

C O N T E N T S

		Pg.	V
Preface			
Table of Contents			
1. G.P. Szegö	Mathematical Programming	pg.	1
2. J. Abadie	Simplex-like Methods for non-linear Programming	pg.	41
3. F. Giannessi	A gradual Algorithm for the Solution of Non-convex quadratic Programming Problems	pg.	61
4. G.P. Szegö and G. Treccani	Mathematical Theory of Minimization Algorithms	pg.	103
5. C. Sutti	One-dimensional Minimization Methods	pg.	147
6. M. Gaviano	Sequential Minimization Methods for Functions of Several Variables	pg.	175
7. C. Sutti, L. Trabattoni and P. Brughiera	A Method for Minimization of a One-dimensional Non-unimodal Function	pg.	181
8. G.P. Szegö and G. Treccani	Axiomatization of Minimization Algorithms and a New Conjugate Gradient Method	pg.	193
9. G. Treccani	A new Axiomatization of Minimization Algorithms	pg.	217
10. G. Treccani L. Trabattoni and G.P. Szegö	A Numerical Method for the Isolation of Minima	pg.	239
11. J.P. Indusi	A Computer Algorithm for Constrained Minimization	pg.	290
12. J.P. Yvon	On Some Random Search Method	pg.	313
13. M. Gaviano and E. Fagioli	Remarks on the Comparison between Random Search Methods and the Gradient Method	pg.	337
14. P. Mazzoleni	Constrained Optimization of Semicontinuous Functions via Truncation Methods	pg.	351
15. E. Fagioli	On the Derivation of Some Minimization Algorithms from The Lagrangian	pg.	359
16. G. Treccani	A Remark on Penalty Functions For Minimization of Polynomials with Polynomial Constraints	pg.	369
Authors' Index		pg.	X
