

CONTENTS

Computation and Innovation in the Nonlinear Sciences	1
Norman J. Zabusky	
Introduction to Nonlinear Waves	7
Alwyn C. Scott	
Remarks on Nonlinear Evolution Equations and the Inverse Scattering Transform	83
Mark J. Ablowitz	
The Linearity of Nonlinear Soliton Equations and the Three Wave Interaction	95
David J. Kaup	
Contour Dynamics: A Boundary Integral Evolutionary Method for Inviscid Incompressible Flows	125
Norman J. Zabusky	
Numerical Computation of Nonlinear Waves	157
Bengt Fornberg	
Bifurcations, Fluctuations and Dissipative Structures	185
Gregoire Nicolis	
Chemical Oscillations	313
Louis N. Howard	
Models in Neurobiology	345
John Rinzel	
Nonlinear Waves in Neuronal Cortical Structures	369
Robert M. Miura	
Bifurcations in Insect Morphogenesis I	401
Stuart A. Kauffman	
Bifurcations in Insect Morphogenesis II.	451
Stuart A. Kauffman	

Selection and Evolution in Molecular Systems	485
Peter Schuster	
Escape from Domains of Attraction for Systems Perturbed by Noise	549
Donald Ludwig	
 <u>Seminars</u>	
Error Propagation in Translation and it's Relevance to the Nucleation of Life	569
Geoffrey W. Hoffmann	
Pseudopotentials and Symmetries for Generalized Nonlinear Schrödinger Equations	571
J. Harnad and P. Winternitz	
Superposition Principles for Nonlinear Differential Equations	573
R.L. Anderson, J. Harnad and P. Winternitz	
On Some Nonlinear Schrödinger Equations	577
H. Lange	
Asymptotic Evaluation Methods of Nonlinear Differential Equations Near the Instability Point	581
Masuo Suzuki	
Nonlinear Superposition of Simple Waves in Nonhomogeneous Systems	587
Alfred M. Grundland	
A Method of Solving Nonlinear Differential Equations	589
M.W. Kalinowski	
Lecturers	591
Participants	593
Index	601
