

## TABLE OF CONTENTS

Foreword	v
<b>Section 1 — Semiconductors</b>	
Some Aspects of Semiconductor Device Simulation R.K. Smith, W.M. Coughran, Jr., W. Fichtner, D.J. Rose, R.E. Bank	3
Numerical Simulation of III-V Semiconductor Devices M. Campana, E. Caquot, F. Hecht, A. Marrocco	13
Difference Methods for Transient Device Simulation C.A. Ringhofer	31
Theoretical and Numerical Problems in Reverse Biased Semiconductor Devices F. Brezzi	45
<b>Section 2 — Parallel and Vector Computing</b>	
Progress Report on our Experimentation with Parallel Supercomputers, LCAP 1 and LCAP 2 E. Clementi	61
Block Reflectors: Computation and Applications R.S. Schreiber, B.N. Parlett	71
Plasma Physics Modeling and the CRAY—2 Multiprocessor J. Killeen	81
<b>Section 3 — Software and Numerical Technics</b>	
Compact Structural Representation of Sparse Cholesky, QR and LU Factors A. George, J.W.H. Liu	93
Accurate Computation of the Matrix Exponential B.N. Parlett, K.C. Ng	107
Computation of Fractals as Fixed Points of Set-Theoretical Dynamical Systems M. Hata	117
Gas Transient Simulations with Spectral Methods A. Quarteroni	123

Vers un Système Expert pour l'Optimisation et l'Identification de Systèmes Dynamiques P. Chancelier, C. Gomez, J.P. Quadrat, A. Sulem	137
Fictitious Component and Domain Decomposition Methods for the Solution of Eigenvalue Problems Y.A. Kuznetsov	155
Domain Reduction and Asymptotic Boundary Conditions T. Hagstrom, H.B. Keller	173
Alternating-Direction Iteration for Mixed Finite Element Methods J. Douglas, Jr., R. Durán, P. Pietra	181
On the Phenomenon of Multiple Existence of Stable Equilibria — Coexistence of Stable Singularly Perturbed Solutions in Systems of Reaction-Diffusion Equations H. Fujii, Y. Nishiura	197
<b>Section 4 — Fluid Mechanics</b>	
About Difficulties Raised by a Refined Turbulence Modelling in a Navier-Stokes Finite Elements Code J. Goussebaile, J. Cahouet, P. Lasbleiz, A. Hauguel	215
Diffusion and Rosseland Approximation: Computation of the Critical Size C. Bardos, F. Golse, B. Perthame	233
Numerical Solution of Fluid Dynamic Equations Using Rational Runge-Kutta Methods N. Satofuka	249
Non-Reflecting Boundary Conditions for Compressible Navier-Stokes Equations S. Abarbanel, A. Bayliss, L. Lustman	261
FEM and BEM Applied to a Free Boundary Problem for Flows in a Blast Furnace M. Mori, M. Natori	275
A Numerical Approach for Solving a Free Boundary Problem of a Circulating Flow M. Shōji, H. Okamoto	287
Domain Decomposition Methods in Problems of Hydrodynamics V.I. Agoshkov	303
Shock-Tracking with the Large Time Step Method R.J. LeVeque	311
Separation Phenomena in 2D and 3D Numerical Solutions of the Euler Equations A. Rizzi	319

New Finite Element Methods for the Compressible Euler and Navier Stokes Equations T.J.R. Hughes, M. Mallet, L.P. Franca	339
Finite Elements for Compressible Gas Flow and Similar Systems O.C. Zienkiewicz, K. Morgan, J. Peraire, M. Vahdati, R. Löhner	361
<b>Section 5 — Combustion</b>	
Adaptive Numerical Investigations of Thermo-Diffusive Flames B. Larrouturou	377
Physical Aspects of Numerical Modelling of Flows with Combustion R. Borghi, H. Tichtinsky, M. Gonzalez	391
The Numerical Simulation of Industrial Combustion Events: Present Trade-Offs and Future Prospects S. Galant	405
<b>Section 6 — Turbulence</b>	
Subgrid-Scale Modeling for Turbulent Flows C. Basdevant	423
Recent Developments in Inhomogeneous Turbulence Numerical Simulation V. Deschamps, P. Loisel, Y. Morchoisne	435
<b>Section 7 — Space Applications</b>	
Some Experiences Solving Low Thrust Satellite Trajectory Optimisation Problems L.C.W. Dixon, S.E. Hersom, Z.A. Maany	451
Determination of the Gravitational Potential of the Earth and Planets G. Balmino	475
Some Mathematical Problems Met in Precise Orbit Computation M.O. Zarrouati	487
<b>Section 8 — Numerical Methods for Geophysics</b>	
Finite Element Modeling of Elastodynamic and Electromagnetic Wave Propagation for Geophysical Exploration K.J. Marfurt	517
Stability and Instability Results for Inverse Problems in Several-Dimensional Wave Propagation W.W. Symes	549

Least-Squares 2—D Inversion of Horizontally Stratified Media P. Kolb	563
Time-Domain Modeling of EM Diffusion into the Earth S. Nicoletis, Y. Goldman, C. Hubans, S. Spitz	579
<b>Section 9 — Solid Mechanics</b>	
Post-Buckling of Structures — A Static or a Dynamic Problem? A. Combescure	593
Some Considerations on Elastoplastic Solids with Damage J. St. Doltsinis	611
<b>Section 10 — Optimisation</b>	
A Prospective Look at Least-Change Secant Update Methods J.E. Dennis, Jr., R.M. Lewis	631
An Algorithm Based upon Successive Affine Reduction and Newton's Method J.L. Nazareth	641
Author Index	647
