“Computing through the Ages”, a discourse by C. Lanczos	1
R. K. Brayton and C. C. Conley: Some Results on the Stability and Instability of the Backward Differentiation Methods with Non-uniform Time Steps	13
J. C. Butcher: Order Conditions for a General Class of Numerical Methods for Ordinary Differential Equations	35
L. Collatz: Hermitean Methods for Initial Value Problems	41
E. G. D’jakonov: On the Stability of Difference Schemes for Some Non-stationary Problems	63
J. Douglas Jr. and T. Dupont: Some Superconvergence Results for Galerkin methods for the Approximate Solution of Two Point Boundary Problems	89
L. Fox, L. Hayes and D. F. Mayers: Numerical Experiments with the Double-Eigenvalue Problem	93
G. Freud: Error Estimates for Gauss-Jacobi Quadrature Formulae	113
R. Glowinski: Approximations externes, par éléments finis de Lagrange d’ordre un et deux, du problème de Dirichlet pour l’opérateur biharmonique. Méthode itérative de résolution des problèmes approchés	123
G. H. Golub: Some Uses of the Lanczos Algorithm in Numerical Linear Algebra	173
H. O. Kreiss: Difference Methods for Singular Perturbation Problems	185

C. Lanczos: Legendre versus Chebyshev Polynomials 191

J. L. Lions: Remarks on “Cheap Control” 203

B. Noble: Error Analysis of Collocation Methods for Solving
Fredholm Integral Equations 211

P. A. Raviart: The Use of Numerical Integration in Finite Element
Methods for Solving Parabolic Equations 233

E. Schechter: Error Estimates and Convergence in the Numerical
Solution of Non-linear Parabolic Equations 265

H. J. Stetter: Discretizations of Differential Equations on Infinite
Intervals and Applications to Function Minimization 277

F. Stummel: Discrete Convergence of Mappings 285

V. Thomée: Approximate Solution of Dirichlet’s Problem Using
Approximating Polygonal Domains 311

R. S. Varga: Extensions of the Successive Overrelaxation Theory
with Applications to Finite Element Approximations 329

Author Index 345
