

CONTENTS

PREFACE

SECTION 1 ELASTOPLASTICITY

1. A. SAMUELSSON	3
"Some aspects on the accuracy of numerical solutions of problems in quasistatic, small strain elasto- plasticity"	
2. T.K. HELLEN	15
"Elastic-plastic analysis in an in-plane loaded pipe bend"	
3. F. CESARI, P. GHEDUZZI, L. VANNINI and T.K. HELLEN	27
"The feasibility of finite element codes for elasto- plastic analysis"	
4. M. CHAUDONNERET, M. CRISTESCU, G. LOUBIGNAC and B. MAINE	
"Comparison of algorithms and validation of behaviour laws in elasto-visco-plasticity and plasticity"	
5. J.K. HEPWORTH	51
"Finite element calculation of residual stresses in welds"	
6. L. CORRADI and G. GIODA	61
"On the finite element modelling of elastic-plastic behaviour with reference to geotechnical problems"	
7. B. KILKIS and B. KAFTANOGLU	73
"On the finite difference formulation of non-linear plastic deformations in deep-drawing"	
8. D.E. GRIERSON and A.A. ALY	85
"Plastic design under combined stresses and multiple loads"	
9. A. FRANCHI	99
"A compact LP approach to limit analysis"	

10. A. STAMENKOVIC and M.J. GARDNER
 "Inelastic column behaviour of structural steel
 hollow sections"

111

SECTION 2 DYNAMICS

1. T.J.R. HUGHES 127
 "Implicit-explicit finite element techniques for
 symmetric and nonsymmetric systems"
2. J. BRAEKHUS and J.O. AASEN 141
 "Automatic steplength control for direct solution
 of nonlinear differential equations in structural
 dynamics"
3. J.P. HALLEUX 153
 "Non-linear transient dynamic analysis of thin
 axisymmetric structures"
4. A. CELLA, A. CORSANEGO and A. DEL GROSSO 165
 "A modal projective algorithm for nonlinear
 dynamic problems"
5. S. TATTONI and A. GASPERI 177
 "Dynamics of non-linear single degree of freedom
 systems"
6. C. AKKOC 189
 "Non-linear vibration problems viewed as Volterra's
 Prey Predator problem"
7. J. SWEET, F.B.J. BARENDSEN, G.H. VAN LOON-ENGELS 197
 and H. VAN DER KOGEL
 "A method for dynamic soil-structure interaction
 problems"
8. C. PATTERSON and M.C. OLDALE 209
 "Some problems encountered in the numerical
 modelling of fast fracture and arrest"
9. D.K. PAUL, M.M. HUQ and E. HINTON 221
 "Nonlinear, static and dynamic analysis of
 Mindlin plates"
10. S.K. THAKKAR and K.G. STAGG 237
 "Nonlinear dynamic analysis of stress-wave
 propagation problems"

SECTION 3 GEOMETRIC NON - LINEARITY

- | | |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| 1. M.A. CRISFIELD
"Incremental/iterative solution procedures for non-linear structural analysis" | 261 |
| 2. P.G. BERGAN
"Automated incremental-iterative solution schemes" | 291 |
| 3. F.G. RAMMERSTORFER and D.F. FISCHER
"Nonlinear elastic-plastic stability and contact problems concerning the straightening of a wave-like deformed strip plate" | 307 |
| 4. M.S. GADALA, G. AE. ORAVAS and M.A. DOKAINISH
"Geometric and material nonlinearity problems 'formulation aspects'" | 317 |
| 5. R.E. McCONNEL and H. KLIMKE
"Geometrically nonlinear pin-jointed space frames" | 333 |
| 6. M.A. ASTIZ and J. MANTEROLA
"The non-linear structural problem in cable-stayed bridges" | 343 |
| 7. A. PICCA and E. HINTON
"The quasi-Newton BFGS method in the large deflection analysis of plates" | 355 |
| 8. P.A. FRIEZE
"Elasto-plastic buckling of doubly curved shells" | 367 |
| 9. J. MISTRY
"Elasto-plastic buckling of nozzle-torisphere combinations subjected to uniform pressure" | 383 |
| 10. M. PARADISO and G. TEMPESTA
"Member buckling effects in non-linear analysis of space trusses" | 395 |
| 11. L.P.R. LYONS
"Large-deflection elasto-plastic analysis of stiffened shells using semiloof elements" | 407 |
| 12. L.M.S. DINIS, R.A.F. MARTINS and D.R.J. OWEN
"Analysis of material and geometrically non-linear thin plates and arbitrary shells" | 425 |

SECTION 4 REINFORCED CONCRETE

- | | |
|-------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| 1. R.J. COPE, P.V. RAO and K.R. EDWARDS
"Non-linear finite element analysis techniques
for concrete slabs" | 445 |
| 2. R.J. COPE, P.V. RAO, L.A. CLARK and P. NORRIS
"Modelling of reinforced concrete behaviour for
finite element analysis of bridge slabs" | 457 |
| 3. W. DUNCAN and T. JOHNARRY
"Non-linear analysis of clamped concrete slab by
a progressive relaxation of rotational restraints" | 471 |
| 4. J. WASTIELS
"A softening plasticity model for concrete" | 481 |
| 5. H.H. ABDEL RAHMAN, E. HINTON and M.M. HUQ
"Non-linear finite element analysis of reinforced
concrete slab and slab-beam structures" | 493 |

SECTION 5 MATERIAL NON - LINEARITY

- | | |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| 1. C. PATTERSON and M.C. OLDALE
"A stability criterion restricting the choice of
time stepping increment in initial strain creep
analyses" | 505 |
| 2. S. SJOSTROM
"Prediction of quench stresses in steel -
a numerical treatment" | 513 |
| 3. V. RUAS
"An adaptive finite element method for solving two-
dimensional, finite incompressible elasticity
problems" | 529 |
| 4. R. BELMAS and J. RAYNAUD
"Non-linear elastic and non-linear viscoelastic
models application to the numerical simulation of
the behaviour of an aggregate explosive material" | 543 |
| 5. K.S. VIRDI
"Variable cross-section columns loaded up to
failure" | 553 |

SECTION 6 SEEPAGE

1. E.N. BROMHEAD and P.R. VAUGHAN "Solutions for seepage in soils with an effective stress dependent permeability"	567
2. U.I. KROSYNSKI and A. DAGAN "Direct and inverse schemes for vertical unsaturated flow in soils"	579
3. S.C. ANAND and A. PANDIT "Effect of mesh and domain sizes as well as under-relaxation factors on finite element solutions of non-linear groundwater flow and mass transport equations"	591
4. A. DAGAN and U.I. KROSYNSKI "Numerical simulation of upconing phenomena in porous media"	603
5. F.K. FONG and D.R. SKIDMORE "In-situ coal liquefaction"	615
6. W.D.L. FINN and E. VAROGLU "A variational formulation of free-surface and moving boundary problems incorporating adaptive finite elements"	623

SECTION 7 HEAT CONDUCTION

1. B.R. BASS and L.J. OTT "Application of the finite element method to the two-dimensional non-linear inverse heat conduction problem"	649
2. L.T. YEH and B.T.F. CHUNG "Numerical solution for non-linear transient heat transfer in composite solids"	661
3. R. OHAYON and Y. GORGE "Variational analysis of a non-linear non-homogeneous heat conduction problem"	673
4. A. AZIZ "Analysis of heat transfer problems with computer extended perturbation series"	683

5. K. MORGAN, R.W. LEWIS and K.N. SEETHARAMU
"Effect of mould wall heat flux variations on
solidification in continuous casting of steel"

693

SECTION 8 VISCOSUS FLOW

1. J.P. BENGUE, B. IBLER and G. LABADIE 709
"A finite element method for Navier-Stokes equations"
2. M. NAPOLITANO 721
"Simulation of viscous steady flow past an arbitrary two-dimensional body"
3. M.W. COLLINS 735
"A comprehensive finite-difference treatment for various laminar flow convection problems in circular tubes"
4. A.A. MARKOV 747
"Asymptotic analysis of the Navier-Stokes equations for three-dimensional flow in a thin shock layer"
5. J.P. DU PLESSIS 759
"Numerical prediction of 3-dimensional variable property flow with heat transfer in a tube with constant wall temperature"
6. E. VAROĞLU and W.D.L. FINN 771
"A finite element method for non-linear diffusion convection equation to simulate the thermal-regime of rivers"
7. F. GORI 783
"One heat transfer in closed cylinders with two rotating discs"
8. B. SUNDEN 795
"A numerical study of coupled conduction-mixed convection"
9. M.M.M. ABOU-ELLAIAL and S.M. MARCOS 807
"Combined forced and free laminar convection in the entrance region of inclined rectangular channels"
10. M.C. CHARRIER MOJTABI and J.P. CALTAGIRONE 821
"Numerical simulation of natural convection in an annular porous layer by the spectral method"

11. H.T. YANG and L.C. CHIEN 829
 "Numerical solution of impulsive flow over a circular cylinder"
12. G. KAMARAJ, V. GANESAN and K.N. SEETHARAMU 839
 "Numerical modelling of heat transfer process in annular pipes"
13. A.Z. IJAM and C. TAYLOR 849
 "Finite element solution of separated flow in sudden expansion"

SECTION 9 TURBULENT FLOW

1. K.Y. SZEMA and C.H. LEWIS 873
 "Computation of hypersonic laminar, transitional and/or turbulent viscous flow past blunt bodies at angle of attack"
2. J.H. WANG and W. WANG 885
 "Turbulent flows in disc-type stirrers with cone-shaped housing"
3. F.J.K. IDERIAH 895
 "On the numerical computation of the initial region of a turbulent round jet"
4. E. CARNEVALE and L.B. BUTTAFUOCO 909
 "Nonlinear effects in a numerical model of diesel engine fuel injection"
5. E.E. KHALIL 919
 "Numerical computations of turbulent swirling flows"
6. J.N. LILLINGTON 933
 "The application of a 'vector upstream differencing scheme' for the calculation of recirculating flow in rod bundle geometry"
7. W.A. FIVELAND and B.T.F. CHUNG 945
 "Numerical solution for heat transfer in turbulent MFD boundary layer flow"
8. T.W. ABOU-ARAB and M.M.M. ABOU-ELLAIL 957
 "Calculation of flow and heat transfer in pipes with a Reynolds stress model of turbulence"

SECTION 10 CONVECTION - DIFFUSION

- | | |
|-----------------------------------------------------------------------|-----|
| 1. M. VIRTANEN | 973 |
| "The effect of advective terms on the simulation
of lake currents" | |
| 2. G.A. KERAMIDAS | 985 |
| "Numerical modelling for convective dispersion
problems" | |
| 3. M. SUZUKI, S. MATSUMOTO and A. HONDA | 997 |
| "An inverse problem of non-linear diffusion" | |

SECTION 11 GENERAL MATHEMATICAL CONCEPTS

- | | |
|----------------------------------------------------------------------------------------------------------------------------|------|
| 1. D. GLASSER, N. DE VILLIERS and M. BENTWICH | 1011 |
| "A parameter variation (continuation) method for
the solution of non-linear elliptic partial
differential equations" | |
| 2. E.A. LIPITAKIS and D.J. EVANS | 1025 |
| "The numerical solution of non-linear boundary
value problems by normalized extendable factorisation
techniques" | |
| 3. W. HACKBUSCH | 1041 |
| "Numerical solution of non-linear equations by the
multi-grid iteration of the second kind" | |
| 4. J. BARANGER and T. DUMONT | 1051 |
| "Decomposition and projection for non-linear
boundary value problems" | |
| 5. M.P. KAMAT, D.E. VANDENBRINK and L.T. WATSON | 1063 |
| "Non-linear structural analysis using quasi-
Newton minimization algorithms that exploit sparsity" | |
| 6. D.W. KELLY | 1075 |
| "Bounds on discretization error in the finite
element analysis of nonlinear problems" | |
| 7. P. BOONLUALOHR, G. HOCKING and J.R. WILLIAMS | 1087 |
| "Transient thermal stress analysis of anisotropic
fractured rock exhibiting locking behaviour" | |
