TABLE OF CONTENTS

		Page
I.	Introduction	1
II.	Mathematical Development	7
	Preliminaries	7
	Doubly-Connected Region	10
	Multiply-Connected Region	13
	Simply-Connected Region	15
	Coordinate System Control	15
	Time-Dependent Coordinate Systems	19
III.	Numerical Solution	21
	Difference Equations	21
	Multiple-Body Fields	23
	Multiple-Body Segment Arrangements	24
	Initial Guess	26
	Convergence Acceleration	30
	Optimum Acceleration Parameters	33
IV.	Examples of Coordinate Systems	36
	Coordinate System Control	36
	Various Body Shapes	37
V.	Examples of Application to Partial Differential Equations	38
	Potential Flow	38
	Viscous Flow	42
	Velocity-Pressure Formulation	44
	Pressure Distribution and Force Coefficients	45
	Loaded Plate	46
VI.	Instructions for Use - Coordinate Program	47
	Coordinate System	47
	Dimensions	48
	Input Parameters	48
	Field Size	48
	Plotting	48
	Initial Guess	49
	Body Contours	49
	Re-entrant Boundaries	50
	Acceleration Parameters	51
	Coordinate System Control	51
	Convergence of Very Large Fields	54
	Listing of Program TOMCAT	56

Sample Cases 93
1. Simply-Connected Region 94
Input. 94
Output 96
Plot 101
2. Single-Body Field 102
Input. 102
Output 103
Plot 109
3. Double-Body Field 110
Input. 110
Output 112
Plot 122

VII. Instructions for Use - Factors Program 123

Scale Factors. 123
Listing of Program FATCAT. 124
Sample Case: Single-Body Field. 140
Input 140
Output. 141

VIII. References 147

IX. Tables 150

X. Figures. 170

XI. Appendices A-1
