

Foreword ix

- 1 The Idea of Waves 1
- 2 Sinusoidal Waves—Their Strength and Power 12
- 3 Media and Modes 18
- 4 Phase Velocity and Group Velocity 22
- 5 Vector and Complex Representation 39
- 6 Coupled Modes 47
- 7 Coupled Modes—The Other Solution 57
- 8 Spatial Harmonics and Coupling 61
- 9 Coupling and Tapered Media 71
- 10 Waves and Forces 83
- 11 Energy and Momentum of Waves in a Moving Medium 102
- 12 Energy and Angular Momentum in Rotating Media 114

13 Parametric Amplifiers	121
14 Polarization	129
15 Plane and Nearly Plane Waves	143
16 Antennas and Diffraction	160
17 The Scalar Wave Equation	175
18 Radiation	185
19 Retrospect and Prospect	203
Index	211
