

VOLUME 2

IX. LIQUID CRYSTALS

X. NUCLEAR PHYSICS

1. The Molecular Orbital Theory of Heavy Ion Inelastic Scattering 713
He Guozhu & Yu Shao-ying
2. The Nucleon E.M. Properties of the Cloudy Bag Model 734
Oh Y J, Lee S, Kong K J & Cheon Il-T

XI. OPTICS AND LASER

1. Free Electron Laser 741
Chan Yau-wa
2. Semiconductor Laser Diodes — Past, Present and Future 754
Hayashi Izuo

- | | |
|--|-----|
| 3. Polarization Maintaining Fibers and Their Applications
<i>Mikoshiba K, Takuma Y, Yamada K & Kajioka H</i> | 764 |
| 4. Photothermal Techniques for Materials Characterization
<i>Tam A C</i> | 777 |
| 5. Quantum Mechanical Aspects of Optical Communication and
Optical Computing
<i>Yamamoto Y, Kitagawa & Igeta K</i> | 779 |
| 6. Electrodynamics in Leaky Cavities
<i>Ching S C, Lai H M, Leung P T & <u>Young K</u></i> | 800 |

XII. PLASMA PHYSICS

XIII. POLYMER PHYSICS

- | | |
|--|-----|
| 1. Thermal Expansivity and Conductivity of Polymers
<i>Choy C L</i> | 808 |
| 2. Synthesis and Properties of Polyacetylene
<i>Shirakawa H</i> | 827 |

XIV. QUASICRYSTALS

- | | |
|---|-----|
| 1. High-resolution Electron Microscopy of Quasicrystal
<i>Hiraga K</i> | 836 |
|---|-----|

XV. SEMICONDUCTORS

- | | |
|---|-----|
| 1. Application of MOCVD to Semiconductor Devices
<i>Watanabe N</i> | 841 |
|---|-----|

XVI. SOLITONS

- | | |
|---|-----|
| 1. Time Dependence of Optical Intensities in Two Dimensional
Soliton Experiments with Circular Nematic Liquid Crystal Cells
<i><u>Liang Z C</u>, Shao R F, Yang S L & Lam L</i> | 857 |
|---|-----|

2. Some Problems of Contemporary Nonlinear Acoustics:
Forced Standing Solitons and their Unique Properties 871
Wei Rong-jue, Wang Ben-ren, Mao Yi,
Zheng Xiao-yu & Miao Guo-qing

XVII. SUPERCONDUCTORS

1. Possible Liquid Crystalline high T_c Superconductors 882
Lam L
- Report on Forum on "PHYSICS AND DEVELOPMENT" 895
W Y Chau

PARALLEL SESSIONS: ABSTRACTS OF CONTRIBUTED PAPERS

I. APPLIED PHYSICS

1. Thermoluminescence Dating of Beach Pumices From Hong Kong 905
Chan S H, Chuang L S & Yim W W-S
2. Core-ring-ratio Method for Surface Roughness Measurement 907
Cheng Lu
3. Nucleation Growth and Dissolution of a One- and a Two-
Component Crystal: A Monte Carlo Study 909
Cheng V K W, Tang E C M & Tang T B
4. Athermal Thermoluminescence Fading: A Gamow Type Decay of
Trapped Electrons 911
Chuang L S & Kwok S H
5. Pre-dose Method in Thermoluminescence Dating of Pottery:
Prediction of the Unified Model 913
Chuang L S, Lee C K, Kwok S H & Mak Philip Y C
6. FM-correlation Method for Non-contacting Level Measurement of
Irregular Surfaces Using Coded Ultrasound 915
Jane A P
7. Growth of Large Mixed Crystals Under Dynamic Conditions 916
Kumagawa M, Tsuruta T, Ozawa T & Hayakawa Y

8. Structural, Optical, and Electrical Properties of Hard Carbon Film 918
Lin Shu-han & Chen Shu-Guang
9. Industrial Photon Tomography 920
Morgan M J, Davis J R & Wells P
10. MAS-NMR Studies of Cement and Concrete 922
Parry-Jones G, Al-Tayyib A J, Al-Mana A I & Al-Dulaijan S U
11. Formation of Ni-Ti and Fe-Ti Amorphous Alloy Films by
Solid State Amorphization Reaction 924
Yan Zhi-Hua & Wang Wen-kui

II. ASTROPHYSICS AND GRAVITATION

1. Possible Neutrino Rest Mass (SN 1987 Shelton) and the Galactic
Missing Mass Problem 926
Chau Wai-yin
2. Particle Acceleration and Gamma-ray Emission in Accreting
X-ray Binaries 928
Cheng K S & Ruderman M
3. Correlation of Orientation in Cosmic String Model 930
Gao Yu
4. The Two Neutrino Bursts From SN1987A and Phase Transition
Inside Neutron Star 932
Li Hong & Yang Guo-chen
5. Neutrinos from SN1987A and the Resonant Flavor Conversion 934
Minakata H, Nunokawa H & Shiraishi K
6. Gravitational Lens Statistic Properties of Galaxies and QSOs 936
Wu X P
7. Gamma Ray Emissions From Extragalactic Active Galaxies 938
Young E C M, Lau M M & Yu K N
8. A New General Relativistic Theory of Gravitation and Cosmology 940
Yu Xin

III. ATOMIC AND MOLECULAR PHYSICS

1. The Strong Series Perturbation in Even-parity $J = 0$ Energy Levels of Atomic Lead: Experimental and Theoretical Analysis 942
Ding Da-jun & Lu K T
2. Bremsstrahlungs Produced by Light-ion-atom Collisions and the Detection Limit of PIXE 944
Ishii K & Morita S

IV. BIOPHYSICS

1. A Physical Study on the Evolution of Nucleic Acid Sequence 946
Luo L F & Tsai L
2. Use of the Multiwire Proportional Chamber in Protein Crystallography 948
Xuong Ng-h & Ashford V

V. CHAOS AND NONLINEAR SYSTEMS

1. Symmetries and Stochasticity in the Standard Map 949
Ichikawa Yoshi H, Kamimura T & Kim Soo Y
2. Observations of Bifurcation to Chaos in Volume Holograms 951
Liu Da-he, Tang Wei-guo, Zhou Jing & Liang Zhu-jian
3. Bethe Ansatz Approach to the Supersymmetric and Derivative Nonlinear Schrodinger Equation 952
Roy Chowdhury A & Sen Shibani
4. Bifurcations and Chaos in Couette-Taylor Flow 954
Sun Yong-da, Chai Lu & Liu Shu-Sheng
5. Chaos and Homoclinic Bifurcation in the Superconducting Weak Link System with Quadratic Damping 956
Xiao Yang & Yao Xi-xian
6. Nonuniversal Hopping Transport in One Dimension 958
Yu K W & Hui P M

VI. CONDENSED MATTER

1. X-ray and Neutron Diffraction Studies of Some Pseudo Two-dimensional Magnetic Systems 960
Begum R J, Lebech B & Rainford B D
2. Electric Dipole Intensity Parameters for Eu^{3+} Luminescence 962
Chan D K T & Reid M F
3. Crystals with Radiation-induced Color Centres: Some Applications 964
Chaure B D & Arnikar H J
4. First Order Magnetization Process in $\text{Nd}_2(\text{Fe}_{1-x}\text{Al}_x)_{14}\text{B}$ Single Crystals 966
Deruelle M C D, Kato H, Yamada M, Kido G, Nakagawa Y, Hirosawa S & Sagawa M
5. Direct Observation of Longitudinal Excitations in Solid by Means of Oblique Incident Optical Spectroscopy 968
Ejiri A
6. Computer Simulation of Carbon in Tantalum and its Relative Stability 970
Dikshit S
7. Directions of Continuous Phase Transitions at the Γ point for Shubnikov Space Groups 972
Gao Jun-ming & Cui Zhan
8. Molecular Dynamics Study on Simple Classical Liquids, Supercooled Liquids, and Liquid-glass Transition 974
Hiwatari Y
9. Low Temperature Heat Capacities of Several High Strength Materials 976
Ho J C & Dandekar D P
10. Composition Dependence of Structural Transformation in $\text{Fe}_x\text{Cu}_{100-x}$ Solid Solutions 977
Hsu J H, Chen Y F, Yao Y D & Chien C L
11. Critical Phenomena Upon Phase Transition in Thin Solid Films 979
Huang L J, Liu B X & Li H D
12. Electronic Structure Study of RuS_2 981
Huang Ying-sheng & Chen Yang-fang

13. Magnetic Phase Transitions in Body-centered Cubic Solid ^3He 982
Iwahashi K & Masuda Y
14. Thermal Glows Around 180 and 240°K in NaCl: Sr Crystal 984
Kekan N L
15. New High Resolution Studies of BaD Molecule in the Ultraviolet Region 985
Khan M A, Rafi M & Baig M A
16. Variational Thermodynamic Calculations of Liquid Lithium Metal 986
Lai S K
17. Magnetic Properties of $(\text{Nd}_{1-x}\text{Dy}_x)_2\text{Fe}_{14}\text{B}$ Single Crystals 987
Lim D W, Saito N, Kato H, Kido G, Yamada M, Nakagawa Y, Hirose S & Sagawa M
18. Resistivity Anomaly of a New Phase of the Organic Crystal $(\text{BEDT-TTF})_2\text{I}_3$ 989
Li Lu, Ma Bei-hai, Duan Hong-min, Lin Shu-yuan, Zhang Dian-lin, Yao You-xin, Qian Min-xie, Zhu Yu-lan, Wang Xiao-hong & Zhu Dao-ben
19. Valence Band Satellite in Photoemission Spectra of $\text{Cu}_x\text{Ni}_{1-x}$ and $\text{Ag}_x\text{Pd}_{1-x}$ Alloys 991
Miyazawa T, Hanyu T, Ishii H, Kataura H, Yanagihara M, Fujimori A & Koide T
20. Electro-optical Properties and Applications of Inhomogeneous Anisotropic Media 993
Ong H L
21. Cu^{2+} Crystal Field Splittings and Site Distortion in Atacamite Mineral 994
Reddy S L, Ramesh K & Reddy B J
22. Refractive Indices and Nonlinear Optical Properties of Some Quaternary Defect Chalcopyrites 996
Samanta L K
23. Lattice Mechanical Properties of Orientationally Disordered Materials 998
Singh R K & Gaur N K

24. Characteristics of Titanium Silicide Formed by Rapid Thermal Annealing 999
Yong S Y, Lee Y J, Kim B W, Nam K S & Lee J H
25. Effective Electron Temperature Approximation in Hot Electrons Transport on the liquid ^4He Surface 1001
Tian Dong-ping & Liu Bing-jun
26. Optical Properties of Thin Films of Chromium and Tin 1003
Udachan L A & Angadi M A
27. Structures and Properties of Microclusters Between the Atomic and the Solid State 1004
Wang Guang-hou
28. Magnetism of Extended Hubbard Model System with Exchange Interaction 1006
Yu Ming & Zhang Kai-yi
29. EXAFS Study of Rapidly Quenched $\text{Ni}_{80}\text{P}_{20}$ 1008
Zheng Y, Huang J L & Hua Z Y

VII. ELEMENTARY PARTICLES AND FIELD THEORY

1. Neutrino Results From K. G. F. Experiments 1010
Adarkar H R, Dugad S R, Krishnaswamy M R, Menon M G K, Mondal N K, Narasimham V S, Sreekantan B V, Hayashi Y, Ito N, Kawakami S, Nakamura T, Suda K, Tanaka K & Miyake S
2. Painleve Test of the Exact Resonance Equations 1012
Chang K L & Hwang P S
3. Exact Expression for the Flavor-changing Quark-photon-gluon Vertex in the Standard Model 1014
Chia Swee-ping
4. Long Range Correlation Single Particle Spectrum and Pion Condensation in Proton-Nucleus Collision 1016
Li Yang-guo & Lo Shui-yin

5. Gauge and Higgs Bosons in a Model of Generation
Nonuniversality 1018
Ng D
6. Topological Obstruction in the Definition of Non-abelian Charges 1019
Oh C H & Soo C P
7. Infinite-dimensional (Super)Coset Space in (Super)String Theory 1021
Oh P
8. (Super)Virasoro Algebra, Vertex Operators, Quantum Sine-Gordon
and Solvable (Supersymmetric) Quantum Field Theories 1023
Sasaki R
9. Quantization of the Gauge Field in the Temporal-like Gauges
Based on Stochastic Mechanics 1025
Lim S C
10. Channeling and its Applications to High Energy Physics 1027
Sun C R

VIII. GENERAL PHYSICS

1. Non-local Separable Potential in the One-dimensional Dirac
Equation 1029
Calkin M G, Kiang D & Nogami Y
2. Nonlinear Systems in Physics and their Geometrical Integrability
Properties 1030
Chau Ling-lie
3. Hierarchical Description for a Non-Markoff Relaxation Process 1034
Chen Hong & Wu Xiang
4. A Consistent Treatment for a Single Electron in a Thermal Crystal
with an Applied Electric Field 1036
Chen Liao-yuan
5. Study of Magnetic Scatterings in Intercalation Compound of
 Fe_xTiS_x Using Point-contact Spectroscopy 1037
Inoue M, Marushita M, Negishi H & Koyano M

6. Microscopic Origin of Superfluidity in a System of Weakly Interacting Bosons 1039
Jain Y S
7. Photo Pair Production of the Channeled Electron and Positron Enhanced by the Strong Crystal Electrostatic Field 1041
Kim M J, Choi C K & Lee H Y
8. Reflection of Electromagnetic, Particles, and Acoustic Waves; Some General Theorems 1042
Lekner John
9. Exact Evaluation of Kubo Formula for the Thermal Boundary Resistance 1043
Leung P T & Young K
10. Effects of Many-body Interactions on Crystal-vapour Interface: Monte Carlo Simulation 1044
Liu Jun, Jin Jian-min, Ong C K & Ming Nai-ben
11. Monte Carlo Simulations of a Q -state Bond-correlated Percolation Model 1046
Mak Kit-sing & Hu Chin-kun
12. Ground State Properties and Phase Transitions of the Cluster Hubbard Model 1048
Mei W N & Lee Y C
13. Critical Properties of Spin Glasses with RKKY Interactions 1050
Nishimori H
14. Time Dependent Diffusion and the Debye-Waller Factor in Colloidal Crystals 1052
Ou-Yang D H, Chaikin P M, Weitz D A, Pine D J & Klein R
15. Reduced Density Matrices and First G - L Equation for Superfluid Systems 1053
Visoottiviseth K
16. Stochastic-mechanics Transition Probability and Functional Integrals 1055
Wang M S

17. Geometric Quantization and the Quantum Adiabatic Phase 1056
Wu Yih-ren
18. The Abnormal Diffusion of Vacancies in Metals 1057
Zhu Hui-long & Huang Zu-qia

IX. LIQUID CRYSTALS

1. Order Electricity, Surface Orientation and Phase Transitions
 in Liquid Crystals 1059
Barbero G & Durand G
2. Topological Singularities of Smectic Layers as Expected to Exist in
 the Core of Zig-zag Defects in Surface Stabilized Ferroelectric
 Liquid Crystal Cells 1060
Ishikawa K, Takezoe H & Fukuda A
3. The Role of the Order Parameter in a Liquid Crystalline Phase
 Transition 1062
Ponce Theta C
4. A Gas-liquid Type of Critical Point in Liquid Crystals 1063
Shashidhar R, Ratna B R & Somasekhara S
5. Spatial Correlations and Orientational Correlations in Molecular
 Theories of Nematic Liquid Crystals 1064
Yang Guo-chen & Zhang Zhi-dong

X. NUCLEAR PHYSICS

1. Heavy-ion Reactions with Shape Degrees of Freedom 1065
Banerjee A K, Samanta B C & Samaddar S K
2. Radiative Detection of Nuclear Magnetic Resonance 1067
Chaplin D H, Foster H R, Kinnear R W & Wilson G V H
3. Fission Yields and Charge Distribution in Thermal-neutron Induced
 Fusion of U-235 1069
Chung Chien

4. Beijing HI-13 Tandem Laboratory and its First Stage Research Activities 1071
Li Shounan
5. Partition Temperatures in High-energy Hadron-hadron Collisions 1072
Lim Y K
6. New Expression for the Rotational Spectra of Even-even Well-deformed Nuclei 1073
Meng Jie & Lin Xin-wei
7. A New Effective Interaction Applied to a Truncated Oflp Model Space and Transition Strengths and Moments in ^{51}V 1075
Richter W A, van der Merwe M G, Naudé W J, Stander J A & Brown B A
8. $\gamma - \gamma$ Angular Correlations and Lifetimes in ^{131}Xe 1077
Shih Seung-ai, Kang Ho-sik & Yu Min-gyu
9. Analysis of Polarization Measurements in Few Nucleon Systems 1078
Singh J & Kumar A

XI. OPTICS AND LASER

1. Dielectric Microspheres as Optical Cavities 1080
Ching S C, Lai H M, Leung P T & Young K
2. Motion of Electron in the Field of a Nuclear Pumped Gamma-ray Laser 1082
Gupta Gagan
3. Analysis of Multi-mode Y-branch Waveguides by Beam Propagation Method 1084
Hung W Y, Chan H P & Chung P S
4. An Optical Fiber Communication System with Sensing Capability 1086
Leung Chung-ye, Chen Kuang-yi & Chang I-fan
5. Non-degenerate Four-wave Mixing in Optorefractive B. O. S. Crystal 1088
Li Yaotang, Wang Tian-ji & Yang Shi-ning

XII. PLASMA PHYSICS

1. Radiation From a Moving Source in a Medium: Formulation and General Results 1090
Lai H M & Chan P K
2. Dissipative Streaming Effects, Ion Cyclotron and Bernstein Mode, High Temperature, Fusion Instability 1091
Mohanty J N
3. Radiation From a Moving Source in a Plasma: All-forward Energy Flow and Enhanced Field-aligned Radiation 1092
Ng C S & Lai H M
4. Laser-produced Plasma Enhanced Reactive Quenching 1093
Pratap R & Beshai M H N
5. Ripple of Electron Temperature in a H. F. Plasma 1095
Takeda Susumu
6. $n \propto B^2$ Relation and Density Limit of a Magnetized Electron Plasma Supported by Penning Discharge 1097
Xi D P
7. ECRH Trapping of High Energy Gyrotrated Electron Beam in a Magnetic Mirror 1099
Zhao Hua & Yang Si-ze

XIII. POLYMER PHYSICS

1. Magnetic Resonance Study of Molecular Motion in Polymeric Chain Molecules and Distribution of Correlation Time 1100
Kashiwabara H & Shimada S
2. Nonlinear Optical Properties of Conjugated Polymer Polydiacetylene Films 1102
Koda T, Ishikawa K, Kanetake T, Nishikawa S, Tokura Y, Koshihara S, Takeda K & Kubodera K
3. Ultrasonic Study of Oriented Polymers and Composites 1104
Leung W P & Choy C L

4. Thermal Diffusivity of Polymers by Laser Flash Radiometry 1106
Ng Y K, Leung W P & Choy C L
5. Time Variation of Tunnelling Length in Island Metal Films on PMMA 1108
Pattabi Manjunatha, Murali Sastry M S & Sivaramakrishnan V
6. Thermally Stimulated Current of TS and its Polymers with Various Degree of Polymerization 1110
He Ping-sheng, Yao Gang & Qian Xiao-hua

XIV. QUASICRYSTALS

1. X-ray and Electron Microscopy Study of Rapidly Solidified Al-Cu-Mg Alloy 1112
Huang Z R, Li F H, Teng C M, Pan G Z & Chen X S
2. A Growth Model of Dodecagonal Quasicrystal Based on Correlated Tiling of Squares and Equilateral Triangles 1114
Kuo K H, Feng Y C & Chen H
3. From Quasicrystalline to Crystalline Al-Li-Cu Alloy 1116
Pan G Z & Li F H
4. Optical Properties of Quasiperiodic Multilayered Media 1118
Pang Gen-pi
5. Exact Local Environments of Some Quasi-crystals 1119
Szeto K Y

XV. SEMICONDUCTORS

1. Effect of an Electric Field on the Binding Energy of Impurities in Quantum Wells 1121
Cai Min & Liu Wen-ming
2. High Quality LPCVD Silicon Thin Films 1123
Chan P H, Chik K P & Tong By
3. Discharge Carrier Dynamics of II-VI Compound $Cd_{1-x}Se_x$ by Pulsed Photo Injection 1125
Choi Kuy-whang, Kim In-ho & Kim Young-ham

4. Theoretical Study of Plasmon-to-phonon Modes in n -type $\text{Al}_x\text{Ga}_{1-x}\text{As}$ 1126
Fang C S, Tse W S, Wang W K, Chang C P & Pai K F
5. Transmission Electron Microscopy of Semiconductor Interfaces 1127
Fung K K
6. Quantum Transport Studies in Surface-charge Layer on $\text{Hg}_{1-x}\text{Cd}_x\text{Te}$ MIS Structures 1129
Huang He, Tang Ding-yuan, Zheng Guo-zhen & Tong Fei-ming
7. Electromigration Damage Profiles in Sub-micron Metal Lines 1130
Huang Huei-li
8. Hydrogenic States Associated with Higher Subbands in a Semiconductor Quantum Well 1132
Kumaresh A K & Balasubramanian S
9. Infrared Stimulated Current in a-Si:H 1134
Li Wei & Han D
10. P -type ZnSe-ZnS Superlattices Grown on GaAs by Atmospheric Pressure MOVPE 1136
Liao Qi-wei, Fan Guang-han, Fan Xi-wu & Liang Jun-wu
11. Analysis of Spatial Distribution in Solid by Optical Spectra: Ellipsometric Study on Ion Implanted Semiconductors 1138
Mo Dang, Liang Zhong-ning & He Xing-fei
12. Buried Nitride Silicon-on-insulator by Nitrogen Implantation 1139
Poon M C, Wong S P & Lam Y W
13. Confined LO and TO Modes in $(\text{GaAs})_n(\text{AlAs})_n$ Superlattices 1141
Wang Z P, Han H X & Jiang D S
14. The Characterization of Some ZnO Ceramic Varistors 1143
Yap Ber-Chin & Othman R
15. The Minimum Mobility Composition and 2 Deg Observation 1145
Yoon H J, Kim H K, Noh S K, Park H L & Chung C H

16. Persistent Photoconductivity in Doping Modulated Amorphous Silicon Superlattices 1147
Zhang D H & Haneman D
17. Collective Electronic Excitation in a Cylindrical Quantum Well 1149
Zhou Shixun, Zhu Yun & Chen Hao
18. An ELS, AES, LEED Study of Ge/Si(111) and Ge/Si(100) Interfaces 1151
Zhu Furong, Yu Ming-ren & Wang Xun

XVI. SOLITONS

1. 2-Solitons Solutions to Einstein's Equations 1153
To Fook Tsun, Li Bo & Fung P C W

XVII. SUPERCONDUCTORS

1. Collective Modes of a Spin Density Wave Superconductor 1154
Behera S N & Bhattacharya S
2. Two Mechanisms of Destruction of Superconductivity in Bulk Y-Ba-Cu-O 1156
Chen Kaiyuan, Luo Jian & Qian Yong-jia
3. Superconductivity and Structure of New High T_c Bi-Sr-Ca-Cu-O and Tl-Ba-Ca-Cu-O Systems 1158
Feng Sunqi
4. Structure and Magnetic Properties of Y-(Ti,Zr)-Fe Alloys 1165
Hu Jifan, Wang Tao, Zhong Shou-gong, Wang Yizhong, Fen Min-ying, Yuan Cai-wen, Wang Zheng-xi & Xu Xiao-zhen
5. Interplay Between Superconductivity and Antiferromagnetism in the Triplet Local-electron-pair System 1166
Li Yan-min & Zhang Li-yuan
6. Positron Annihilation Studies in High-temperature Superconductors 1167
Mandal P, Poddar A, Nambissan P M G, Choudhury P, Ghosh B, Sen P & Majumdar C K

7. Structure Phase Transition in the Process of Superconducting Phase Transition in $\text{YBa}_2\text{Cu}_3\text{O}_7$ 1168
Mao Xianglei & Zhang Yu-heng
8. Infrared Studies on Some High T_c Ceramic Systems 1170
Muraleedharan K
9. Spin Fluctuation-electron Interaction and High T_c Superconductivity 1172
Nishimura H
10. Structural Investigation of High- T_c Superconducting Y-Ba-Cu-O System 1174
Sato S, Nakada I, Kohara T & Oda Y
11. Off-diagonal-long-range-ordering and the Excitonic-enhancement-model for High T_c Ceramic Oxides 1176
Wong K W & Ching W Y
12. Superconducting Properties of Pb/Ag Multilayers 1178
Yang H C & Nien C H
13. Temperature Dependence of Oxygen Content and Phase Transition in $\text{YBa}_2\text{Cu}_3\text{O}_{9-x}$ and $\text{BiCaSrCu}_2\text{O}_{5.5+y}$ Compounds 1180
Zhu Naiping & Shi Chang-xu
- List of Participants 1182
- Late entry**
- Unified Cosmology 1202
Cho Y M
