

# TABLE OF CONTENTS

0.	INTRODUCTION . . . . .	1
	Edward W. Ng	
1.	SIMPLIFICATION	
	Chaired by A. Visconti	
	"A criterion for detecting unnecessary reductions in the . . . . .	3
	construction of Groebner bases" (invited)	
	B. Buchberger, J. Kepler Univ., Austria	
	"Unification of commutative terms". . . . .	22
	J. Siekmann, Univ. Karlsruhe, Germany	
	"Canonicity in rule systems" . . . . .	23
	M. Genesereth, M.I.T., USA	
2.	APPLICATIONS IN PHYSICS	
	Chaired by I. Cohen	
	"A survey of symbolic computation in physics" (invited) . . . . .	30
	J. Fitch, Univ. of Leeds, England	
	"Progress towards a solution of the equivalence problem . . . . .	42
	in general relativity"	
	A. Karlhede and J. Aman, Univ. of Stockholm, Sweden	
	"Symbol calculus by symbolic computation and semi-classical . . . . .	45
	expansions"	
	A. Voros, CEN Saclay, France	
	"An algorithm for the analytic evaluation of a class of . . . . .	52
	integrals"	
	M. Caffo, E. Remiddi, and S. Turrini, U. Bologna, Italy	
3.	MATRICES AND EQUATIONS	
	Chaired by A. Hearn	
	"Fast computation of rational Hermite interpolants and solving . . . . .	58
	Toeplitz system of equations via the extended Euclidean	
	algorithm" (invited)	
	D. Yun* and F. Gustavson, Stanford and IBM, USA	
	"Approximate algorithms to derive exact solutions to systems . . . . .	65
	of linear equations"	
	R. Moenck* and J. Carter, V.M.S. Ltd., Canada	
	"New recursive minor expansion algorithms" . . . . .	74
	J. Smit, Tech. Hogeschool Twente, Netherlands	
	"Systems of algebraic equations" . . . . .	88
	D. Lazard, Univ. de Poitiers, France	

\*Speaker

## TABLE OF CONTENTS (continued)

### 4. ALGEBRAIC FIELDS

Chaired by G. Collins

- "On the van der Waerden criterion for the group of . . . . . 95  
an equation" (invited)  
H. Zassenhaus, Ohio State Univ., USA
- "Some computations relating to torsion points on elliptic . . . . . 108  
curves over number fields"  
H. Bartz, K. Fischer, H. Folz and H. Zimmer \*,  
Univ. Saarlandes, W. Germany
- "The computerization of algebraic geometry" . . . . . 119  
J. Davenport, Cambridge Univ., England
- "Algebraic extensions of arbitrary integral domains" . . . . . 134  
J. Cohen\* and D. Yun, IBM Research, USA
- "On unit computation in real quadratic number fields" . . . . . 140  
M. Pohst\* and H. Zassenhaus, Ohio State Univ., USA

### 5. DIFFERENTIAL EQUATIONS

Chaired by R. Jenks

- "An algebraic form of a solution of a system of linear . . . . . 153  
differential equations with constant coefficients"  
E. Tournier, Univ. of Grenoble, France
- "Substitution methods for the automatic symbolic solution of . . . . . 164  
differential equations of first order and first degree"  
P. Schmidt, Univ. Bonn, Germany
- "A semi-numeric difference algorithm" . . . . . 177  
H. Khalil\* and D. Ulery, Univ. of Delaware, USA
- "Convergence behavior of the Newton iteration for first . . . . . 189  
order differential equations"  
K. Geddes, Univ. of Waterloo, Canada

### 6. POLYNOMIAL ALGORITHMS

Chaired by E. Goto

- "Probabilistic algorithms for verification of polynomial . . . . . 200  
identities" (invited)  
J. Schwartz, Courant Inst., NYU, USA
- "Probabilistic algorithms for sparse polynomials" . . . . . 216  
R. Zippel, M.I.T., USA
- "Non-modular computation of polynomial GCD's using trial . . . . . 227  
division"  
A. Hearn, Univ. of Utah, USA
- "Product of symmetric and anti-symmetric polynomials" . . . . . 240  
A. Galli, Univ. Sci. et Medicale de Grenoble, France

## TABLE OF CONTENTS (continued)

### 7. SYSTEMS

Chaired by K. Bahr

"Capabilities of the MUMATH-78 computer algebra system . . . . .	241
for the INTEL-8080 microprocessor" (invited)	
A. Rich and D. Stoutemyer*, Univ. Hawaii, USA	
"CAMAC 1979" . . . . .	249
J. Leon and V. Pless, Univ. of Illinois, USA	
"The initial design of a vector based algebra system" . . . . .	258
A. Norman and P. Moore*, Cambridge Univ., England	
"Hashing, the key to rapid pattern matching" . . . . .	266
R. Cowan and M. Griss*, Burroughs and U. Utah, USA	
"A system for automatic generation of tensor algorithms . . . . .	279
and indicial tensor calculus"	
L. Hornfeldt, Univ. of Stockholm, Sweden	

### 8. ALGORITHM ANALYSIS

Chaired by Y. Sundblad

"Analysis of multivariate iterative and recursive P-adic . . . . .	291
constructions" (invited)	
P. Wang, Kent State Univ., USA	
"A cellular decomposition algorithm for semi-algebraic sets" . . . . .	301
D. Arnon, Univ. of Wisconsin, USA	
"Gamma-algebra algorithms for canonical hyper complex . . . . .	316
representations"	
A. Woll, Univ. Karlsruhe, Germany	
"Factoring univariate integral polynomial in polynomial . . . . .	317
average time"	
G. Collins, Univ. of Wisconsin, USA	

### 9. SYMBOLIC - NUMERIC INTERFACE

Chaired by J. Campbell

"Symbolic-Numeric Interface: a review" (in absentia) . . . . .	330
E. Ng, Jet Propulsion Lab., USA	
"Solving systems of polynomial equations with floating-point . . . . .	346
coefficients"	
J. Van Hulzen, Tech. Hoge. Twente, Netherlands	
"An arbitrary precision real arithmetic package in REDUCE" . . . . .	358
T. Sasaki, Univ. of Utah, USA	
"Symbolic manipulations in interval arithmetic problems" . . . . .	369
G. Caplat, I.N.S.A., France	

## TABLE OF CONTENTS (continued)

	"An approximate rational arithmetic system with intrinsic recovery of simple fractions during expression evaluation"	383
	D. Matula* and P. Kornerup, SMU, USA and Aarhus, Denmark	
10.	INTEGRATION	
	Chaired by M. Bergman	
	"Integration -- the dust settles?" (invited)	398
	A. Norman* and J. Davenport, Cambridge U., England	
	"Integration of simple radical extensions".	408
	B. Trager, U. Calif. at Berkeley, USA	
	"Integration of algebraic functions".	415
	J. Davenport, Cambridge U., England	
	"An extension of Liouville's theorem"	426
	J. Moses and R. Zippel, M.I.T., USA	
11.	APPLIED ALGEBRA	
	Chaired by J. Moses	
	"Integer matrices and Abelian groups" (invited)	431
	G. Havas and L. Sterling, Australian Nat'l U., Australia	
	"An algorithm for the computation of conjugacy classes and centralizers in p-groups"	452
	M. Felsch and J. Neubuser, RWTH Aachen, W. Germany	
12.	LANGUAGES AND DESIGNS	
	Chaired by B. Caviness	
	"MODLISP -- an introduction" (invited)	466
	R. Jenks, IBM Research Ctr., USA	
	"Extending Interlisp for modularization and efficiency"	481
	D. Bobrow and L. Deutsch, Xerox Res. Ctr., USA	
	"TLISP -- a 'Transportable LISP' implemented in P-code"	490
	M. Griss, R. Kessler, and G. Maguire, Univ. of Utah, USA	
	"Symbolic computing with compression of data structures"	503
	J. Campbell and Simon, Univs. of Exeter & Newcastle, England	
	"Design of algebraic data structures with the approach of abstract data types"	514
	G. Ausiello and G. Mascari, Inst. di Automatica, Italy
