

CONTENTS

Foreword	v
Introduction	vii
Opening Address	
<i>J. Keating T. D. - The Minister for Industry & Commerce</i>	ix
PLENARY PAPERS	
Physics and Industry	1
<i>Lewis M. Branscomb</i>	
The Role of Universities	11
<i>H. B. G. Casimir</i>	
The Exotic Energy Options: Separating Reality from Illusion	19
<i>Aden B. Meinel and Marjorie P. Meinel</i>	
Social Control of Superstar Technology	31
<i>J. M. Ziman</i>	
NEW TECHNOLOGIES	
Materials - The Physics Connection	41
<i>A. G. Chynoweth</i>	
Activation Analysis Techniques and the South African Mining Industry	53
<i>R. J. Keddy and J. P. F. Sellschop</i>	
Application of Ultrasonic Physics in Material Technology	57
<i>I. Malecki</i>	
Nuclear Gamma Ray Resonance in Industrial Research	63
<i>Herman Pollak</i>	
Trends in the Technology of Magnetic Devices	69
<i>H. P. J. Wijn</i>	
Technology Programs at a Meson Factory	75
<i>J. Bradbury, E. Knapp and L. Rosen</i>	
Computer Simulation of IMPATT Devices	81
<i>J. O. Scanlan and T. J. Brazil</i>	
Solid Surface Phenomena	85
<i>Denis A. Degras</i>	

New Photoimaging Processes for Industrial Use - A Link between Basic and Applied Research <i>M. Schlesinger and N. E. Hedgecock</i>	101
Structure and Properties of Vacuum Deposited Films: A New Basic Relationship <i>P. S. Vincett, G. G. Roberts and W. A. Barlow</i>	107
Methods for Surface Studies and Chemical Profiling in Glass <i>L. Colombin, A. Jelli, H. Charlier, R. Caudano, J. J. Pireaux, J. Riga, C. Tenret-Noël, and J. Verbist</i>	113
Plating with Ion Accelerators <i>G. Sorensen</i>	117
Optimizing of Heating Process in Metallurgical Furnaces using Mathematical Models <i>Bozidar Brudar</i>	123
A Reliable Flashlamp Dye Ring Laser <i>A. Marotta and C. A. Arguello</i>	129
The Dynamic Correction of Optical Instruments <i>S. G. Lipson</i>	135
Rock Excavation by Pulsed Electron Beams <i>R. T. Avery, Denis Keefe, Tor L. Brekke and Iain Finnie</i>	139
Temperature Rise of a Metal Target due to Energy Transfer from a High Power Density Electron Beam - A Comparison between Experiment and Numerical Calculation <i>Peter Till, Walter Schebesta and Ernst Fraunschiel</i>	145
An Optical Method of Tele-measurement of Helicopter Propeller-blades (1) <i>Bogdan Adamczk</i>	151
Thermal Expansion Coefficient Measurement by Double Exposure Holographic Interferometry <i>Louis Kaiser, Sauveur Benet, Michel Fournier and Sylvain Brunet</i>	157
SOCIAL ASPECTS	
Physics in Environmental Protection. Examples from a Mechanical Industry <i>Nils Starfelt</i>	161
Selective Radiometer for Remote Sensing of Gaseous Pollutants <i>André Girard and Jean Laurent</i>	173
Some Environmental Isotope Studies in Southern Africa <i>B. Th. Verhagen, J. P. F. Sellschop and R. J. Keddy</i>	179
Proton Induced X-ray Analysis of Heavy Elements as an Environmental Probe <i>J. S. C. McKee, C. P. Randell and S. F. J. Wilk</i>	183

Opportunities for Physicists in Industry, Past and Future <i>L. Grodzins</i>	187
The Broad View of Physics - An Academic Dilemma <i>J. A. Dillon, Jr.</i>	203
Engineering Physics - The Canadian Experience <i>M. Sayer</i>	209
Education in Relation to Small Industries <i>S. Bhagavantam</i>	215
Applied Physics in a Developing Country* <i>J. E. Ripper Filho and R. C. C. Leite</i>	221
On the Socio-Economic Problem of Education for Optimizing Creative Potential of Physicists for Industry <i>D. S. Parmar</i>	225
Catching them Young: - The Problem of Declining Interest in Physics at School <i>D. S. Beard</i>	233
Why and How "Physics for Industry" in a Country like Italy. The Problem of Small Industries and of Transfer of Knowledge <i>Roberto Fieschi and Umberto Emiliani</i>	237
On the Relations Between the Physics Department and Industry: Some Remarks Based on our Experiences <i>Z. Trontelj</i>	247
University - Industry Cooperation in Research and Development <i>G. Kernan</i>	253
A Predicament for American Physics <i>A. M. Clogston</i>	257
Argonne National Laboratory as an Interface between Physics and Industry <i>Robert G. Sachs</i>	269
"Government Sponsored Applied Research and Industry in a Developing Country: Italy" <i>Antonio Paoletti</i>	275
Education of Physicists for Nonspecialists Roles <i>Professor Edward Eisner</i>	281
Survey of Employment of University College Dublin Physics Honours Graduates from 1952 to 1974 <i>John White</i>	289
ENERGY	
Alternative Energy Sources: A UK View <i>J. K. Dawson</i>	295

The Study of Energy Utilization in the Conventional Automobile as a Basis for Innovative Energy-saving Design Strategies <i>M. T. G. Hughes, D. Hurtle and J. N. Devlukia</i>	305
Thermal Radiation Control by Heat-reflecting Filters <i>Erhard Kauer</i>	311
Future Possibilities for Solar Space and Water Heating in Ireland <i>Eamon Lalor</i>	319
Sun and Sea for the Agro-industrial World <i>M. A. K. Lohdi</i>	323
Physics in Industry - Energy R & D <i>B. J. Brinkworth</i>	329
Energy Research in a Northern Maritime Climate <i>J. T. McMullan, R. Morgan and R. B. Murray</i>	337
The Fusion Reactor - A Chance for Solving the Energy Problem <i>Rudolf Wienecke</i>	341
Nuclear Power in Ireland and the Alternatives <i>V. Flanagan</i>	357
Technical Application of the Physical Concept of Energy <i>Z. Strugalski</i>	365
COMMUNICATIONS AND DATA PROCESSING	
Factors Influencing the Performance of an Experimental Microwave Communications Link at 30 GHz <i>B. O. Maher, P. J. Murphy and M. C. Sexton</i>	373
Optical Amplification in Semi-conductors <i>M. H. Pilkuhn</i>	381
Simulation of Satellite Communication Systems <i>J. O. Scanlan and M. O'Droma</i>	387
New Physics for Computers <i>G. G. Scarrott</i>	391
Contribution of Radioactive Tracers to Dynamic Modelling of Continuous Flow Processes <i>Antti J. Niemi</i>	405
Data Type Construction and the Analysis of Complex Situations <i>Lewis E. Lipkin, M. D. and Bernice S. Lipkin</i>	411
An Image Reconstruction Method using very little Information <i>S. G. Lipson</i>	423
A Constant Length Pecked Line Generator for Photogrammetry <i>J. T. McMullan, R. Morgan and S. W. A. Kirk</i>	427

Limitations of Computers <i>R. W. Hamming</i>	431
Reliability of Large Data Processing Systems <i>A. V. Ferris-Prabhu</i>	437
BEAMOS - A New Memory Technology <i>I. W. Pence, Jr., G. E. Possin, W. C. Hughes, C. Q. Lemmond, H. G. Parks, C. G. Kirkpatrick, G. W. Ellis and R. H. Wilson</i>	441
ACOUSTICS	
Industrial Noise Sources - Developments in Methods of Measurements and Assessment of Noise Output <i>Gerhard Hubner</i>	445
Physical Acoustics and Noise Control <i>Jean Mattei</i>	453
Industrial Noise as a Problem of Acoustic Power and of Human Health <i>Tamás Tarnóczy</i>	459
Aerodynamic Noise - Its Theory and Practice <i>G. M. Lilley</i>	465
Acoustical Developments in Non-destructive Testing <i>R. W. B. Stephens</i>	473
Scanned-focus Ultrasonic Lens <i>E. Mäntysalo and A. Pulli</i>	479
BIOLOGICAL APPLICATIONS	
Some Physical Techniques in Agricultural Research <i>E. W. Evans and F. A. Glover</i>	485
Physics as a Tool in Agricultural Research <i>J. Schenk</i>	493
Energy Saving in Greenhouses <i>B. J. Bailey, G. E. Bowman and S. W. R. Cox</i>	501
Analysis of Protein Content in Grain by Proton Activation <i>D. A. Dohan and K. G. Standing</i>	509
Some Applications of Physics in the Development of a Gravel Filled Mole Drain <i>J. Mulqueen and D. Harrington</i>	515
A New Electric Method for Study of Enzymatic Reactions <i>Hans Arwin and Ingemar Lundström</i>	519
Trace Element Analysis of Biological Materials by Proton Induced X-ray Emission Spectroscopy <i>V. Valkovic, T. Zabel and G. C. Phillips</i>	525

Decontamination of Uranium-mine Waste Water from Ra by Means of Biosorbent	531
<i>H. Prochazka, K. Stamberg, R. Jilek, J. Fuska and J. Katzer</i>	
Managing a Revolution: Technology in Medicine	535
<i>J. M. A. Lenihan</i>	
Physics in Diagnostic Radiology	543
<i>Fritz Walter Hofmann</i>	
Fast Neutron Irradiation Facility for Cancer Therapy	549
<i>Roger Gleyvod</i>	
Multiple Potential-measurement within the Cortex	555
<i>O. Prohaska, R. Chabicovsky, F. Olcaytug, I. Desoyer and W. Fallmann</i>	
Charged Particle Analysis of ^{19}F in Tooth Enamel	561
<i>K. W. Jones, H. J. Annegarn and J. P. F. Sellschop</i>	
Physical Measurements for Quality Control in Industrial Radiation Sterilization	567
<i>W. L. McLaughlin, J. C. Humphreys, S. E. Chappell, T. A. Olejnik and C. E. Fox</i>	
Thermoluminescent Materials in Physiological and Dosimetric Investigations of the Thyroid	575
<i>J. F. Malone, M. J. Cullen, M. K. O'Connor and J. K. Taaffe</i>	
Conference Closing Discussion	581
Author Index	589
Subject Index	591
