## Part 1: THE ELLPACK SYSTEM

|  |     |
|--|-----|
| 1. INTRODUCTION . . . . .                                    | 3   |
| A. Mathematical Preliminaries . . . . .                      | 3   |
| B. Numerical Methods Preliminaries . . . . .                 | 7   |
| C. The ELLPACK Project . . . . .                             | 15  |
| D. Brief Description of ELLPACK . . . . .                    | 16  |
| E. A Simple Program . . . . .                                | 18  |
| F. Organization of the Book . . . . .                        | 21  |
| G. References . . . . .                                      | 23  |
| 2. THE ELLPACK LANGUAGE . . . . .                            | 25  |
| A. Organization of an ELLPACK Program . . . . .              | 25  |
| B. Segments which Define the Problem . . . . .               | 28  |
| C. The GRID Segment . . . . .                                | 32  |
| D. Segments which Specify the Numerical Methods . . . . .    | 35  |
| E. Fortran and Program Control . . . . .                     | 39  |
| F. OUTPUT and OPTIONS Segments . . . . .                     | 40  |
| G. Debugging ELLPACK Programs . . . . .                      | 44  |
| H. References . . . . .                                      | 47  |
| 3. EXAMPLES . . . . .  | 49  |
| A. Example of Chapter 1 Revised . . . . .                    | 49  |
| B. General Equation with Mixed Boundary Conditions . . . . . | 52  |
| C. How Fortran and ELLPACK Interact . . . . .                | 56  |
| 4. ADVANCED ELLPACK FEATURES . . . . .                       | 61  |
| A. Additional Segments . . . . .                             | 62  |
| B. Additional Features of Basic Segments . . . . .           | 64  |
| C. Access to Preprocessor Variables . . . . .                | 70  |
| D. Advanced ELLPACK Examples . . . . .                       | 71  |
| E. References . . . . .                                      | 86  |
| 5. EXTENDING ELLPACK TO NONSTANDARD PROBLEMS . . . . .       | 87  |
| A. Special Interior Boundary Conditions . . . . .            | 88  |
| B. Two-Phase Diffusion Problem . . . . .                     | 95  |
| C. Newton Iteration for Nonlinear Problems . . . . .         | 101 |
| D. Time Dependent Problem . . . . .                          | 111 |
| E. Systems of Elliptic Problems . . . . .                    | 121 |
| F. References . . . . .                                      | 135 |

## Part 2: THE ELLPACK MODULES

|    |  |     |
|----|--|-----|
| 6. | THE ELLPACK MODULES . . . . .                                | 139 |
| A. | Introduction . . . . .                                       | 139 |
| B. | Description of the Modules . . . . .                         | 141 |
| C. | The Modules . . . . .  | 146 |
| 7. | ITPACK SOLUTION MODULES . . . . .                            | 237 |
|    | by D. R. Kincaid, T. C. Oppe, J. R. Respess, and D. M. Young |     |
| A. | ITPACK Iterative Algorithms . . . . .                        | 237 |
| B. | ITPACK Modules . . . . .                                     | 244 |
| C. | ITPACK Project . . . . .                                     | 255 |
| D. | References . . . . .   | 257 |

## Part 3: PERFORMANCE EVALUATION

|     |   |     |
|-----|---|-----|
| 8.  | PERFORMANCE AND ITS EVALUATION . . . . .            | 261 |
| A.  | Measures of Performance . . . . .                   | 261 |
| B.  | Analytical Evaluation of Performance . . . . .      | 262 |
| C.  | Experimental Evaluation of Performance . . . . .    | 262 |
| 9.  | THE MODEL PROBLEMS . . . . .                        | 265 |
| 10. | PERFORMANCE OF DISCRETIZATION MODULES . . . . .     | 269 |
| A.  | Poisson Problem . . . . .                           | 269 |
| B.  | Helmholtz Problem . . . . .                         | 274 |
| C.  | Boundary Layer Problem . . . . .                    | 278 |
| D.  | General Elliptic Operator . . . . .                 | 281 |
| E.  | General, Difficult Elliptic Problem . . . . .       | 284 |
| F.  | Mixed Boundary Conditions . . . . .                 | 287 |
| G.  | Singular Problem . . . . .                          | 289 |
| H.  | Nonrectangular Domain . . . . .                     | 291 |
| I.  | Three Dimensional Poisson Problem . . . . .         | 293 |
| 11. | PERFORMANCE OF SOLUTION MODULES . . . . .           | 295 |
| A.  | Solution of the 5-Point Star Equations . . . . .    | 297 |
| B.  | Solution of the HODIE-Helmholtz Equations . . . . . | 301 |
| C.  | Solution of the Collocation Equations . . . . .     | 303 |
| D.  | Solution of the Galerkin Equations . . . . .        | 304 |
| E.  | Solution of the 7 Point 3D Equations . . . . .      | 305 |
| F.  | References . . . . .                                | 307 |

## Part 4: CONTRIBUTOR'S GUIDE

|     |  |     |
|-----|--|-----|
| 12. | SOFTWARE PARTS FOR ELLIPTIC PROBLEMS . . . . . | 311 |
| A.  | Overview . . . . .                             | 311 |
| B.  | Contributor's checklist . . . . .              | 314 |

|   |            |
|---|------------|
| C. Conventions . . . . .                            | 316        |
| D. References . . . . .                             | 318        |
| <b>13. INTERFACE SPECIFICATIONS</b> . . . . .       | <b>319</b> |
| A. Problem interface . . . . .                      | 319        |
| B. Discretized domain interface . . . . .           | 324        |
| C. Discretized PDE Interface . . . . .              | 330        |
| D. Equation/unknown indexing interface . . . . .    | 331        |
| E. Algebraic equation solution interface . . . . .  | 332        |
| F. Triple and procedure modules . . . . .           | 333        |
| G. Solution evaluation . . . . .                    | 333        |
| H. Control variables . . . . .                      | 335        |
| <b>14. MODULE INTERFACE ACCESS</b> . . . . .        | <b>343</b> |
| A. Storage Scheme for Interface Variables . . . . . | 343        |
| B. Module-Parameter Access . . . . .                | 345        |
| C. Workspace Access . . . . .                       | 346        |
| <b>15. PROGRAMMING STANDARDS</b> . . . . .          | <b>347</b> |
| A. Printed Output . . . . .                         | 347        |
| B. Error Handling . . . . .                         | 348        |
| C. Portability . . . . .                            | 350        |
| D. Documentation . . . . .                          | 351        |
| E. Utility Programs . . . . .                       | 352        |
| F. References . . . . .                             | 356        |
| <b>16. PREPROCESSOR DATA</b> . . . . .              | <b>357</b> |
| A. Introduction to the Preprocessor . . . . .       | 357        |
| B. The ELLPACK Definition File . . . . .            | 360        |
| C. Examples of File Entries . . . . .               | 367        |
| D. Conditional Code Generation . . . . .            | 369        |

## Part 5: SYSTEM PROGRAMMING GUIDE

|  |            |
|--|------------|
| <b>17. INSTALLING ELLPACK</b> . . . . .                  | <b>373</b> |
| A. Overview of the System . . . . .                      | 373        |
| B. Installation Procedure Summary . . . . .              | 374        |
| C. The ELLPACK Tape . . . . .                            | 375        |
| D. Preparing the ELLPACK Modules . . . . .               | 377        |
| E. Preparing the ELLPACK Preprocessor . . . . .          | 384        |
| F. Sample control card procedures . . . . .              | 386        |
| G. References . . . . .                                  | 391        |
| <b>18. TAILORING ELLPACK</b> . . . . .                   | <b>393</b> |
| A. Organization of the Preprocessor . . . . .            | 393        |
| B. Organization of the ELLPACK Control Program . . . . . | 396        |
| C. How to Add Modules to ELLPACK . . . . .               | 406        |
| D. How to Change the ELLPACK Language . . . . .          | 410        |

## APPENDICES

|  |            |
|--|------------|
| <b>A. THE PDE POPULATION . . . . .</b>                           | <b>417</b> |
| by W. R. Dyksen, E. N. Houstis and J. R. Rice                    |            |
| 1. Introduction . . . . .  | 417        |
| 2. Characteristics of the Problems . . . . .                     | 418        |
| 3. Format of PDE Problem Descriptions . . . . .                  | 423        |
| 4. Acknowledgements . . . . .                                    | 424        |
| 5. Problem Definitions and Plots . . . . .                       | 424        |
| 6. Sources of Problems . . . . .                                 | 452        |
| 7. References . . . . .  | 453        |
| <b>B. THE PG (PREPROCESSOR GENERATOR) SYSTEM . . . . .</b>       | <b>455</b> |
| by J. F. Brophy  |            |
| 1. Introduction to PG Grammars . . . . .                         | 455        |
| 2. PG Rule Syntax . . . . .                                      | 460        |
| 3. PG Actions . . . . .  | 461        |
| 4. Special Segments . . . . .                                    | 462        |
| 5. PG Internals . . . . .  | 465        |
| 6. Installing PG . . . . .                                       | 466        |
| 7. Acknowledgements . . . . .                                    | 467        |
| 8. References . . . . .  | 467        |
| <b>C. THE TEMPLATE PROCESSOR . . . . .</b>                       | <b>469</b> |
| by J. R. Rice, C. J. Ribbens and W. A. Ward                      |            |
| 1. Introduction . . . . .  | 469        |
| 2. General Description . . . . .                                 | 470        |
| 3. Simple Example . . . . .                                      | 471        |
| 4. Substitution Processing Facilities . . . . .                  | 472        |
| 5. Macro Processing Directives . . . . .                         | 475        |
| 6. Another Example . . . . .                                     | 479        |
| 7. Preparing a Tuned Version of the Template Processor . . . . . | 481        |
| 8. Error Messages . . . . .                                      | 482        |
| 9. References . . . . .  | 484        |
| <b>D. EXAMPLES OF SOME ELLPACK STATEMENTS . . . . .</b>          | <b>485</b> |
| <b>INDEX . . . . .</b>   | <b>489</b> |
