

# CONTENTS

## VOLUME 1

Foreword	v
<b>Plenary Sessions</b>	
Fullerenes and Carbon 60 <i>C. N. Yang</i>	3
Properties of High $T_c$ Superconductors <i>Z. X. Zhao</i>	12
Recent Results from Electron-Positron Collisions at Highest Energies <i>S. C. C. Ting</i>	16
30 Years of Gas Discharge Lasers <i>C. K. N. Patel</i>	164
Some Novel Experiments on Metal Clusters and Fullerenes <i>C. N. R. Rao</i>	186
Soft X-Ray Microscopy — Physical Basis and Recent Developments <i>J. Kirz, H. Ade, C. Jacobsen, C. H. Ko, S. Lindaas, S. Williams and X. D. Zhang</i>	200
Theory of Colored String <i>Y. M. Cho</i>	216
Recent Applications of Electron Holography <i>A. Tonomura</i>	237
Progress in Magnetic Confinement Fusion Research <i>S. M. Hamberger</i>	251
CERN — A European Organization but an International Laboratory <i>J. V. Allaby</i>	266

Cohesion, Electron States and Superconductivity of C <sub>60</sub> Fullerides <i>A. Oshiyama</i>	286
<b>Parallel Sessions: Invited and Contributed Papers</b>	
<i>Particle Physics and Field Theory</i>	
Search for New Particles with the L3 Detector <i>M. Pieri</i>	305
1/N Expansion and Renormalizability of a Supersymmetric Nonlinear $\sigma$ Model <i>V. G. Koures and K. T. Mahanthappa</i>	317
Geometrical Model of Multiparticle Production in Hadron-Hadron and $e^+e^-$ Collisions <i>T. T. Chou</i>	338
CP Violating Decay Asymmetry in $b \rightarrow sl^+l^-$ and $s \rightarrow dl^+l^-$ <i>S. P. Chia</i>	349
Massively Parallel Processing: a Need and a Powerful Tool in Sciences for the Future, with Particular Emphasis on Associative String Processors for High Energy Physics Experiments <i>F. Rohrbach</i>	361
Heavy Baryons as Soliton <i>D. P. Min</i>	373
Syncyclons <i>C. S. Aulakh</i>	377
Charged Topological Solitons in YMCS Theory <i>C. S. Aulakh</i>	381
The Generators of the Quantum Lorentz Group from the Quantum Clifford Algebra <i>X. C. Song</i>	385

Time-Translation Noninvariance of the Gauge Field Propagator in the Temporal Gauge <i>S. C. Lim</i>	389
Thermodynamic Bethe–Ansatz Equations for Perturbed Conformal Field Theories <i>S. K. Nam</i>	393
Boson Degrees of Freedom in Baryons <i>H. P. Tran</i>	397
A Version of Tachyon-Free Bosonic String <i>V. D. Dao, T. H. Nguyen and H. H. Nguyen</i>	402
Group-Theoretic Quantization and Central Extensions <i>H. Zainuddin</i>	407
A Report on the Classical Solutions of the Yang–Mills–Chern–Simons Field Theory <i>R. Teh</i>	411
On $SU(1,1)$ Representations on Noncompact Bases and Oscillator-Type Radial Path Integrals <i>F. Basco, C. C. Bernido and M. V. Carpio-Bernido</i>	415
Stop Production at $ep$ Collider HERA <i>T. Kon, T. Kobayashi, S. Kitamura, K. Nakamura and S. Adachi</i>	419
Radiative Corrections to Deep Inelastic Electron-Proton Scattering $e^-p \rightarrow e^-X$ at HERA <i>T. Kobayashi, T. Kon and K. Nakamura</i>	423
Gauge Dependence of the Flavour-Changing Quark Self Energy <i>S. P. Chia and Y. S. Hor</i>	427
Investigation of Intermittency in Multiparticle Production Using Stochastic Branching Processes <i>L. K. Chen, C. K. Chew and A. H. Chan</i>	431

A Two-Tier Neural Network for $b$ Tagging <i>W. A. T. Wan Abdullah</i>	435
Exotic Mesons Determined by Least Squares Method <i>J. B. Choi</i>	439
<i>Cosmology and Astrophysics</i>	
Millimeter Wave Spectroscopy of Star Formation Regions <i>Y. Fukui and A. Mizuno</i>	453
Einstein Manifolds and $SO(3)$ Instantons: Invariants and Phases <i>L. N. Chang and C. Soo</i>	465
4-D Gravity as Diffeomorphism Invariant 2-D Field Theory <i>Y. M. Cho, K. S. Soh, J. H. Yoon and Q. H. Park</i>	478
Light Scattering in Matter Field in Extended Gravity <i>V. D. Dao</i>	482
Special Orthonormal Frames and Einstein Gravity <i>R. S. Tung and J. M. Nester</i>	487
Charge- and Spin-Fluctuations in the Two-Dimensional Hubbard Model <i>H. Nishimura</i>	491
Bubbly Universe <i>J. E. Kim and T. H. Lee</i>	495
Gravitational Anyon in a Uniform Magnetic Field: A Path Integral Evaluation <i>C. C. Bernido</i>	499
<i>Nuclear Physics</i>	
Scattering of Strongly-Absorbed Particles <i>K. Yamauchi, K. Tamura and Y. Sakamoto</i>	505
Spin Structure in Antiproton-Deuteron Cross Sections <i>J. Mahalanabis</i>	509

$\bar{p}$ - <sup>4</sup> He Interactions	513
<i>K. Yamauchi, K. Tamura, Y. Ōki and Y. Sakamoto</i>	
On Intermediate Energy Heavy Ion Optical Model Potential	517
<i>T. H. Rihan and A. M. Awin</i>	
Analytical Formalism for Heavy-Ion-Induced Direct Nuclear Reactions II: Transfer Reactions	525
<i>B. R. Wong</i>	
A New Method for Analysing Inelastic Electron Scattering	529
<i>W. K. Koo</i>	
On the Mechanism of $\alpha$ -Particle Emitted at Zero-Degree in the Reaction $^{12}\text{C} + ^{16}\text{O}$ at $E_L(^{16}\text{O}) = 67\text{--}80$ MeV	533
<i>X. J. Kong, P. L. Li, J. J. Kolata, A. Morsad and L. Goetting</i>	
Excess-Path-Length Distribution of Fast Charged Particles Considering Ionization Energy Loss	539
<i>T. Nakatsuka</i>	
Low Energy Mass Attenuation Coefficients of Moderate to High Atomic Number Elements	543
<i>A. A. Tajuddin, C. S. Chong, A. Shukri and T. Bandyopadhyay</i>	
Small-Angle Neutron Scattering Studies of Polyethylene Glycol Microemulsions	547
<i>S. Radiman and C. Toprakcioglu</i>	
Determination of Resolution Calibration Lines and Fano Factors for HPGe Detectors	551
<i>S. Samat and A. Ahmad</i>	
UV Induced Trapping in Malaysian Limestone	555
<i>Y. M. Amin and A. Ali</i>	
Soil Radon Dosimeter for Wet and Humid Regions	562
<i>R. H. Mahat</i>	

***Plasma Physics***

- Physics and Technology of the Small Plasma Focus 569  
*S. Lee*
- Physics in Reactive Plasmas for Material Processing 581  
*R. Itatani*
- General Characteristics of Planar Surface Wave-Produced Plasmas 593  
*S. Nonaka*
- Plasma Spraying Technology and Its Applications 597  
*C. Silawatshanantai*
- Review of Progress in High Current Ion Sources 606  
*H. J. Ramos*
- Plasma Focus Research at INER 618  
*T. R. Yeh, C. C. Tzeng, Y. Y. Kuo, C. K. Yeh  
and W. S. Hou*
- Experimental Study of the Hard X-Ray Emission from the  
Anode Region of a Small Plasma Focus 622  
*S. P. Moo and C. S. Wong*
- Spectral Analysis of Focussed Plasmas 626  
*C. S. Wong, S. P. Moo, M. Han, Z. M. Jiang,  
S. R. Mohanty and C. Silawatshanantai*
- Interferometry Measurement of Line Average Electron Density  
in Alvand IIC Tokamak 630  
*M. Ghorannevise and M. Avakian*
- Non Circular Cross Section Tokamak Magnetic Structure  
Fast Mapping 634  
*X. H. Yu and J. S. DeGrassie*
- Primary Result of Current AC Modulation Experiment in  
CT-6B Tokamak 638  
*S. B. Zheng, G. H. Han, Y. Xu, X. Z. Qi,  
W. S. Wang, Z. L. Li, L. Wang and W. L. Li*

- Characteristics of a Pulsed Hollow Cathode Discharge at High and Low Operating Pressures 642  
*C. S. Wong, C. X. Ong, S. P. Moo and P. Choi*
- Pure Electron Plasma Experiment 646  
*X. X. Wang, Y. A. Li and H. Y. Jiang*
- Elimination of Coating of Sensitive Layer and Ink on Pre-Sensitize Plate by Means of Plasma Chemistry 650  
*G. Q. Zhang, W. X. Wang, Y. Xiang and Y. J. Ge*
- Formation of CO<sub>2</sub> Laser Induced Secondary Plasma and Its Application to Spectrochemical Analysis 654  
*H. Kurniawan, M. Barmawi, M. O. Tjia and K. Kagawa*
- A Two Dimensional Kinetic Model for the Plasma Chemical Vapor Deposition Process 658  
*Z. L. Liu and D. Q. Zhu*
- On Plasma Definition 662  
*Y. A. Li, Y. H. Zhang, X. X. Wang and H. Y. Jiang*
- Power Absorption of Non-Maxwellian Plasmas in Ion Cyclotron Radiofrequency Heating 666  
*Y. P. Chen and S. T. Tsai*
- A Synergetic Treatment of the Vortices Behaviour of a Plasma with Viscosity 670  
*H. A. Vo and T. D. Nguyen*
- Frequency Shift of Electromagnetic Pulses Interacting with Different Plasma Waves 674  
*S. Sobhanian and H. Namaki*
