O.C. ZIENKIEWICZ, F.R.S.	1
"Numerical Methods for Non-Linear Problems - A Look at Future Prospects"	

## SECTION 1 NON-LINEAR SOLUTION TECHNIQUES

1. PAL G. BERGAN and E. MOLLESTAD	3
"Static and dynamic solution strategies in non-linear analysis"	
2. T.J.R. HUGHES, A. RAEFSKY, A. MULLER, J. H. WINGET and I. LEVIT. "A progress report on E.B.E. solution procedures in Solid Mechanics."	18
3. C.A. FELIPPA	27
"Dynamic relaxation and quasi-Newton methods"	
4. M.P. KAMAT and L.T. WATSON	39
"Determination of multiple equilibrium solutions through a deflation technique with tunnelling"	
5. H. J. WEINITSCHKE	52
"Numerical treatment of branching problems for ordinary and partial differential equations"	
6. D.J. EVANS and S.A. AUDISH	62
"The numerical solution of non-linear boundary value problems by rectangular matrix factorisation procedures"	
7. J.M. SANZ-SERNA	77
"Non-linear instability of leapfrog schemes"	
8. L.R.T. GARDNER and G.A. GARDNER	87
"A numerical study of non-linear vibrations using the Bubnov-Galerkin method"	

	Page
9. M. TELIAS "Solving the integral eigenvalue problem by iterations - computational aspects"	95
10. M. AHUES "A super-linearly convergent inexact Newton method for the compact eigenvalue problem"	107
11. O. OHTMER "Efficient non-linear computation of very large complex structures by automatic partitioning"	117

## SECTION 2      GEOMETRICALLY NON-LINEAR PROBLEMS

1. K. MATTIASSON and A. SAMUELSSON "Total and updated Lagrangian forms of the co- rotational finite element formulation in geometrically and materially nonlinear analysis"	134
2. E. ONATE and J. OLIVER "A total Lagrangian finite element formulation for the large displacement/large rotation analysis of 3-D shells, arches and axi-symmetric shells"	152
3. R. SCHMIDT "Thin elastic shells undergoing small strains and large rotations - a simple consistent theory and variational principles"	170
4. F. MOLENKAMP and J.A.M. TEUNISSEN "Incremental updating of large material rotation and deformation"	182
5. R. BENITO and S. SRIDHAREN "Interactive buckling of plate assemblies"	191
6. M.T.E. TUOMALA and M.J. MIKKOLA "Comparative study of the non-linear response of plane frames and arches"	203

	Page
7. E. CARNOY and G. PANOSYAN "Elastoplastic buckling analysis of slender vessels by finite elements expanded in Fourier series"	215
8. R. VAN IMPE "Buckling and post-buckling analysis of imperfection sensitive engineering structures"	224
9. T.M. ROBERTS and Z.G. AZIZIAN "Geometrically non-linear analysis of thin walled bars"	235

## SECTION 3            REINFORCED CONCRETE STRUCTURES

1. M.A. CRISFIELD "Overcoming limit points with material softening and strain localisation"	244
2. M.S. IMBABI and R.J. COPE "A discretised bond and aggregate interlock model for non-linear finite element analysis"	278
3. R.J. COPE and M.A. MURTUZA "Finite strip method in non-linear analysis of reinforced concrete"	290
4. A. GAUVIN "Redistribution of torsional moments in curved R.C. beams"	301
5. R. de BORST "Application of advanced solution techniques to concrete cracking and non-associated plasticity"	314
6. E. MIRAMBELL, A.R. MARI and A. AGUADO "A simple method for non-linear analysis of concrete structures. Applications to a real case"	326
7. A.R. MARI, E.C. CHAN and A.C. SCORDELIS "Non-linear material, geometric and time dependent analysis of 3-D reinforced and prestressed concrete frames"	339

- |    |  |     |
|----|--|-----|
| 8. | F. ESTERBAN and A. OKAN  | 353 |
|    | "On the application of direct-iterative approach in the solution of non-linear boundary problems for reinforced concrete plates" |     |

## SECTION 4 PLASTICITY/STRUCTURES

- |    |  |     |
|----|--|-----|
| 1. | R.S. PUTHLI, F.S.K. BIJLAARD and H.G.A. STOL   | 364 |
|    | "Solution of highly non-linear inelastic buckling and collapse problems on stiffened steel panels and application to parametric studies" |     |
| 2. | B. CORIC   | 376 |
|    | "Non-linear analysis of slender plate girders with distortional cross-section by finite element procedure"                               |     |
| 3. | J.M. EGANA and J.G. GIMENEZ  | 387 |
|    | "Analysis by finite element method of thermo-plastic problems in axisymmetrical solids"  |     |
| 4. | R.J. RIDER, S.J. HARVEY and P.J. HANCELL   | 399 |
|    | "Computer modelling of yield surfaces in cyclic plasticity"  |     |
| 5. | D.H. FERRIS  | 410 |
|    | "Numerical solution of mass conservation equations representing electrochemical reactions in an unsteady corrosion fatigue crack"        |     |
| 6. | N.F.F. EBECKEN, E.C.P. LIMA, L. LANDAU and L.H.M. CHUEIRI  | 421 |
|    | "Analysis of the static strength of tubular joints"  |     |
| 7. | H. PERNKOPF, E.T. TILL and G. SIEBENHOFER  | 432 |
|    | "Analysing the contact problem of a support disc in a cutting machine for mining"  |     |
| 8. | M.E. HONNOR and R.D. WOOD  | 440 |
|    | "Finite element analysis of axisymmetric deep drawing using a simple two noded Mindlin shell element"                                    |     |
| 9. | A.E. TEKRAYA and K. ROLL   | 450 |
|    | "Analysis of metal forming processes by different finite element methods"  |     |

	Page
10. F.G. BENÍTEZ, S.G. LERA, M. DOBLARÉ and E. ALARCÓN "B.I.E.M. in 3-D elasto-plastic problems"	462

## SECTION 5 NON-LINEAR FINITE ELEMENT ANALYSIS OF STRUCTURES – RECENT APPLICATIONS

1. M. GERADIN "Finite element approach to kinematic and dynamic analysis of mechanisms using Euler parameters"	476
2. K.J. BATHE, A. CHAUDHARY, E.N. DVORKIN, C.A. ALMEIDA, L.W. HO and G. LARSSON "Some advances in finite element procedures for non-linear analysis"	488
3. M.D. OLSON and P.S. HAN "Interactive analysis of wind loaded membrane structures"	501
4. F. YIN, S. ZEGER, R. STRUMPF, L. DEMER, P. CHEW and W.L. MAUGHAN "Assessment of regional ventricular mechanics"	513
5. R. BRANDI and S. GIULI "Nonlinear finite element analysis for sealine connector"	525
6. A. MLODZIANOWSKI and Z. WASZCZYSZYN "Analysis of mechanical defects in EHV substations with flexible conductors at short circuit currents"	537
7. F. CESAR and K.J. BATHE "A finite element analysis of quenching processes"	547
8. I. MIRANDA, J.M. BASTERO and J. G. de JALÓN "Quasi-static crack propagation analysis under thermal induced stresses"	565
9. B. SUAREZ, E. ONATE and R. ALBAREDA "A finite element formulation for the analysis of the non-linear transient response of natural gas in urban pipe networks"	577

## SECTION 6 TRANSIENT DYNAMICS

1.	J.P. HALLEUX and F. CASADEI "Transient large strain analysis of plane and axisymmetric structures by means of biquadratic finite elements"	586
2.	G. VALENTE "Static and dynamic remarks for hanging roof with stiffening beams in the second order theory"	600
3.	T.Y. YANG and S. SAIGAL "Materially nonlinear, static and dynamic response of shell structures using quadrilateral elements"	612
4.	E. T. MOYER, Jr., "Large deformation study of the vibration response of non-linear elastic beams subjected to impact loading - a comparison of the finite element and finite difference methods"	625
5.	M. PAZ and J. WONG "Modified ductility ratio for inelastic spectra"	638
6.	A.S. KRAUSZ, K. KRAUSZ and D.-S. NECSULESCU "A numerical method for determining the crack propagation rate under the effects of various conditions"	649
7.	V.F. POTERSAU "Non-linear structural dynamics by modal trans- formation method"	660

## SECTION 7 POTENTIAL AND VISCOUS FLOW

1.	Y.Y. AZMY and J.J. DORNING "Arc length continuation of nodal integral method solutions to the non-linear Navier-Stokes equations"	672
2.	M. DORMIANI and J.C. BRUCH, Jr., "Numerical results for flow past a symmetric two- dimensional profile with a wake in a channel"	688
3.	J. CALDWELL "Numerical approaches to Burgers' equation"	700
4.	H. NGUYEN and J. REYNEN "A space-time finite element approach to Burgers' equation"	718

	Page
5. Q. HUYNH and Y.S. WONG "Fast iterative methods for non-linear problems"	729
6. M.M.M. ABOU-ELLAIL and H.A. WARDA "Numerical computation of two-phase turbulent jets"	742
7. T-H. CHANG "A subdomain collocation method for boundary layer flow problems"	756
8. D.E. HINSMAN "A comparison between the Galerkin finite element method and the finite difference method for numerical weather prediction"	767
9. M.H. ASKEL "Simulation of the frontal motion in the atmosphere using finite elements"	779
10. A.C.M. SOUSA and D.D. LEBLANC "Shell-side flow prediction of an experimental heat exchanger"	791
11. S.K. GOYAL "Identification of parameters in groundwater modelling using stochastic approximation"	802

## SECTION 8 FREE SURFACE FLOW

1. J. DONEA, S. GIULIANI and J.P. HALLEUX "Taylor-Galerkin methods for the wave equation"	813
2. P. PETERSON, J. HÄUSER, W.C. THACKER and D. EPPEL "An error minimising scheme for the non-linear shallow-water wave equations with moving boundaries"	826
3. J.C. HEINRICH "Numerical modelling of currents in a stratified shallow lake"	837
4. S.M. RÄSÄNEN and E-M. SALONEN "A model for understanding free surface flow"	849
5. T.T. MOHAMAD "Unlinearized boundary element technique for computing water waves"	861

## SECTION 9 HEAT TRANSFER

Page

- |    |   |     |
|----|---|-----|
| 1. | C. TAYLOR, J. RANCE and J.O. MEDWELL<br>"Turbulent flow and heat transfer in rotating<br>ducts" - preliminary results.                      | 874 |
| 2. | M.A. ASTIZ<br>"Numerical modelling of hydrogen diffusion in<br>metals"  | 889 |
| 3. | J. JIMENEZ and J.A. ZUFIRIA<br>"Spectral methods in non-linear mantle convection"   | 901 |
| 4. | A. BERMÚDEZ and J. DURNAY<br>"A finite element method for solving heat transfer<br>problems with phase change in non-homogeneous media"     | 913 |
| 5. | B. DUGNOL ALUAREZ and J. VALDES GARCIA<br>"A coupled non-linear problem in heterogeneous<br>medium"   | 925 |
| 6. | K. NANDAKUMAR, J.H. MASLIYAH and H.S. LAW<br>"Multiple steady states and hysteresis in mixed<br>convection flow in horizontal square tubes" | 935 |
| 7. | M. LACROIX, R. CAMARERO and A. TAPUCU<br>"A numerical study of thermohydraulic flows in<br>computer geometries"                             | 957 |
| 8. | V. CASULLI, R.T. CHENG and U. BULGARELLI<br>"Euclerian-Lagrangian solution of convection<br>dominated diffusion problems"                   | 962 |

## SECTION 10 COMBUSTION

- |    |   |     |
|----|---|-----|
| 1. | J.I. RAMOS  | 974 |
|    | "The numerical solution of non-pressurised reactive flows in a swirl combustor model"                 |     |
| 2. | S.S. KOUSSA   | 986 |
|    | "A practical solution of reactive flows with detailed chemistry"                                      |     |
| 3. | M.S. SABA   | 996 |
|    | "Initial pressure rise and calculation of the overload coefficient of liquid propellant rocket motor" |     |

## SECTION 11    GEOTECHNICAL PROBLEMS Page

- |    |  |      |
|----|--|------|
| 1. | A. HEURTA, M. CASTELEIRO and E. ALONSO<br>"Non-linear numerical analysis of earth dam<br>construction"                                 | 1012 |
| 2. | D.M. POTTS and A. GENS<br>"Correcting for yield surface drift in elasto-<br>plastic finite element analysis"                           | 1024 |
| 3. | M. ARISTODEMO, R. CASCIARO and G. VENCIA<br>"Analysis of two-dimensional elastoplastic<br>continua by high-continuity finite elements" | 1036 |

## SECTION 12    FURTHER APPLICATIONS

- |    |   |      |
|----|---|------|
| 1. | M.S.J. HASHMI and G.R. SYMMONS<br>"A numerical solution for the plasto-hydro-<br>dynamic drawing of a rigid non-linearly strain<br>hardening continuum through a conical orifice" | 1048 |
|----|---|------|
