

Contents

1	Introduction	1
1.1	Purpose of This Book	3
1.2	Scope of CAD	3
1.3	Content of the Book	4
1.4	Summary	4
1.5	Acknowledgements	5
1.6	List of Frequently-Used Abbreviations	5
2	History and Basic Components of CAD	7
2.1	History	9
2.2	Modules, Functions, Components	10
2.3	Interactive Graphic Interfaces	13
2.3.1	The Graphical Kernel System	13
2.3.2	The Graphical Dialogue System	17
2.4	Data Bases for CAD	20
2.5	Economical Aspects of CAD	25
2.6	Interdisciplinary Aspects of CAD	30
2.7	Summary	30
2.8	Bibliography	31
3	The Process Aspect of CAD	35
3.1	Modelling of the Design Process	37
3.1.1	A Crude Model of the Design Process	37
3.1.2	A More Refined Model of the Design Process	39
3.1.3	Design Processes and Design Environments	44
3.1.4	Differences Between Conventional Design and CAD	45
3.1.5	A Network of the Design Process	46
3.2	CAD Processes	48
3.2.1	Design Process and CAD Process	48
3.2.2	Design Process Characteristics and Their Influence upon the CAD Process	51
3.2.3	The Environment of CAD	53
3.2.3.1	The Organization	53
3.2.3.2	The Human Environment	53
3.2.3.3	Computer Resources	54
3.2.3.4	The Interaction Phases of the CAD Process	56
3.2.4	The State of CAD Processes	57
3.2.4.1	The Lifetime of Processes	57
3.2.4.2	The Representation of the Process State	58
3.2.4.3	The Operating State	58

3.2.5	The Problem of Resources	62
3.2.5.1	Resource Availability and Conflicts of Resource Requirements	62
3.2.5.2	The Efficiency Aspect of Resources	64
3.2.5.3	CAD Machines and CAD Tools	64
3.3	Modelling in CAD	65
3.3.1	Developing a Schema	65
3.3.1.1	Basic Considerations	65
3.3.1.2	A Sample Problem	66
3.3.1.3	Naming of Objects and Attributes	67
3.3.1.4	Alternatives for a First Schema	68
3.3.2	Influence of the Operations upon Schema Planning	70
3.3.3	Subschema Transformations	72
3.3.3.1	Subschema Transformations as Part of the Schema	72
3.3.3.2	The n-square Problem of Subschema Transformations	74
3.3.4	Flexibility – A Measure of Prudence – Versus Efficiency	75
3.3.5	Schema Planning and Design Process Planning	77
3.3.5.1	Subprocess Planning and Data Validity	77
3.3.5.2	The Information Packages	81
3.3.6	Resulting Data Base Management System Requirements	83
3.4	Summary	84
3.5	Bibliography	85
4	The Architecture of CAD Systems	89
4.1	The Gross Architecture	91
4.1.1	Components	91
4.1.2	Interfaces	94
4.1.2.1	Development and Installation of a CAD System	94
4.1.2.2	The Invocation of a CAD System	94
4.1.2.3	Functional Interfaces in a CAD System	95
4.1.2.4	Man-Machine Communication Channels	97
4.1.3	CAD Tools and CAD Machines	98
4.1.3.1	Tools Used in CAD System Application	98
4.1.3.2	Tools Used in CAD System Development	99
4.2	Data Models	100
4.2.1	Mapping	100
4.2.1.1	The Ideal Situation	100
4.2.1.2	Reasons for Non-Ideal Mapping	101
4.2.1.3	Mapping Around the Language	103
4.2.1.4	Mapping Between Aspects	104
4.2.2	Binding	108
4.2.3	The Block Structure Dilemma	111
4.2.4	Algorithmic Modelling	114
4.3	The Resource Aspect	116
4.3.1	Software Machine Design	116
4.3.2	Designing Against Resource Conflicts	117
4.3.2.1	The Abstract Machine	117
4.3.2.2	Process State Representation	120

4.3.2.3	The Concrete Machine	122
4.3.2.4	Resource Management Strategies	123
4.3.2.5	The Components of a Software Machine	124
4.3.3	A Sample Software Machine: The Stack Machine	125
4.3.3.1	The Task and a Simple Solution	125
4.3.3.2	Planning of the Stack Machine	128
4.3.3.3	Implementation of the Stack Machine	131
4.3.4	Distributed Systems	134
4.3.5	The Graphical Kernel System GKS as a Software Machine	141
4.3.5.1	The Process Aspect in GKS	141
4.3.5.2	The Resource Aspect in GKS	143
4.4	Summary	144
4.5	Bibliography	146
5	Implementation Methodology	149
5.1	Techniques and Tools for CAD System Development	151
5.2	Computer Graphics	161
5.2.1	Introduction	161
5.2.2	Interactive Graphics Systems	161
5.2.3	Graphical I/O Devices	164
5.2.3.1	Input Devices	164
5.2.3.2	Output Devices	165
5.2.3.3	CAD Workstations	171
5.2.4	The Graphical Kernel System (GKS)	172
5.2.4.1	System Description	172
5.2.4.2	GKS Examples	181
5.3	CAD System Use of Interactive Graphics Functions	186
5.3.1	The KI System	187
5.3.2	The GRADAS System	191
5.4	Design of Efficient CAD Data Bases	194
5.4.1	Introduction	194
5.4.2	CORAS – Core System for Associative Storage	196
5.4.3	A CORAS Extension for CAD Applications	198
5.4.4	CSDL as an Example of a Language for Designing Conceptual Schemata of Data Bases	200
5.5	Integrated Systems and Methods Bases	202
5.5.1	The Concept of Integrated Systems	202
5.5.2	REGENT as an Example of a CAD System Nucleus	207
5.5.2.1	Dynamic Program Management	211
5.5.2.2	Data Structure Management	211
5.5.2.3	File Management	213
5.5.3	Methods Bases	213
5.6	Summary	214
5.7	Bibliography	214
6	Engineering Methods of CAD	219
6.1	Geometry Handling	221

6.1.1	Introduction: Points in 3-D Space	221
6.1.2	The Hidden-Line/Hidden-Surface Problem	228
6.1.2.1	General Considerations	228
6.1.2.2	The Priority Procedure	230
6.1.2.3	The Overlay Procedure	233
6.1.2.4	Generalization of the Visibility Problem	236
6.1.3	3-D Modelling	238
6.1.3.1	Introduction	238
6.1.3.2	Wire-Frame Models	239
6.1.3.3	Surfaces in Space	240
6.1.3.4	3-D Solid Modelling	242
6.2	Numerical Methods	248
6.2.1	Introduction	248
6.2.2	Finite Element Methods	249
6.2.3	Finite Difference Methods and Other Methods	253
6.2.4	Simulation	255
6.2.4.1	Survey	255
6.2.4.2	Simulation Languages	256
6.2.5	Optimization	260
6.2.5.1	Problem Formulation	260
6.2.5.2	Optimization Problem Characteristics	261
6.2.5.3	Applications	269
6.3	Computer Graphics for Data Presentation	273
6.3.1	Introduction	273
6.3.2	Functions of One Variable	274
6.3.2.1	Diagrams	274
6.3.2.2	Representations of Several Functions in One Diagram	275
6.3.3	Functions of Two Variables	277
6.3.3.1	Marker Clouds	277
6.3.3.2	Hatching, Shading and Coloring	278
6.3.3.3	Contour Plotting	280
6.3.3.4	Pseudo-Perspective View	281
6.3.3.5	Vector Plots	282
6.3.3.6	Two-Dimensional Functions on Curved Surfaces	282
6.3.4	Functions of More than Two Variables	283
6.3.5	Graphic Editing	284
6.4	Summary	285
6.5	Bibliography	286
7	CAD Application Examples	293
7.1	Typical Classes of Applications	295
7.1.1	Numerical Analysis and Presentation	295
7.1.2	Three-Dimensional Applications	298
7.1.3	Functional and Geometrical Layout	301
7.2	CAD Application in some Specific Examples of Industry	305
7.3	Bibliography	306

8	Trends	307
8.1	Availability of Computer Power	309
8.1.1	Configuration	309
8.1.2	Hardware	309
8.1.3	Graphics Terminals	310
8.2	System Architecture and Software	311
8.2.1	Special-Purpose Systems	311
8.2.2	General Purpose Systems	312
8.2.3	Distribution of Processing Power	312
8.2.4	Languages	313
8.2.5	CAD Systems in Research and Development (R & D)	314
8.2.6	Problem-Solving Methods for CAD	315
8.3	Social Aspects	316
8.3.1	Education	316
8.3.2	Ergonomic Aspects	316
8.3.3	Acceptance	317
8.4	Standardization	318
8.5	Summary	318
8.6	Bibliography	318
9	Subject Index	321
10	Author Index	333
	Color Plates	341
