

CONTENTS

Preface	ix
<u>Part I: Linear Static and Dynamic Analysis Including Software Considerations</u>	1
1. Special Numerical and Computer Techniques for the Analysis of Finite Element Systems E. L. Wilson	3
2. Linear Static Finite Element Analysis of Structures Especially Calculation of Stresses E. Stein	26
3. Some Comments on Stress Models J. P. Wolf	70
4. A Rigid-Body Transformation Algorithm for Structures with Large Stiffness Variations, with an Application to Incompressible Elements J. W. Wissmann	108
5. Energy Error in the Elastic Solution when an Incompressible Solid is Assumed Compressible I. Fried and David S. Malkos	131
6. Data and Storage Structures for a System of Finite Element Programs R. Damrath and P. J. Pahl	140
7. From Program Systems to Programming Systems for Finite Element Analysis E. Schrem	163
<u>Part II: Material and Geometric Nonlinear Analysis</u>	191
8. Incremental Formulations for Geometrically Non-Linear Problems W. Wunderlich	193
9. Formulation of Large Deflection Shell Analysis by Assumed Stress Finite Element Method T. H. H. Pian and P. L. Boland	241
10. A Plate/Shell Element for Large Deflections and Rotations E. Ramm	264

11.	A Geometrically and Physically Nonlinear Finite Element Method for the Analysis of Stiffened Rectangular Panels B. Schmidt, R. Damrath, and P. J. Pahl	294
12.	A Study of the Computational and Theoretical Differences of Two Finite Strain Elastic-Plastic Constitutive Models S. W. Key, J. H. Biffle, and R. D. Krieg	321
13.	Constitutive Models and Finite Element Solution of Inelastic Behavior J. H. Argyris, E. Krempl, and K. J. Willam	353
14.	Finite Element Models for Reinforced Concrete R. Wegner	393
15.	Elasto-Plastic Analysis of Finite Deformation Problems J. H. Argyris, M. Kleiber, and W. C. Knudson	440
16.	A Finite Element Method for Large Displacement Contact and Impact Problems T. J. R. Hughes, R. L. Taylor, and W. Kanoknukulchai	468
17.	Phenomena and System Equations of Linearized Vibrations of Nonlinear Systems K. H. Schrader	496
18.	Non-Linear and Post-Buckling Analysis of Structures J. H. Argyris and P. C. Dunne	525
<u>Part III: Solution of Equations</u>		573
19.	Convergence of Subspace Iteration K. J. Bathe	575
20.	Numerical Continuation Methods for Finite Element Applications W. C. Rheinboldt	599
21.	Roundoff Error in the Solution of Finite Element Systems B. Parlett	632
22.	The Conjugate Newton Algorithm for Solving Finite Element Equations B. Irons and A. Elsawaf	655

23.	Mesh Partitions of Explicit-Implicit Time Integration T. Belytschko and R. Mullen	673
24.	Ordinary Differential Equation Techniques for Partial Differential Equations C. W. Gear	691
<u>Part IV: Mathematical Aspects</u>		719
25.	Analysis of Finite Element Approximations of a Boundary- Value Problem in Nonlinear Elasticity J. T. Oden and R. N. del Roure	721
26.	Singularity Problems in the Finite Element Method I. Babuška	748
27.	Optimal Uniform Convergence for the Finite Element Approximation of a Quasi-Linear Elliptic Boundary Value Problem J. Frehse and R. Rannacher	793
28.	On the Theoretical Basis of Finite Element Methods for Geometrically Nonlinear Problems of Structural Analysis L. C. Wellford, Jr.	813
29.	Discrete Plasticity and the Complementarity Problem G. Strang	839
30.	A Survey of Displacement Methods for the Plate Bending Problem L. R. Scott	855
31.	Two-Level Finite Element Computation E. L. Wachspress	877
<u>Part V: Hydrodynamic and Field Problems</u>		915
32.	Finite Element Applications for Transient Processes in Estuaries K. P. Holz and D. Withum	917
33.	Finite Element Analysis of Flow, Diffusion, and Salt Water Intrusion in Porous Media C. S. Desai and D. N. Contractor	958
34.	The Application of Finite Element and Finite Difference Techniques in Hydrodynamical Numerical Models J. Suendermann	986

35.	Discretization Techniques and Time Integration Schemes for Hydrodynamical Finite Element Models U. Meissner	1012
36.	Finite Element Approximation to Vector Fields with Non-Vanishing Divergence and Rotations G. Schmid	1039
37.	Finite Element Analysis of Coupled Electric, Magnetic, and Dynamic Problems E. B. Becker and R. D. Pillsbury	1059
