Preface	iii
 PART I. LARGE SCALE SYSTEMS.....	 1
J. ABADIE and M. SAKAROVITCH: Two Methods of Decomposition for Linear Programming	1
E. M. L. BEALE: Matrix Generators and Output Analyzers	25
R. H. COBB and J. CORD: Decomposition Approaches for Solving Linked Programs	37
G. B. DANTZIG: Large Scale Systems and the Computer Revolution	51
 PART II. PROGRAMMING UNDER UNCERTAINTY ...	 73
M. AVRIEL and D. J. WILDE: Stochastic Geometric Programming	73
M. J. L. KIRBY: The Current State of Chance-Constrained Programming	93
A. PREKOPA: On Probabilistic Constrained Programming	113
D. W. WALKUP and R. J. B. WETS: Stochastic Programs with Recourse: Special Forms	139
A. C. WILLIAMS: Nonlinear Activity Analysis and Duality	163
 PART III. INTEGER PROGRAMMING	 179
E. BALAS: Duality in Discrete Programming	179
M. L. BALINSKI: Integer Programming: Methods, Uses, Computation	199
M. L. BALINSKI: On Recent Developments in Integer Programming	267
M. L. BALINSKI: On Maximum Matching, Minimum Covering and Their Connections	303
P. HUARD: Programmes Mathematiques Nonlineares a Variables Bivalentes	313

	<u>Page</u>
G. ZOUTENDIJK: Enumeration Algorithms for the Pure and Mixed Integer Programming Problem	323
PART IV. ALGORITHMS	339
A. BEN-ISRAEL: On Newton's Method in Nonlinear Programming	339
H. D. MILLS: Extending Newton's Method to Systems of Linear Inequalities	353
J. D. ROODE: Interior Point Methods for the Solution of Mathematical Programming Problems	359
PART V. APPLICATIONS	367
P. BOD: The Solution of a Fixed Charge Linear Programming Problem	367
A. CHARNES and K. KORTANEK: On Classes of Convex Pre-emptive Nuclei for N-Person Games	377
A. J. HOFFMAN and T. J. RIVLIN: When is a Team "Mathematically" Eliminated?	391
D. MCFADDEN: On the Existence of Optimal Development Plans	403
PART VI. THEORY	429
O. L. MANGASARIAN: Optimality and Duality in Nonlinear Programming	429
E. L. PETERSON and J. G. ECKER: Geometric Programming: Duality in Quadratic Programming and ℓ_p -Approximation I	445
R. T. ROCKAFELLAR: Conjugate Convex Functions in Nonlinear Programming	481
PART VII. NONLINEAR PROGRAMMING	
A. R. COLVILLE: A Comparative Study of Nonlinear Programming Codes	487
V. DE ANGELIS: Minimization of a Separable Function Subject to Linear Constraints	503

Contents

	<u>Page</u>
L. HALLER and I. G. T. MILLER: Direct Hypercone Unconstrained Minimization	511
G. HORNE and G. S. TRACZ: Nonlinear Programming and Second Variation Schemes in Constrained Optimal Control Problems	523
G. ZOUTENDIJK: On Continuous Finite-Dimensional Constrained Optimization	539
 PART VIII. PIVOTAL METHODS	 551
R. W. COTTLE, G. J. HABETLER, and C. E. LEMKE: Quadratic Forms Semi-Definite Over Convex Cones ...	551
T. D. PARSONS: Applications of Principal Pivoting	567
A. W. TUCKER: Least Distance Programming	583
 PART IX. ABSTRACTS	 591
