWO IMMISCIBLE FLUIDS IN A TWO-DIMENSIONAL POROUS MEDIUM OR HELE–SHAW CELL 317
M.R. Davidson
CSIRO Division of Mineral Physics, Sutherland, Australia

A BOUNDARY ELEMENT FORMULATION FOR DIFFUSER AUGMENTED WIND TURBINES 327
E. Zapletal & C.A.J. Fletcher
University of Sydney, New South Wales, Australia

NUMERICAL METHODS FOR MULTIDIMENSIONAL INTEGRAL EQUATIONS 335
I.G. Graham
University of Melbourne, Victoria, Australia

FAST CONVERGENCE OF THE ITERATED GALERKIN METHOD FOR INTEGRAL EQUATIONS 352
I.H. Sloan
University of New South Wales, Sydney, Australia

OCEANIC & ATMOSPHERIC PROBLEMS 359

WAVE PROPAGATION CHARACTERISTICS OF A NUMERICAL MODEL OF TIDAL MOTION 360
B.J. Noye
University of Adelaide, Adelaide, South Australia

AN IMPROVED THREE-DIMENSIONAL TIDAL MODEL FOR A SHALLOW GULF 375
M. Stevens & B.J. Noye
University of Adelaide, Adelaide, South Australia

VERIFICATION OF A THREE-DIMENSIONAL TIDAL MODEL FOR COASTAL SEAS 394
P.J. Bills & B.J. Noye
University of Adelaide, Adelaide, South Australia

AN APPLICATION OF A THREE-DIMENSIONAL TIDAL MODEL TO THE GULF OF CARPENTARIA 411
W.M. Mitchell, D.A. Beard, P.J. Bills & B.J. Noye
University of Adelaide, Adelaide, South Australia

ON THE PERFORMANCE OF TURBULENT ENERGY CLOSURE SCHEMES FOR WIND DRIVEN FLOWS IN SHALLOW SEAS 425
R.J. Arnold & B.J. Noye
University of Adelaide, Adelaide, South Australia

WAVE HINDCAST MODELLING FOR BASS STRAIT 438
D.R. Blackman & A.D. McCowan
Monash University, Victoria, Australia

MODELLING SEICHES 449
A.K. Easton
Swinburne Institute of Technology, Victoria, Australia

THE DEVELOPMENT OF A FINITE ELEMENT COMPUTER PACKAGE FOR ATMOSPHERIC DYNAMICS 461
K.J. Mann
Chisholm Institute of Technology, Victoria, Australia

VISCOUS FLOW 475

A GENERALISED COORDINATE TIME-SPLIT FINITE ELEMENT METHOD FOR COMPRESSIBLE VISCOUS FLOW 476
K. Srinivas & C.A.J. Fletcher
University of Sydney, New South Wales, Australia

FINITE ELEMENT ANALYSIS OF VISCOUS FLOWS 489
G.A. Mohr
University of Auckland, Auckland, New Zealand

A UNIFICATION OF FINITE ELEMENT APPROACHES FOR PRIMITIVE VARIABLE SOLUTIONS TO VISCOUS INCOMPRESSIBLE FLOWS 505
A.N.F. Mack
University of Sydney, New South Wales, Australia

TIME-SPLITTING & THE GROUP FINITE ELEMENT FORMULATION 517
C.A.J. Fletcher
University of Sydney, New South Wales, Australia

NUMERICAL SOLUTION OF THE PARABOLISED THREE DIMENSIONAL STEADY FLOW IN AXIALLY SYMMETRICAL PIPES 533
D. Yashchin, M. Israeli & M. Wolfshtein
Israel Institute of Technology, Haifa, Israel

THE EFFECT OF A SMALL BLOWING ON VORTEX-BREAKDOWN OF A SWIRLING FLOW 553
K. Karashima
Institute of Space and Astronautical Science, Tokyo, Japan
S. Kitama
National Space Agency of Japan, Tokyo, Japan

POROUS MEDIA, THERMAL PROBLEMS 565

NUMERICAL TECHNIQUES FOR ESTIMATING THE BEHAVIOUR OF UNSTABLE, IMMISCIBLE FLOW IN POROUS MEDIA 566
G.R.G. Woodham & D.F. Bagster
University of Sydney, New South Wales, Australia
W.V. Pinczewski
University of New South Wales, Sydney, Australia

FINITE ELEMENT APPROXIMATIONS OF UNIDIRECTIONAL NON-LINEAR SEEPAGE FLOWS 577
S.-S. Chow
Australian National University, Canberra, Australia

LINEAR MODELS FOR MANAGING SOURCES OF GROUNDWATER POLLUTION 591
S.M. Gorelick
U.S. Geological Survey, California, U.S.A.
S.-Å. Gustafson
Royal Institute of Technology, Stockholm, Sweden

NUMERICAL SOLUTION OF A FREE SURFACE DRAINAGE PROBLEM USING A VARIATIONAL INEQUALITY METHOD 597
J.H. Knight
CSIRO Division of Mathematics & Statistics, Canberra, Australia

THERMAL PROFILES FOR HIGH-LEVEL RADIOACTIVE WASTE BURIAL 604
J.M. Barry, P.C. Miskelly & J.P. Pollard
Australian Atomic Energy Commission, Sutherland, Australia

ON A FINITE DIFFERENCE METHOD OF PLANE THERMOELASTIC PROBLEM IN MULTIPLY-CONNECTED REGION EXHIBITING TEMPERATURE DEPENDENCIES OF MATERIAL PROPERTIES 615
Y. Sugano
University of Osaka Prefecture, Sakai, Osaka, Japan

TURBULENCE, ACOUSTICS, PLASMAS 625

APPLICATION OF THE DORODNITSYN BOUNDARY LAYER FORMULATION TO WALL BLOWING 626
R.W. Fleet & C.A.J. Fletcher
University of Sydney, New South Wales, Australia

DIRECT SIMULATION OF BURGULENCE 641
P. Orlandi & M. Briscolini
Università degli Studi di Roma "La Sapienza", Italy

MODELLING TURBULENT RECIRCULATING FLOWS IN COMPLEX GEOMETRIES 653
G.D. Tong
Computer Applications Centre, S.A. Institute of Technology

PRACTICAL SOLUTIONS OF THE PARABOLIC EQUATION MODEL FOR UNDERWATER ACOUSTIC WAVE PROPAGATION 669
D.J. Kewley, L.T. Sin Fai Lam & G. Gartrell
Department of Defence, Adelaide, South Australia

ACOUSTICAL RADIATION IN MOVING FLOWS: A FINITE ELEMENT APPROACH 685
R.J. Astley
University of Canterbury, Christchurch, New Zealand

NUMERICAL MODEL OF A TWO -FLUID FULLY IONIZED DENSE PLASMA 699
P. Lalousis
CSIRO Division of Applied Physics, Sydney, Australia
H. Hora
University of New South Wales, Sydney, Australia

SOLUTIONS OF ARC PLASMA DECAY WITH SELF-INDUCED RADIAL FLOW USING THE ORTHOGONAL COLLOCATION METHOD 709
H. Lee
CSIRO Division of Applied Physics, Sydney, Australia

FLUX-CORRECTED TRANSPORT ON A NON-UNIFORM MESH IN PLASMA BOUNDARY PROBLEMS 719
R. Morrow & L.E. Cram
CSIRO Division of Applied Physics, Sydney, Australia

SINGULAR FINITE ELEMENT METHODS IN PLASMA STABILITY COMPUTATIONS – A SIMPLE MODEL 730
R.L. Dewar
The Australian National University, Canberra, Australia
R.C. Grimm
Princeton University, Princeton, New Jersey, U.S.A.

DYNAMICS, STRUCTURES 741

SOLUTIONS OF SOME MIXED BOUNDARY PROBLEMS IN CONSOLIDATION THEORY 742
J.R. Booker & J.C. Small
University of Sydney, New South Wales, Australia

THE BEHAVIOUR OF A LINED CIRCULAR TUNNEL IN VISCOELASTIC GROUND 753
J.P. Carter & J.R. Booker
University of Sydney, New South Wales, Australia

COMPUTATIONAL IMPROVEMENTS OF THE DYNAMIC DEFORMATION METHOD 769
R. Kohoutek
University of Melbourne, Victoria, Australia

MACRO ELEMENTS FOR THE ANALYSIS OF BEAM–SLAB SYSTEMS 785
B.W. Golley & J. Petrolito
University of New South Wales, Duntroon, Australia

VIBRATION ANALYSIS OF A ROTATING BLADE USING DYNAMIC DISCRETIZATION 795
C. Norwood
Footscray Institute of Technology, Victoria, Australia

THE TIME SETTLEMENT BEHAVIOUR OF A RIGID RAFT SUBJECT TO MOMENT 803
J.C. Small
University of Sydney, New South Wales, Australia

A RELIABILITY-BASED OPTIMUM DESIGN COMPUTATIONAL TECHNIQUE FOR PLASTIC STRUCTURES 812
D.M. Frangopol
University of Colorado, Boulder, Colorado, U.S.A.

MISCELLANEOUS 825

AIRBLAST SIMULATION USING FLUX-CORRECTED TRANSPORT CODES 826
D.L. Book
Naval Research Laboratory, Washington, D.C., U.S.A.
M.A. Fry
Science Applications Inc., McLean, Virginia, U.S.A.

NUMERICAL SOLUTION OF EIGENVALUE PROBLEMS FOR ORDINARY DIFFERENTIAL EQUATIONS 841
A.L. Andrew
La Trobe University, Victoria, Australia

LINEAR PROGRAMMING METHODS FOR THE INVERSION OF DATA 853
R.S. Anderssen
CSIRO Division of Mathematics & Statistics, Canberra, Australia
S.-Å. Gustafson
Royal Institute of Technology, Stockholm, Sweden

COMPUTING THE FOLIAGE ANGLE DISTRIBUTION FROM CONTACT FREQUENCY DATA 863
D.R. Jackett & R.S. Anderssen
CSIRO Division of Mathematics & Statistics, Canberra, Australia

THE MARKOV CHAIN TECHNIQUE APPLIED TO THE SURVIVAL OF VEHICLES IN A MINEFIELD 873
I.S. Williams
Department of Defence, Canberra, Australia

THE NONLINEAR COOLING OF A SEMI-INFINITE SOLID – PADE APPROXIMATION METHODS 881
A.J. O'Connor
Griffith University, Queensland, Australia

COMPUTATIONAL ASPECTS ASSOCIATED WITH THE DIRECT USE OF INDIRECT MEASUREMENTS: REFRACTIVE INDEX OF BIOLOGICAL LENSES 893
R.S. Anderssen
CSIRO Division of Mathematics & Statistics, Canberra, Australia
M.C.W. Campbell
R.S. Phy. S.S., Canberra, Australia

PROBLEMS WITH DERIVED VARIABLE METHODS FOR THE NUMERICAL SOLUTION OF THREE-DIMENSIONAL FLOWS 903
J.A. Reizes, E. Leonardi & G. de Vahl Davis
University of New South Wales, Sydney, Australia

A HYBRID METHOD FOR SOLVING THE BOUNDARY VALUE PROBLEMS FOR HELMHOLTZ'S EQUATION IN TWO-DIMENSIONAL DOMAINS 914
A.P. Raiche & Z.K. Tarlowski
CSIRO Division of Mineral Physics, North Ryde, Australia

THE COMPUTATION OF AXISYMMETRICAL VORTEX SHEETS 927
W.K. Soh
University of Wollongong, New South Wales, Australia

EFFICIENT COMPUTATION OF THE MAGNETIC FORCES ACTING ON A CURRENT CARRYING COIL 938
P.M. Hart
Monash University, Victoria, Australia

COMPUTER SIMULATION OF COLD WORKING OF METALS 951
W. Thompson, K. Denmeade & S. Barton
Swinburne Institute of Technology, Melbourne, Australia

AN EXACT NUMERICAL ALGORITHM TO INVERT RATIONAL FRACTION LAPLACE TRANSFORMS 964
L. P. Travis
Swinburne Institute of Technology, Melbourne, Australia

ON THE PROBLEM OF A THROWN STRING 971
A.M. Watts
University of Queensland, Brisbane, Australia

CONFERENCE REGISTRANTS 976
