## PREFACE

## VOLUME 1

### SECTION 1 HEAT CONDUCTION

- |    |   |    |
|----|---|----|
| 1. | L. CZOMBER, C. HABERLAND and A. LAHRMANN<br>"A new stable finite element formulation for the<br>determination of transient temperatures in<br>arbitrarily shaped structures"        | 5  |
| 2. | B. NOUR-OMID and E. L. WILSON<br>"A new algorithm for heat conduction analysis"   | 18 |
| 3. | J.V. BECK, B.F. BLACKWELL and C.R. ST. CLAIR, Jr.<br>"Sequential regularization solution of the inverse<br>heat conduction problem"   | 30 |
| 4. | I.B. JACQUES<br>"On the use of coupled implicit finite difference<br>schemes for solving parabolic partial differential<br>equations"   | 42 |
| 5. | N. KITAHARA, H. YANO and A. KIEDA<br>"Approximate solutions with heat polynomials for<br>heat conduction problems"  | 52 |
| 6. | M. SAMONDS, R.W. LEWIS, K. MORGAN and R. SYMBERLIST<br>"Efficient three dimensional finite element metal<br>casting simulation employing a quadratic<br>conductivity approximation" | 64 |

7.	L.C. WROBEL and J.P.S. AZEVEDO "A boundary element analysis of non-linear heat conduction"	87
8.	D. DICKER "A quasi-analytical method for heat conduction problems"	98
9.	M.C. BHATTACHARYA and M.G. DAVIES "Finite difference equations for heat conduction based on smooth temperature profiles"	104
10.	TANG LUNG JI "A numerical algorithm for inverse problem of two-dimensional heat conduction equation"	110
11.	J. DOBIÁŠ, L. HORVÁTH and I. DAVIDOVIČ "Heat conduction in solid with heat pipes by FEM"	122
12.	R. YALAMANCHILI and S.C. CHU "Unification, accuracy, stability and nonoscillation characteristics of finite-element, finite-difference, and weighted residual methods for transient two-dimensional heat conduction"	132
13.	L. KALINOWSKI "Explicit numerical methods for the solution of heat conduction equation with temperature dependent conduction coefficient"	154

## SECTION 2

## PHASE CHANGE

1.	G.F. CAREY and R. McLAY "Heat transfer and viscous flow in welding"	161
2.	G.E. BELL and S.K. ABBAS "The application of integral methods to conduction problems with temperature dependent properties"	171
3.	D. LOYD, G. ANDERSSON and M. FRÖIER "Industrial phase change processes solved by finite element method"	182
4.	K.C. MASIULANIEC, T.G. KEITH, Jr., and K.J. DeWITT "The enthalpy method applied to phase change problems in arbitrarily shaped regions"	194

5.	T. KAWATANI and H. WATANABE "On the numerical analysis of heat transfer with phase change in groundwater flow of large Peclet number"	206
6.	P.K. PANDAY and A. BILEK "Condensation of pure vapour on longitudinally grooved vertical cylinders"	218
7.	V.R. VOLLER, J.J. MOORE and N. SHAH "Simple techniques for the analysis of metallurgical solidification processes"	229
8.	P. NEITTAANMÄKI "On the control of cooling during continuous casting"	240
9.	M. RAPPAZ, Ph. THÉVOZ and W. KURZ "Micro-/macroscopic modelling of equiaxed solidification"	251
10.	G.C.J. BART, P.B.J. SCHAAREMAN, and C.J. HOOGENDOORN "Finite differences solution of transient heat conduction in composite materials with phase change"	262
11.	M.A. KEAVEY "A simple enthalpy technique for heat conduction with phase change"	270
12.	J.C. LUDWIG, S. ROGERS, P.G. ENRIGHT and L. KATGERMAN "Turbulent mixing and solidification of a liquid metal jet in a confined molten metal stream of different composition and temperature"	279
13.	T.A. ABUBAKAR and A.R. BESTMAN "Radiative effect in change of phase"	291

## SECTION 3

## NUCLEAR RESEARCH AND TECHNOLOGY

1.	J.F. STELZER "Experiences in dealing with non-linearities, especially heat radiation, using the finite element method"	301
----	---	-----

2.	C. CAREMOLI "Numerical computation of steam flows in power plant condensers"	314
3.	K.B. NACEUR, A. DUNAND and P. STEPHENSON "Coupling between fluid loss and heat exchange during hydraulic fracturing"	325

## SECTION 4

### COUPLED CONDUCTION/CONVECTION

1.	J.H. CHIN, D.R. FRANK and J.M. WINGET "Engineering finite element analysis of large three-dimensional heat transfer problems"	341
2.	C.P. THOMPSON, N.S. WILKES and I.P. JONES "Numerical studies of buoyancy driven turbulent flow in a rectangular cavity"	353
3.	S. KOTAKE "Numerical studies of combined forced and free convection in horizontal annular flows"	365
4.	K.H. WINTERS and T.W. BROWN "Benard convection in a three-dimensional cavity: the effects of aspect ratio and tilt"	376
5.	K. NOTO and R. MATSUMOTO "Extinction of the natural convective vortex pair due to the forced flow"	386
6.	S. DEL GIUDICE, C. NONINO and G. COMINI "Finite element analysis of separated forced convection"	400
7.	D. NGUYEN, G. DUMAS and G. DHATT "Convection and conduction heat transfer in cavities composed wall"	412
8.	R. J. SCHNIPKE and J.G. RICE "Application of a new finite element method to convection heat transfer"	424
9.	J.H. CHIN and D.R. FRANK "Finite element modeling of engineering coupled conduction-convection problems"	436

10.	A. L. BOEHMAN	446
	"A study on free convection heat transfer from two dimensional corners and inclined planes"	
11.	M.C. THOMPSON, K. HOURIGAN, A.N. STOKES and M.C. WELSH	458
	"Heat transfer rate from a heated plate in the region of a turbulent separation bubble"	
12.	L.C. CHIEN and Y.P. WANG	470
	"Forced convection heat transfer from separated flow around an impulsively started circular cylinder"	
13.	V.K. GARG	482
	"Heat transfer from a fin - a relook"	
14.	C.Y. SHIEH, W. YANG and T. UEMURA	492
	"Unsteady buoyancy-thermocapillary convection in rectangular tanks with evaporation"	
15.	M.A. COTTON and J.D. JACKSON	504
	"The effect of heat conduction in a tube wall upon forced convection heat transfer in the thermal entry region"	
16.	Y. JING-TANG, Z. YI-QIANG and W. MEI-JUAN	516
	"An improved difference method for steady incompressible convective diffusions"	
17.	J.S. KIM and K.S. CHANG	525
	"Finite difference analysis of unsteady mixed convection on inclined flat plate"	
18.	M. IKEUCHI	537
	"Development of boundary elements in transient convective diffusion problem"	
19.	R. KOHONEN and T. OJANEN	546
	"Coupled convection and conduction in two dimensional building structures"	
20.	H. YANO, S. FUJIMOTO and A. KIEDA	558
	"Heat transfer from hot film for skin friction measurement"	
21.	A. R. BESTMAN	568
	"On the thermal stability of a dusty gas: The Bénard problem"	
22.	G.I. SOLTAN, A.A. EL-HADIK and M.A. EL-HEFNY	578
	"An investigation of heat and fluid around the trailing edge of a film cooled gas turbine blade"	

## SECTION 5

### MOVING BOUNDARIES/ MATHEMATICAL TECHNIQUES

1. V.R. VOLLER, N. MARKATOS and M. CROSS 595  
"Techniques for accounting for the moving interface  
in convection/diffusion phase change"
2. B. DORRI, V. KADAMBI, F.W. STAUB and D.R. LYNCH 610  
"Thermal stress analysis of sintering using  
a moving grid"
3. M.H. BERGER 622  
"The Green's function for Onsager's pancake  
equation"
4. D.O. BLACKKETTER and R.O. WARRINGTON 632  
"Applications of the reduced coordinate procedures  
in heat transfer"
5. D.J. EVANS 641  
"The alternating group explicit (A.G.E.) method  
for diffusion problems"
6. R. LÖHNER and K. MORGAN 657  
"Unstructured multigrid methods: first experiences"
7. S. P. VANKA 667  
"Block-implicit multigrid calculation of three-  
dimensional recirculating flows"
8. M. RAFFY 680  
"A stable inverse problem on the boundary for the  
heat equation and application to remote sensing  
in the thermal infrared bands"
9. P. BRAUN-ANGOTT 688  
"A semi-analytical finite element analysis of  
transient heat transfer using conformal mapping"
10. J. KUJAWSKI, N.-E.WIBERG and P. HANSBO 697  
"High order time integration of thermal problems"
11. G. JOLY, E.J. DOEDEL, J.P.KERNEVEZ and M. LLORY 711  
"Heat transfer instability analysis by path following  
methods"

12. J.A. REIZES, E. LEONARDI and C.C. MURPHY 722  
"The effect of end wall boundary conditions in natural convection"
13. D. J. DEAN 734  
"The use of multiple reflections to represent boundaries in the prediction of steady state and transient temperatures arising from small heat sources"
14. E.A. ARTYUKHIN 746  
"Planning of measurements in the problems of heat transfer process identification"
15. E.E.A. ABDEL-HADI, T.R. HSU and K.S. BHATIA 756  
"Upwind finite element analysis of advection-diffusion equation"
16. O.M. ALIFANOV and E.A. ARTYUKHIN 771  
"Identification of mathematical models of transient heat transfer processes"
17. J.M. SOUZA and C.J. CORRÊA 780  
"Boundary conditions in the finite-difference method applied to free convection from a heated vertical plate"
18. J.F. MILTHORPE and R.I. TANNER 792  
"On the extrusion of visco-elastic fluids subject to viscous heating"
