

# Contents

<b>Preface</b>	<b>1</b>
<b>1 Some Principles of Optimization Theory</b>	<b>7</b>
1.1 Introduction . . . . .	7
1.2 Problem Statement . . . . .	10
1.3 Optimality Conditions . . . . .	12
1.4 Penalty Methods . . . . .	15
1.5 Unconstrained Minimization . . . . .	16
<b>2 Principles of Interval Analysis</b>	<b>23</b>
2.1 Introduction . . . . .	23
2.2 Why Interval Arithmetic? . . . . .	25
2.3 Interval Arithmetic Operations . . . . .	27
2.4 Machine Interval Arithmetic . . . . .	30
2.5 Further Notations . . . . .	31
2.6 Inclusion Functions and Natural Interval Extensions .	34
2.7 Centered Forms, Meanvalue Forms, Taylor Forms . . .	39
2.8 Improved Interval Hessian Matrices . . . . .	46
2.9 Interval Newton Methods . . . . .	51
2.10 The Hansen-Greenberg Realization . . . . .	53
2.11 Numerical Examples Using the Interval Newton Method	65

<b>3 Global Unconstrained Optimization</b>	<b>73</b>
3.1 Introduction . . . . .	73
3.2 The Moore-Skelboe Algorithm . . . . .	76
3.3 Termination, Approximation Errors, Rounding Errors	81
3.4 Convergence Conditions for the Moore-Skelboe Algorithm . . . . .	85
3.5 Numerical Examples . . . . .	89
3.6 Convergence Speed of the Moore-Skelboe Algorithm .	95
3.7 Convergence Speed with Isotone Inclusion Functions .	102
3.8 Ichida-Fujii Algorithm and its Convergence Conditions	108
3.9 Hansen's Algorithm and its Convergence Conditions .	110
3.10 Termination Criteria, Approximation Errors and Influence of Rounding Errors . . . . .	116
3.11 Accelerating Devices: An Overview . . . . .	118
3.12 Acceleration Devices: Detailed Description . . . . .	121
3.13 Numerical Examples . . . . .	127
<b>4 Unconstrained Optimization over Unbounded Domains</b>	<b>133</b>
4.1 Introduction . . . . .	133
4.2 The Algorithm over Unbounded Domains . . . . .	136
4.3 Convergence Properties . . . . .	140
4.4 The Monotonicity Test . . . . .	146
4.5 Arithmetic in $\mathbb{I}_\infty$ . . . . .	148
4.6 Realization on the Computer . . . . .	152
4.7 Numerical Results . . . . .	155
<b>5 Constrained Optimization</b>	<b>159</b>
5.1 Introduction . . . . .	159
5.2 Problem Statement . . . . .	161
5.3 Constraints and Exhaustion Principle . . . . .	162
5.4 Trouble with Constraints . . . . .	168
5.5 The Basic Algorithm . . . . .	172
5.6 Optimization Problems with Inexact Data . . . . .	177

5.7	Convergence Properties . . . . .	179
5.8	Accelerating Devices: Overview . . . . .	183
5.9	Devices for Functions without Differentiability Proper- ties . . . . .	186
5.10	Devices for $C^1$ Functions . . . . .	190
5.11	Devices for $C^2$ Functions . . . . .	193
5.12	Numerical Examples . . . . .	195
<b>Bibliography</b>		<b>199</b>
<b>Notation</b>		<b>223</b>
<b>Index</b>		<b>227</b>
