

## CONTENTS

<u>R E BARNHILL and J H BROWN:</u> Nonconforming finite elements for curved regions .....	1
<u>H BRUNNER:</u> The approximate solution of linear and nonlinear first-kind integral equations of Volterra type .....	15
<u>J C BUTCHER:</u> A class of implicit methods for ordinary differential equations .....	28
<u>W J CODY:</u> An overview of software development for special functions .....	38
<u>L COLLATZ:</u> Approximation methods for expanding operators .....	49
<u>G DAHLQUIST:</u> Error analysis for a class of methods for stiff non-linear initial value problems .....	60
<u>R FLETCHER:</u> Conjugate gradient methods for indefinite systems .....	73
<u>P W GAFFNEY and M J D POWELL:</u> Optimal interpolation .....	90
<u>W GAUTSCHI:</u> Advances in Chebyshev Quadrature .....	100
<u>W M GENTLEMAN:</u> Row elimination for solving sparse linear systems and least squares problems .....	122
<u>P E GILL and W MURRAY:</u> Nonlinear least squares and nonlinearly constrained optimization .....	134
<u>J W JEROME:</u> Existence and approximation of weak solutions of the Stefan problem with nonmonotone nonlinearities .....	148
<u>C L LAWSON:</u> On the discovery and description of mathematical programming algorithms .....	157
<u>O L MANGASARIAN:</u> Solution of linear complementarity problems by linear programming .....	166
<u>J K REID:</u> Sparse in-core linear programming .....	176
<u>H J STETTER:</u> Towards a theory for discretizations of stiff differential systems .....	190
