

<b>Appendix</b>	<b>Fourier Series, Integral Transforms, and Generalized Functions</b>	<b>364</b>
-----------------	---	------------

<b>Combined Index</b>		<b>II</b>
-----------------------	--	-----------

**VOLUME 2**

**PART 4 QUANTUM THEORY**

<b>Chapter 14</b>	<b>History and Principles of Quantum Mechanics</b>	<b>387</b>
-------------------	--	------------

- 1 Brief Historical Account of the Development of Quantum Theory, 387
- 2 Principles of Quantum Mechanics, 399

<b>Chapter 15</b>	<b>Some Solvable Problems in Quantum Mechanics</b>	<b>408</b>
-------------------	--	------------

- 1 Spin- $\frac{1}{2}$  Particle in a Magnetic Field, 408
- 2 Coordinate and Momentum Operators; the Free Particle, 416
- 3 The Harmonic Oscillator, 422
- 4 Charged Particle in a Uniform Time-Dependent Electric Field, 430
- 5 Charged Particle in a Uniform Magnetic Field, 432
- 6 The Hydrogen Atom, 435

<b>Chapter 16</b>	<b>Symmetry in Quantum Mechanics</b>	<b>445</b>
-------------------	--------------------------------------	------------

- 1 Displacements and Linear Momentum, 445
- 2 Rotations and Angular Momentum, 447
- 3 Addition of Angular Momenta, 458
- 4 Space Inversion and Parity; Time Reversal, 462
- 5 Dynamical Symmetry, 466
- 6 Gauge Transformations, 468
- 7 Identical Particles, 469

<b>Chapter 17</b>	<b>Interference Phenomena</b>	<b>475</b>
-------------------	-------------------------------	------------

- 1 Filtering Atoms with a Stern-Gerlach Apparatus, 475

2	The Propagator as a Sum over Paths,	481
3	The Aharonov-Bohm Effect,	488
<b>Chapter 18</b>	<b>Approximation Methods</b>	<b>492</b>
1	Time-Independent Perturbation Theory,	492
2	Time-Dependent Perturbation Theory,	500
3	Born Approximation for Scattering,	508
4	Variational Method,	514
5	The WKB Approximation,	518
<b>Chapter 19</b>	<b>Some Applications of Nonrelativistic Quantum Mechanics</b>	<b>526</b>
1	Atomic Structure,	526
2	Molecular Structure,	544
3	Structure of Solids,	547
4	Structure of Nuclei,	551
<b>Chapter 20</b>	<b>Relativistic Wave Equations</b>	<b>553</b>
1	Wave Equation for Zero-Spin Particle,	553
2	The Dirac Equation,	555
3	Solutions of the Dirac Equation,	565
4	Wave Equations for Particles of Any Spin,	571
<b>Chapter 21</b>	<b>Quantum Theory of Radiation</b>	<b>575</b>
1	Quantization of the Electromagnetic Field,	575
2	Interaction of Radiation and Matter,	581
<b>Chapter 22</b>	<b>Second Quantization</b>	<b>598</b>
1	Quantization of the Nonrelativistic Schrödinger Equation,	598
2	Quantization of the Dirac Equation	605
3	Quantization of the Klein-Gordon Equation,	609
<b>Chapter 23</b>	<b>Elementary Particles and Their Interactions</b>	<b>614</b>
1	A Survey of Particles and Interactions,	614
2	Quantum Electrodynamics,	619

- 3 The Theory of Beta Decay, 625
- 4 Strongly Interacting Particles, 632

PART 5 STATISTICAL PHYSICS

**Chapter 24 Thermodynamics 645**

- 1 The Zeroth Law of Thermodynamics and the Definition of Empirical Temperature, 645
- 2 Work, Heat, Internal Energy, and the First Law of Thermodynamics, 647
- 3 Digression on Elementary Kinetic Theory, 648
- 4 Carnot Cycles and the Second Law of Thermodynamics, 653
- 5 Entropy and Irreversibility, 658
- 6 Thermodynamic Potentials, 664
- 7 Phase Transitions, 670
- 8 The Third Law of Thermodynamics, 673

**Chapter 25 Equilibrium Statistical Mechanics 676**

- 1 Statistical Description of Classical and Quantum Systems, 676
- 2 Equilibrium Ensembles; the Microcanonical and Canonical Distributions, 680
- 3 Derivation of the Laws of Thermodynamics, 685
- 4 Information Theory Approach to Statistical Mechanics, 687
- 5 The Grand Canonical Ensemble, 694
- 6 The Approach to Equilibrium and the Origin of Irreversibility, 696

**Chapter 26 Applications of Equilibrium Statistical Mechanics 705**

- 1 The Classical Ideal Gas, 705
- 2 Quantum Statistics of Indistinguishable Particles, 709
- 3 The Ideal Fermi-Dirac Gas, 715
- 4 The Ideal Bose-Einstein Gas, 718
- 5 The Photon Gas, 722
- 6 The Phonon Gas, 724
- 7 Paramagnetic Crystals, 726

<b>Chapter 27</b>	<b>The Kinetic Theory of Gases</b>	<b>731</b>
1	The Boltzmann and the Vlasov Equations,	731
2	The Quantum Boltzmann Equation,	735
3	Boltzmann's H-Theorem,	737
4	The Equations of Fluid Mechanics,	741
5	The Chapman-Enskog Development and Transport Coefficients,	743
6	The Fluctuation-Dissipation Theorem,	746
<b>Chapter 28</b>	<b>Collective Phenomena</b>	<b>756</b>
1	Plasma Oscillations,	756
2	Sound Waves,	763
3	Superfluidity,	766
4	Superconductivity,	772
<b>Combined Index</b>		<b>II</b>
