Preface v
The Computational Mathematics Group vii
Acknowledgements ix

INVITED PAPERS

FAST AND ACCURATE COMPUTATION OF SUMS AND INNER PRODUCTS 3
R. Kirchner
Universität Kaiserlautern, Fed. Rep. Germany
U. Kulisch
Universität Karlsruhe, Fed. Rep. Germany

NUMERICAL SOLUTION OF BOUND CONSTRAINED PROBLEMS 29
J.J. Moré
Argonne National Laboratory, Argonne, Illinois, U.S.A.

STABLE PREDICTION OF COMPLICATED DYNAMICS WITH APPLICATION TO WEATHER FORECASTING 39
J. Norbury
University of Oxford, Oxford, U.K.

NUMERICAL METHODS FOR THE SIMULATION OF A CHEMICAL PLANT 53
J.D. Perkins
University of Sydney, New South Wales, Australia
I.D.L. Bogle
University of Adelaide, South Australia

CONTRIBUTED PAPERS

FINITE DIFFERENCE ANALYSIS FOR NAVIER–STOKES AND ENERGY EQUATIONS OF COUETTE–POISEUILLE FLOW 71
F.S.H. Al-Sadah, A.G.M. Khaliq and M. Bashir
University of Bahrain, Bahrain

SOME RECENT DEVELOPMENTS IN FINITE ELEMENT EIGENVALUE COMPUTATION 83
A.L. Andrew
La Trobe University, Bundoora, Victoria, Australia

A METHOD OF PARALLEL ITERATION BASED ON POLYNOMIAL CORRECTION 93
J.M. Barry
University of Tennessee, Tennessee, U.S.A.
E.L. Wachspress
Australian Nuclear Science and Technology Organisation, Menai, Australia

NUMERICAL MODELLING OF RADIAL TWO PHASE FLOW OF GAS AND WATER DURING DRAINAGE OF A COAL SEAM 99
A. Basu
The University of Wollongong, New South Wales, Australia

ON THE APPLICATION OF QUEUEING THEORY CONCEPTS TO BOUNDARY LAYER TRANSITION 109
W.R. Blunden
The University of New South Wales, Kensington, Australia
J.P. Gostelow and A.R. Blunden
The New South Wales Institute of Technology, Sydney, Australia

SECONDARY FLOWS ON LOW ASPECT RATIO ROTATING CAVITIES 119
W. Braga
Pontifical Catholic University of Rio de Janeiro, Rio de Janeiro, Brazil

BOUNDARY INTEGRAL METHODS FOR POLYMER EXTRUSION SIMULATION 129
M.B. Bush
The University of Western Australia, Nedlands, Australia

3D CRACK EXTENSION METHOD IN THE DETERMINATION OF DELAMINATION GROWTH LAWS IN COMPOSITE MATERIALS 141
H. Chaouk and G.P. Steven
The University of Sydney, New South Wales, Australia

ON SOME BOUNDARY INTEGRAL EQUATIONS FOR SYSTEMS OF SECOND ORDER ELLIPTIC EQUATIONS 149
D.L. Clements and A. Larsson
University of Adelaide, South Australia

NUMERICAL MODELLING OF FLOW AND PARTICLE TRANSPORT IN A HYDROCYCLONE OPERATING WITHOUT AN AIR CORE 155
M.R. Davidson
CSIRO Division of Mineral Engineering, Lucas Heights, Australia

USE OF ASYMPTOTIC CASES IN THE SOLUTION OF ORDINARY DIFFERENTIAL EQUATIONS WITH CONSTANT COEFFICIENTS: CASE STUDY OF A TRIDIAGONAL SYSTEM 167
D. Desai and O.E. Potter
Monash University, Clayton, Victoria, Australia

SH AND P–SV WAVES IN IRREGULAR REGIONS 177
L.A. Drake
Macquarie University, Ryde, New South Wales, Australia

BOUNDARY ELEMENT METHOD APPLIED TO THE EDDY CURRENT PROBLEM 185
M.J. Drumm
Capricornia Institute of Advanced Education, Rockhampton, Australia

A NUMERICAL SOLUTION FOR A TWO-DIMENSIONAL FLUIDISED-BED REACTOR 195
N.V. Dung
CSIRO Division of Energy Chemistry, Lucas Heights, Australia

SIMULATIONS AND CLOSURE THEORY FOR INTERACTING BAROTROPIC WAVES 207
J.S. Frederiksen and R.C. Bell
CSIRO Division of Atmospheric Research, Mordialloc, Victoria, Australia

THE APPLICATION OF SPECTRAL TECHNIQUES IN A STUDY OF THE STABILITY OF OROGRAPHICALLY FORCED PLANETARY WAVES 217
C.S. Frederiksen
South Australian Institute of Technology, Pooraka, South Australia
J.S. Frederiksen
CSIRO Division of Atmospheric Research, Mordialloc, Victoria, Australia

WAVE PROPAGATION IN LONGITUDINALLY CURVED WAVEGUIDES 227
G. Furnell
The University of Adelaide, South Australia

A FINITE STRIP-ELEMENT FOR PLANE STRESS 239
W.A. Grice and B.W. Golley
Australian Defence Force Academy, Canberra, Australia

A CONSISTENT UPWIND METHOD OF SECOND ORDER FOR THE CONVECTION–DIFFUSION EQUATION 249
Cl. Günther
Nuclear Research Center, Karlsruhe, Fed. Rep. Germany

THE FOURTH-ORDER EXPLICIT FDM FOR SOLVING THE ONE-DIMENSIONAL DIFFUSION EQUATION WITH A DERIVATIVE BOUNDARY CONDITION 259
K.J. Hayman and B.J. Noye
University of Adelaide, South Australia

COMPUTATIONAL INVESTIGATION OF SWIRLING TURBULENT FLOW IN AN ANNULUS 271
P.G. Holland
CSIRO Division of Energy Chemistry, Menai, Australia
C.A.J. Fletcher
University of Sydney, New South Wales, Australia

A COMPUTATIONAL METHOD FOR THE INVERSE SCATTERING PROBLEM FOR ULTRASOUND 281
D.R. Jackett
CSIRO Division of Mathematics and Statistics, Hobart, Australia
N.G. Barton
CSIRO Division of Mathematics and Statistics, Lindfield, Australia

COMPUTATIONS FOR AN INVISCID JET INCIDENT ON A POROUS WALL 291
D.R. Jenkins and N.G. Barton
CSIRO Division of Mathematics and Statistics, Lindfield, Australia

A BOUNDARY FITTED COORDINATE SCHEME FOR THE PREDICTION OF FLOODING IN NATURAL RIVER SYSTEMS 301
G.A. Jenkins and R.J. Keller
Monash University, Clayton, Victoria, Australia

AN ANALYSIS OF THE CUP-LIKE FLEXSPLINE OF A HARMONIC DRIVE BY MIXED FINITE ELEMENT METHOD 313
Han Jianhua, Fan Zuyao and Zhang Jianwu
Shanghai Jiao Tong University, Shanghai, China

DETERMINING HEAT TRANSFER PARAMETERS IN URBAN ENVIRONMENTS USING NON-LINEAR OPTIMIZATION TECHNIQUES 325
G.T. Johnson and I.D. Watson
Macquarie University, Ryde, New South Wales, Australia

A SPECTRAL METHOD OF DETERMINING DEPTH VARIATIONS OF CURRENTS IN A TWO-LAYER STRATIFIED SEA 333
K.T. Jung and B.J. Noye
University of Adelaide, South Australia

STATISTICAL DYNAMICS OF QUASI-GEOSTROPHIC FLOWS 347
R. Kleeman, J.S. Frederiksen and R.C. Bell
CSIRO Division of Atmospheric Research, Mordialloc, Victoria, Australia

AN ANALYSIS OF SOLUTION TECHNIQUES FOR THE MAGNETIC RELIEF EQUATION AND THE EQUATION OF DOWNWARD CONTINUATION 357
I. Koch
CSIRO Division of Mathematics and Statistics, Canberra, Australia
C.Z. Tarlowski
BMR Division of Geophysics, Canberra, Australia

CLASSICAL AND PARAMETRIC RESONANCE OF FRAME WITH SEMI-RIGID JOINTS – CASE STUDY 371
R. Kohoutek
The University of Wollongong, New South Wales, Australia

ON THE SOLUTION OF NONLINEAR FREDHOLM INTEGRAL EQUATIONS BY REDUCTION TO ALGEBRAIC SYSTEMS OF EQUATIONS 383
W.C. Kok
National University of Singapore, Singapore

COMPUTATIONAL MODELLING OF CAVITATION BUBBLES NEAR BOUNDARIES 391
A. Kucera and J. Blake
University of Wollongong, New South Wales, Australia

LOCAL AND GLOBAL METHODS IN ADAPTIVE GRID FOR HIGHLY CONVECTIVE FLOW COMPUTATION 401
D. Lee, W. Shyy and Y.M. Tswei
National Cheng Kung University, Tainan, Taiwan

ITERATIVE METHODS FOR EIGENPROBLEMS 411
C. Lenard
Australian National University, Canberra, Australia

NUMERICAL SOLUTION OF PARTIAL DIFFERENTIAL EQUATIONS ON IRREGULAR GRIDS 417
C.D. Levermore
Lawrence Livermore National Laboratory, U.S.A.
T.A. Manteuffel and A.B. White, Jr.
Los Alamos National Laboratory, U.S.A.

NUMERICAL SIMULATIONS OF ACCRETION ONTO ROTATING MAGNETIC NEUTRON STARS 427
G.G. Lister, U. Anzer and G. Boerner
Max-Planck Institut für Astrophysik, Garching, Fed. Rep. Germany

WAVE PROPAGATION IN A RANDOMLY VARYING MEDIUM USING A NUMERICAL APPROACH 439
C. Macaskill
University of Sydney, New South Wales, Australia

STRESS DISTRIBUTION IN INCOMPRESSIBLE FINITE CYLINDRICAL BARS SUBJECTED TO SINUSOIDAL TRACTION 449
S.H. Masood
Capricornia Institute, Rockhampton, Queensland, Australia

APPLICATION OF FINITE-ELEMENT METHODS TO THE DESIGN OF A TORUS-SHAPED MAGNETIC CONFINEMENT SYSTEM FOR FUSION EXPERIMENTS 461
R. Mathis
Balzers AG, Principality of Liechtenstein
J. Sapper
Max-Planck Institut für Plasmaphysik, Garching, Fed. Rep. Germany

THE EQUATIONS FOR LONG WAVES AND THEIR APPLICATION 475
A.D. McCowan and D.R. Blackman
Monash University, Clayton, Australia

EXACT ERROR ESTIMATES AND ADAPTIVE MESH TRANSFORMATION CONTROL FOR ELLIPTIC BOUNDARY VALUE PROBLEMS IN R^1 487
R.J. Mills, D.W. Kelly, J.A. Reizes and J.D. Isles
University of New South Wales, Sydney, Australia
A.D. Miller
CSIRO Division of Mathematics and Statistics, Adelaide, South Australia

IMPLICIT FLUX-CORRECTED TRANSPORT 499
R. Morrow
CSIRO Division of Applied Physics, Sydney, Australia
P. Steinle
The University of Adelaide, South Australia

OPTIMISATION ALGORITHMS FOR SMALL OR SPECIAL COMPUTING ENVIRONMENTS 509
J.C. Nash
University of Ottawa, Ottawa, Canada

PREDICTION OF VIBRATIONS DUE TO PILE DRIVING BY THE FINITE ELEMENT METHOD 517
M.A. Nasly
Universiti Teknologi Malaysia, Kuala Lumpur, Malaysia
W. Duncan
University of Strathclyde, Glagow, U.K.

THE USE OF A CGS METHOD FOR THE CONVECTIVE DIFFUSION PROBLEM 529
T. Nodera
Stanford University, Stanford, U.S.A.

FINITE-DIFFERENCE METHODS FOR THE ONE-DIMENSIONAL TRANSPORT EQUATION 539
J. Noye
University of Adelaide, South Australia

WIND EFFECTS ON ELONGATED LAKES AND LAGOONS 563
J. Noye
University of Adelaide, South Australia
P. Walsh
Department of Mines and Energy, Adelaide, South Australia

HYPERBOLIC GRID GENERATION SCHEME FOR SIMULATING FLOW ABOUT THREE-DIMENSIONAL COMPLEX CONFIGURATION 577
S. Ogawa and T. Ishiguro
National Aerospace Laboratory, Japan
Y. Takakura
Fujitsu Limited, Japan

SEMI-ANALYTICAL PLANE STRESS ANALYSIS 589
J. Petrolito and B.W. Golley
Australian Defence Force Academy, Canberra, Australia

NUMERICAL ANALYSIS OF LINEAR QUASI-STATIC COUPLED TRANSIENT THERMO-ELASTICITY 599
D.W. Smith, J.P. Carter and J.R. Booker
University of Sydney, New South Wales, Australia

COMPUTATION OF NON-LINEAR WATER WAVES GENERATED BY A SUBMERGED BODY 611
W.K. Soh and G.R. Barnsley
The University of Wollongong, New South Wales, Australia

GENERATION OF A TRIANGULAR MESH FOR A GENERAL TWO-DIMENSIONAL REGION 621
A.N. Stokes
CSIRO Division of Mathematics and Statistics, Clayton, Australia

THE INTERACTION OF FLOW AND RESONANT SOUND IN A COMPRESSOR 627
A.N. Stokes
CSIRO Division of Mathematics and Statistics, Clayton, Australia
R. Parker
University College of Swansea, Swansea, U.K.

BLOCK SOR APPLIED TO THE CYCLICALLY-REDUCED EQUATIONS AS AN EFFICIENT SOLUTION TECHNIQUE FOR CONVECTION–DIFFUSION EQUATIONS 637
M.C. Thompson
CSIRO Division of Energy Technology, Highett, Victoria, Australia
J.H. Ferziger and G.H. Golub
Stanford University, Stanford, U.S.A.

DYNAMIC PERFORMANCE OF HYDRODYNAMIC BEARINGS WITH VARYING FILM GAP 647
A.K. Tieu
University of Wollongong, New South Wales, Australia

THE EFFECTS OF DYNAMIC LOAD ON THE GEAR TOOTH CONTACTS IN ROTATING MACHINERY 657
A.K. Tieu
The University of Wollongong, New South Wales, Australia
P.J. Goodison
Public Works Department, Port Kembla, New South Wales, Australia

COMPUTATIONS WITH NEURAL NETWORKS AND NEURAL-NETWORK-LIKE STRUCTURES 669
W.A.T. Wan Abdullah
University of Malaya, Kuala Lumpur, Malaysia

NUMERICAL PERFORMANCE OF A PERTURBATION BASED DYNAMIC REDESIGN METHOD 675
P.A. Welch and S.G. Hutton
University of British Columbia, Vancouver, Canada
