

TABLE OF CONTENTS

1. <i>The currents arising in n-coupled circuits when the primary current is suddenly broken or completed.</i> Proc. Acad. Sci. Amst. 19 (1916) 225-239	1
2. <i>A note on the relation of the audibility factor of a shunted telephone to the antenna current as used in the reception of wireless signals.</i> Phil. Mag. 34 (1917) 184-188	16
3. <i>On the wave-lengths of antennae with flywheel coupling, and a second approximation for the time period of a wavemeter.</i> Wireless World 5 (1917) 550-557	21
4. <i>On the value of the conductivity of sea-water for currents of frequencies as used in wireless telegraphy.</i> Phil. Mag. 36 (1918) 88-94	29
5. <i>Über die Wellenlängen und Strahlung mit Kapazität und Selbstinduktion beschwerter Antennen.</i> Jb. drahtl. Telegr. 13 (1918) 217-238	36
6. <i>On the energy transmission in wireless telegraphy.</i> Yearb. Wireless Telegr. Teleph. (1918) pp. 858-876	58
7. <i>The production and measurement of short continuous electromagnetic waves.</i> Phil. Mag. 38 (1919) 90-97	77
8. <i>A comparison of the wave-form of the telephone current produced by a thermal detector and by a rectifier in heterodyne reception.</i> Proc. phys. Soc. Lond. 31 (1919) 290-298	85
9. <i>A simple derivation of the formulae for the resonance curves of a damped vibration and some properties thereof.</i> Electrician 83 (1919) 225-228, 251-252	94
10. <i>A method of measuring without electrodes the conductivity at various points along a glow discharge and in flames.</i> Phil. Mag. 38 (1919) 352-364	100
11. <i>On the propagation of electromagnetic waves round the earth.</i> Phil. Mag. 38 (1919) 365-380	113
12. <i>De invloed van een geïoniseerd gas op het voortschrijden van electromagnetische golven en toepassingen daarvan op het gebied der draadloze telegraphie en bij metingen aan glimlichtontladingen.</i> Diss. Utrecht, April 27 (Joh. Enschedé en Zonen, Haarlem, 1920) 87 pp., 24 figs.	129
13. <i>On the propagation of electromagnetic waves round the earth.</i> Phil. Mag. 40 (1920) 163	220
14. <i>Discontinuities in the magnetisation.</i> Proc. Acad. Sci. Amst. 23 (1920) 637-643	221
15. <i>A theory of the amplitude of free and forced triode vibrations.</i> Radio Rev., Lond., 1 (1920) 701-710, 754-762	228
16. <i>Discontinuities in the magnetisation II.</i> Proc. Acad. Sci. Amst. 23 (1920) 980-988	247
17. <i>On systems with "propagated coupling".</i> Phil. Mag. 41 (1921) 826-827	257
18. E. V. APPLETON and BALTH. VAN DER POL. <i>On the form of free triode vibrations.</i> Phil. Mag. 42 (1921) 201-220	258
19. E. V. APPLETON and BALTH. VAN DER POL. <i>On a type of oscillation-hysteresis in a simple triode generator.</i> Phil. Mag. 43 (1922) 177-193	281
20. <i>On oscillation hysteresis in a triode generator with two degrees of freedom.</i> Phil. Mag. 43 (1922) 700-719	298
21. <i>Chains of magnetically-coupled circuits.</i> Electrician 89 (1922) 33	318
22. <i>Über Elektronenbahnen in Trioden.</i> Jb. drahtl. Telegr. 25 (1925) 121-131	319
23. <i>Doctor H. A. Lorentz.</i> Physica, Eindhoven, 5 (1925) 321-324	330
24. <i>Hoe groot zijn de stroomen en spanningen in onze ontvangantenne?</i> Radio Luistergids 2 (1926) 12-13	334
25. <i>Der Einfluß der Dämpfungen auf die Frequenzen zweier gekoppelten Kreise.</i> Jb. drahtl. Telegr. 28 (1926) 12-15, 138	336
26. <i>The correlation of some recent advances in wireless.</i> Exp. Wireless 3 (1926) 338-343	340

TABLE OF CONTENTS

XI

27. On "relaxation-oscillations". Phil. Mag. 2 (1926) 978-992	346
28. Forced oscillations in a circuit with non-linear resistance. (Reception with reactive triode). Phil. Mag. 3 (1927) 65-80	361
29. Über „Relaxationsschwingungen“ II. Jb. drahtl. Telegr. 29 (1927) 114-118	377
30. Y. B. F. J. GROENEVELD, BALTH. VAN DER POL and K. POSTHUMUS. Gittergleichrichtung. Jb. drahtl. Telegr. 29 (1927) 139-147	382
31. BALTH. VAN DER POL and J. VAN DER MARK. Frequency demultiplication. Nature, Lond., 120 (1927) 363-364	391
32. BALTH. VAN DER POL and J. VAN DER MARK. Quelques expériences avec des triodes et les oscillations de relaxation. Onde élect. 6 (1927) 461-464	394
33. BALTH. VAN DER POL and M. J. O. STRUTT. On the stability of the solutions of Mathieu's equation. Phil. Mag. 5 (1928) 18-38	398
34. BALTH. VAN DER POL and J. VAN DER MARK. Le battement du coeur considéré comme oscillation de relaxation et un modèle électrique du coeur. Onde élect. 7 (1928) 365-392	419
35. Short wave echoes and the aurora borealis. Nature, Lond., 122 (1928) 878-879	447
36. Some remarks on ultra short wave broadcasting. Exp. Wireless 6 (1929) 9-12	451
37. The effect of regeneration on the received signal strength. Proc. Inst. Radio Engrs, N.Y., 17 (1929) 339-346	455
38. A new transformation in alternating current theory, with an application to the theory of audition. Phil. Mag. 7 (1929) 477-488	463
39. A simple proof and an extension of Heaviside's operational calculus for invariable systems. Phil. Mag. 7 (1929) 1153-1162	476
40. BALTH. VAN DER POL and J. VAN DER MARK. The heartbeat considered as a relaxation-oscillation, and an electrical model of the heart. Arch. néerl. Physiol. 14 (1929) 418-443	486
41. On the operational solution of linear differential equations and an investigation of the properties of these solutions. Phil. Mag. 8 (1929) 861-898	512
42. G. HOLST and BALTH. VAN DER POL. Tien jaren radio-ontwikkeling in het natuurkundig laboratorium der N.V. Philips' Gloeilampenfabrieken en der N.V. Philips' Radio. Tijdschr. ned. Radiogenoot. (Jubileumnummer, 1930) pp. 53-57	550
43. Het technisch aspect van den omroep in Nederland. Tijdschr. ned. Radiogenoot. 4 (1930) 105-127	554a
44. Frequency modulation. Proc. Inst. Radio Engrs, N.Y., 18 (1930) 1194-1205	555
45. Oscillations sinusoidales et de relaxation. Onde élect. 9 (1930) 245-256, 293-312	567
46. BALTH. VAN DER POL and K. F. NIESSEN. Über die Ausbreitung elektromagnetischer Wellen über eine ebene Erde. Ann. Phys., Lpz., 6 (1930) 273-294	599
47. BALTH. VAN DER POL and K. F. NIESSEN. On simultaneous operational calculus. Phil. Mag. 11 (1931) 368-376	621
48. Über die Ausbreitung elektromagnetischer Wellen. Jb. drahtl. Telegr. 37 (1931) 152-156	630
49. BALTH. VAN DER POL and K. F. NIESSEN. Über die Raumwellen von einem vertikalen Dipolsender auf ebener Erde. Ann. Phys., Lpz., 10 (1931) 485-510	635
50. BALTH. VAN DER POL and K. F. NIESSEN. Symbolic calculus. Phil. Mag. 13 (1932) 537-577	661
51. Les phénomènes électroniques dans les lampes de radioélectricité. Congr. int. Électricité, Paris, juillet 1932, 9e sec., rapp. no. 6, 23 pp.	702
52. Bead-corona on radio antenna. Nature, Lond., 130 (1932) 662	725
53. BALTH. VAN DER POL, T. L. ECKERSLEY, J. H. DELLINGER and P. LE CORBEILLER. Propagation of waves of 150 to 2000 kilocycles per second (2000 to 150 meters) at distances between 50 and 2000 kilometers. Proc. Inst. Radio Engrs, N.Y., 21 (1933) 996-1002	727

54.	BALTH. VAN DER POL and TH. J. WEIJERS. <i>Tchebycheff polynomials and their relation to circular functions, Besselfunctions and Lissajous-figures.</i> Physica, 's-Grav., 1 (1933) 78-96	738
55.	J. VAN DER MARK and BALTH. VAN DER POL. <i>The production of sinusoidal oscillations with a time period determined by a relaxation time.</i> Physica, 's-Grav., 1 (1934) 437-448	757
56.	BALTH. VAN DER POL and TH. J. WEIJERS. <i>Finestructure of triode characteristics.</i> Physica, 's-Grav., 1 (1934) 481-496	769
57.	<i>A theorem on electrical networks with an application to filters.</i> Physica, 's-Grav., 1 (1934) 521-530	785
58.	<i>The nonlinear theory of electric oscillations.</i> Proc. Inst. Radio Engrs, N.Y., 22 (1934) 1051-1086	795
59.	<i>Summary of some theoretical contributions by Dr. Balth. van der Pol and Dr. K. F. Niessen to the problem of propagation of radiowaves over the earth.</i> Tijdschr. ned. Radiogenoot. 7 (1935) 1-11	831
60.	<i>The symbolic calculus (with some applications to radiotelegraphy).</i> Tijdschr. ned. Radiogenoot. 7 (1935) 18-32	842
61.	<i>Theory of the reflection of the light from a point source by a finitely conducting flat mirror, with an application to radiotelegraphy.</i> Physica, 's-Grav., 2 (1935) 843-853	857
62.	<i>On potential and wave functions in n dimensions.</i> Physica, 's-Grav., 3 (1936) 385-392	868
63.	<i>A generalization of Maxwell's definition of solid harmonics to waves in n dimensions.</i> Physica, 's-Grav., 3 (1936) 393-397	876
64.	<i>A new theorem on electrical networks.</i> Physica, 's-Grav., 4 (1937) 585-589	881
65.	BALTH. VAN DER POL and H. BREMMER. <i>The diffraction of electromagnetic waves from an electrical point source round a finitely conducting sphere, with applications to radiotelegraphy and the theory of the rainbow, I.</i> Phil. Mag. 24 (1937) 141-176	886
66.	<i>Discontinuous phenomena in radio communication.</i> J. Instn elect. Engrs 81 (1937) 381-398	922
67.	BALTH. VAN DER POL and H. BREMMER. <i>The diffraction of electromagnetic waves from an electrical point source round a finitely conducting sphere, with applications to radiotelegraphy and the theory of the rainbow, II.</i> Phil. Mag. 24 (1937) 825-864	942
68.	BALTH. VAN DER POL and H. BREMMER. <i>Ergebnisse einer Theorie über die Fortpflanzung elektromagnetischer Wellen über eine Kugel endlicher Leitfähigkeit.</i> Hochfrequenztech. u. Elektroakust. 51 (1938) 181-188	981
69.	BALTH. VAN DER POL and H. BREMMER. <i>The propagation of radio waves over a finitely conducting spherical earth.</i> Phil. Mag. 25 (1938) 817-834	989
70.	<i>Beyond radio.</i> Proc. World Radio Convention (Instn Radio Engrs, Australia), Sydney (April 1938) pp. 1-15	1007
71.	C. J. BAKKER and BALTH. VAN DER POL. <i>Report on spontaneous fluctuations of current and potential.</i> Rec. Un. radio-sci. int. 5, fasc. 1 (1938) 217-227	1020
72.	<i>Application of the operational or symbolic calculus to the theory of prime numbers.</i> Phil. Mag. 26 (1938) 921-940	1031
73.	<i>Oliver Heaviside (1850-1925).</i> Ned. Tijdschr. Natuurk. 5 (1938) 269-295	1051
74.	BALTH. VAN DER POL and H. BREMMER. <i>Further note on the propagation of radio waves over a finitely conducting spherical earth.</i> Phil. Mag. 27 (1939) 261-275	1071
75.	BALTH. VAN DER POL and C. C. J. ADDINK. <i>Orchestral pitch. A cathode-ray method of measurement during a concert.</i> Wireless World 44 (1939) 441-442	1086
76.	<i>Biological rhythms considered as relaxation oscillations.</i> 2nd Conf. for biol. rhythms res., Utrecht (August 1939) 13 pp.	1088
77.	<i>Music and elementary theory of numbers.</i> Music. Rev. 7 (1946) 1-25	1101
78.	<i>The fundamental principles of frequency modulation.</i> J. Instn. elect. Engrs 93 (1946) Pt III, 153-158	1126

79.	<i>An electro-mechanical investigation of the Riemann zeta function in the critical strip.</i> Bull. Amer. math. Soc. 53 (1947) 976–981	1132
80.	<i>Mathematics and radio problems.</i> Philips Res. Rep. 3 (1948) 174–190	1140
81.	BALTH. VAN DER POL and H. BREMMER. <i>Modern operational calculus based on the two-sided Laplace integral. I.</i> Proc. Acad. Sci. Amst. 51 (1948) 1005–1012; Indag. math. 10 (1948) 338–345	1157
82.	BALTH. VAN DER POL and H. BREMMER. <i>Modern operational calculus based on the two-sided Laplace integral. II.</i> Proc. Acad. Sci. Amst. 51 (1948) 1125–1136; Indag. math. 10 (1948) 349–360	1165
83.	<i>Oliver Heaviside (1850–1925).</i> J. Télécomm. 17 (1950) 192–199	1177
84.	<i>Heaviside's operational calculus.</i> The Heaviside centenary volume. (Instn elect. Engrs, Lond. 1950) pp. 70–75	1181
85.	BALTH. VAN DER POL and P. SPEZIALI. <i>The primes in $k(\rho)$.</i> Proc. Acad. Sci. Amst. A 54 (= Indag. math. 13) (1951) 9–15	1187
86.	<i>On a non-linear partial differential equation satisfied by the logarithm of the Jacobian theta-functions, with arithmetical applications. I.</i> Proc. Acad. Sci. Amst. A 54 (= Indag. math. 13) (1951) 261–271	1195
87.	<i>On a non-linear partial differential equation satisfied by the logarithm of the Jacobian theta-functions, with arithmetical applications. II.</i> Proc. Acad. Sci. Amst. A 54 (= Indag. math. 13) (1951) 272–284	1206
88.	<i>Frequency band for galactic hydrogen observation.</i> J. Télécomm. 20 (1952) 110–113	1219
89.	<i>Beneath radio.</i> Proc. Instn Radio Engrs, Aust., 14 (1953) 9–11	1221
90.	N. E. HOLMBLAD and BALTH. VAN DER POL. <i>Presentation of the Valdemar Poulsen Gold Medal.</i> J. Télécomm. 20 (1953) 23e–25e	1224
91.	<i>Note sur les propriétés des solutions d'une équation différentielle, que l'on peut déduire directement de l'équation différentielle elle-même. Note on the properties of solutions of a differential equation which may be derived directly from the differential equation itself.</i> Actes Coll. int. vibrations non linéaires. Ile de Porquerolles 1951, Publ. sci. tech. Ministère de l'Air, No. 281 (1953?), 9 pp.	1227
92.	<i>Radio technology and the theory of numbers.</i> J. Franklin Inst. 255 (1953) 475–495	1236
93.	<i>H. A. Lorentz and the bearing of his work on electromagnetic telecommunication.</i> J. Télécomm. 20 (1953) 164e–168e	1257
94.	<i>Note on the gamma function</i> Can. J. Math. 6 (1953) 18–22	1262
95.	<i>The representation of numbers as sums of eight, sixteen and twenty-four squares.</i> Proc. Acad. Sci. Amst. A 57 (= Indag. math. 16) (1954) 349–361	1287
96.	<i>Some observations on Rayleigh fading.</i> Tijdschr. ned. Radiogenoot. 19 (1954) 223–229	1280
97.	<i>Some observations on diversity reception.</i> Tijdschr. ned. Radiogenoot. 20 (1955) 87–92	1287
98.	J. TOUCHARD and BALTH. VAN DER POL. <i>Équations différentielles linéaires vérifiées par certaines fonctions modulaires elliptiques.</i> Proc. Acad. Sci. Amst. A 59 (= Indag. math. 18) (1956) 166–169	1293
99.	<i>Démonstration élémentaire de la relation $\theta_3^4 = \theta_0^4 + \theta_2^4$ entre les différentes fonctions de Jacobi.</i> Enseign. math. 1 , (1956) 259–262	1297
100.	<i>On discontinuous electromagnetic waves and the occurrence of a surface wave.</i> Proc. Symp. Electromagnetic Wave Theory, Trans. Inst. Radio Engrs, N.Y., AP-4 (1956) 288–293	1301
101.	<i>On a generalisation of the non-linear differential equation $(d^2u/dt^2) - \varepsilon(1-u^2)(du/dt) + u = 0$.</i> Proc. Acad. Sci. Amst. A 60 (= Indag. math. 19) (1957) 477–480	1307
102.	<i>On series of the reciprocals of the Jacobi theta functions.</i> Proc. Acad. Sci. Amst. A 63 (= Indag. math. 22) (1960) 107–114	1311
103.	BALTH. VAN DER POL and A. H. M. LEVELT. <i>On the propagation of a discontinuous electromagnetic wave.</i> Proc. Acad. Sci. Amst. A 63 (= Indag. math. 22) (1960) 254–265	1319
	Publications of BALTH. VAN DER POL	1331
