

CONTENTS

PREFACE	i
OPENING ADDRESS	
P. Corradini	
B. Biancheri	1
K. Husimi	3
T. Toyoda	5
G. Salvini	8
G. Setti	13
I. FIELD THEORY; STOCHASTIC PROCESSES; STATISTICAL MECHANICS	
1. F. Guerra: Constructive Quantum Field Theory Stochastic Processes and Statistical Mechanics	17
2. H. Araki: Recent Trends in Mathematical Studies of Quantum Field Theory	35
3. R. Kubo: Topics from Non-equilibrium Statistical Mechanics.	46
II. HIGH ENERGY THEORY; GRAVITATIONAL THEORY	
1. L. Maiani: Gauge Theories of Fundamental Interactions	
2. M. Yoshimura: Origin of Cosmic Matter – Introduction to Recent Development	53
3. D. Amati: Theory at CERN.	61
4. H. Terazawa: Subquarks – Possibly the Most Fundamental Form of Matter	65
5. T. Regge: Supergravity Theory.	80
6. N. Nakanishi: Manifestly Covariant Canonical Formalism of Quantum Gravity	90
III. GRAVITATIONAL WAVES	
1. G. Pizzella: Gravitational Wave Antennas for Short Bursts of Radiation. Possible Terrestrial Origin of Events observed with the Rome Cryogenic Antennas ..	99
2. H. Hirakawa: Low-frequency Gravitational Radiation Experiment	123
IV. ASTROPHYSICS	
1. M. Oda and Y. Tanaka: Observations by the X-ray Astronomy Satellite “Hakucho” – Diagnosis of Neutron Star	137
2. L. Scarsi: High Energy Astrophysics in Italy	
3. G. Setti: Astronomical Research in Italy	169
4. D. Sugimoto: Theoretical Studies in Tokyo Stellar Evolution Group	179
V. HIGH ENERGY EXPERIMENTS AND ACCELERATOR – PRESENT AND FUTURE	
1. K. Miyake: Experimental Activities at KEK	197
2. A. Kusumegi: Present Status of Experiments with the KEK 12 GeV PS	208
3. T. Kitagaki: Bubble Chamber Physics in Japan	221
4. S. Homma: Particle and Nuclear Physics Experiments at the INS 1.3 GeV Electron Synchrotron	231
5. T. Ohshima: Comment on Electron Anti-neutrino Mass Measurement at INS	244
6. U. Amaldi: Experimental Activities at CERN	259

7. P. Dalpiaz: The High Energy Physics Program for Experiments with Electronics Trigger in Italy	272
8. M. Koshiha: High Energy Physics Experiments by the University of Tokyo Groups	283
9. S. Tazzari: Accelerators and Experimental Facilities at LNF (Laboratori Nazionali di Frascati, INFN)	299
10. P. Spillantini: The National Laboratories of Frascati: Research Programme	
11. M. Sugawara: 1.5 GeV Pulse Stretcher Ring.	310
12. T. Nishikawa: Future Japanese High Energy Research Plan – TRISTAN	318
13. C. Guaraldo: Proposal of a New Facility for Frascati Laboratories – ALFA 3 Project	

VI. NUCLEAR PHYSICS – PRESENT AND FUTURE

1. K. Sugimoto: Nuclear Physics Experiment at INS	335
2. T. Yamazaki: Meson Science Projects at KEK	379
3. S. Fukui: Short Comment on Proton – Nuclear Interactions	398
4. M. Morita: Structure of Weak Currents in Nuclear Beta Decay	407
5. M. Kondo: Research Center for Nuclear Physics – Facilities and Researches	413
6. H. Kamitsubo: Nuclear Physics at ICPR.	
7. E. Migneco: Nuclear Physics in Italy The “Laboratorio Nazionale del Sud” in Catania	430
8. C. Signorini: Nuclear Physics at “Laboratori Nazionale di Legnaro” – Realization and Future Programme	
9. K. Harada: Pelletron Facility at JAERI	

CLOSING ADDRESS

M. Oda	458
G. Setti	462
G. Salvini	464
T. Toyoda	466

LIST OF PARTICIPANTS

468
