

## CONTENTS

<b>PREFACE</b>		<b>xv</b>
<b>CHAPTER 1</b>	<b>SCIENCE IN THE MODERN WORLD — SOME OBSERVATIONS</b>	<b>1</b>
<b>CHAPTER 2</b>	<b>FUNDAMENTALS OF NEWTONIAN MECHANICS</b>	<b>18</b>
	2.1 Mass	22
	2.2 Force	23
	2.3 Momentum	24
	2.4 Work and Energy	26
	2.5 Angular Momentum	28
	2.6 Law of Universal Gravitation and Kepler's Laws of Planetary Orbits	31
<b>CHAPTER 3</b>	<b>TWO SCIENCES MADE ONE: ELECTRICITY AND MAGNETISM</b>	<b>35</b>
	3.1 Electricity	35
	3.2 Fields and Lines of Force	40
	3.3 Magnetism	43
<b>CHAPTER 4</b>	<b>FARADAY, MAXWELL AND ELECTROMAGNETIC THEORY</b>	<b>50</b>
	4.1 The Contributions of Michael Faraday	50

4.2	The Contribution of J. C. Maxwell	58
4.3	Prospect and Retrospect	69
<b>CHAPTER 5</b>	<b>RELATIVITY – THE SPECIAL THEORY</b>	<b>71</b>
5.1	Relative Time and the Relativity of Simultaneity	76
5.2	The Mount Washington Experiment and Time Dilation	81
5.3	Length Contraction	85
5.4	Other Relativistic Phenomena: Relativistic Mass Increase	89
5.5	On the Famous Relation $E = mc^2$	92
5.6	Does the Existence of Mass Imply Energy?	96
5.7	A Digression on the Relation of Mathematics to Physics	98
5.8	The Relativistic Doppler Effect	99
5.9	On the Addition of Velocities	101
5.10	Relativity of Simultaneity	106
5.11	More on the Use of Space-time Diagrams	114
5.12	Are Relativistic Phenomena Real?	116
5.13	The Twin Paradox	121
5.14	An Alternative Viewpoint on the Twin Paradox	127
5.15	The Reality of Relativity – An Addendum	129

5.16	Appendix: The Twin Paradox Elaborated	131
------	--	-----

<b>CHAPTER 6</b>	<b>THE GENERAL THEORY OF RELATIVITY</b>	<b>139</b>
------------------	---	------------

6.1	Early Tests of the Theory: Bending of Light in a Gravitational Field	147
6.2	Gravitational Redshift	151
6.3	Advance of the Perihelion of Mercury	154
6.4	General Relativity and Geometry	156
6.5	Rotating Frames of Reference: Newton's Bucket and Mach's Principle	162
6.6	Motion in Rotating Frames of Reference	164
6.7	Rotating Systems Seen from an Inertial Frame of Reference	168
6.8	Postscripts on Gravitational Redshift and Advance of Perihelion	169

<b>CHAPTER 7</b>	<b>COSMOLOGY</b>	<b>173</b>
------------------	------------------	------------

7.1	Measurement of Astronomical Distances	177
7.2	Looking Backward: The "Big Bang"	182
7.3	The Future of the Universe	185
7.4	Forms of the "Missing Mass"	188
7.5	The Microwave Cosmic Background Radiation	192
7.6	The "Paradox" of the Dark Night Sky	200

<b>CHAPTER 8</b>	<b>THE EVOLUTION OF STARS</b>	<b>203</b>
8.1	Pulsars (Neutron Stars)	215
8.2	The Crab Nebula and its Pulsar	216
<b>CHAPTER 9</b>	<b>BLACK HOLES</b>	<b>222</b>
9.1	Other Features of Black Holes	225
9.2	Another Stephen Hawking Theorem	228
9.3	Black Holes and the Quantum Theory	229
<b>CHAPTER 10</b>	<b>BLACK HOLES IN ASTROPHYSICS</b>	<b>232</b>
10.1	Black Holes in Stellar Collapse	232
10.2	Quasars and Exploding Galaxies	235
10.3	Unravelling the Puzzle of the Quasars	242
10.4	The Distribution of Quasars	246
10.5	Are There No Closer Galactic Black Holes?	248
10.6	Appendix: Mass Determination in Double Stars	253
<b>CHAPTER 11</b>	<b>HEAT AND THERMODYNAMICS</b>	<b>255</b>
11.1	Macroscopic and Microscopic Laws	256
11.2	On the Nature of Heat	258

11.3	What is Temperature?	267
11.4	The Law of Gay-Lussac and Charles	267
11.5	Disorder and the Second Law of Thermodynamics	268
11.6	A Question of Philosophy	279
11.7	Some Remarks about Probability	280
11.8	Particle Density, an Example of a Statistical Quantity	282
11.9	Order and Disorder; Entropy and Information	284
11.10	The Idea of Information	290
11.11	The Second Law and Time's Arrow	298
11.12	The Puzzle of the Cosmological Arrow of Time	305
<b>CHAPTER 12</b>	<b>THE ROAD TO QUANTUM THEORY</b>	<b>307</b>
12.1	The Key to Pandora's Box; The Discovery of Radioactivity	315
12.2	The Structure of Atoms	320
12.3	The Problem of Black-body Radiation	321
12.4	Photoelectric Effect	327
12.5	The Problem of Discrete Spectra	331
<b>CHAPTER 13</b>	<b>FUNDAMENTAL PRINCIPLES OF QUANTUM THEORY</b>	<b>336</b>
13.1	Remarks on "Wave-particle Duality"	344

13.2	Early Approaches to a Quantum Theory: Schrödinger and Heisenberg	348
13.3	The Uncertainty Principle	355
13.4	Feynman's "Classical" Paradox	362
13.5	Energy States of Oscillating Systems and of the Hydrogen Atom	365
13.6	The Correspondence Principle	371
13.7	The Heisenberg Viewpoint	373
13.8	The Theory of Polarized Light	376
13.9	Dirac's Unification of Quantum Theory	380
13.10	The Deeper Level of Quantum Theory: Theory of Fields	381
13.11	Identity Among Particles	383
13.12	The Pauli Exclusion Principle	387
13.13	An Aside on "Schrödinger's Cat"	390
<b>CHAPTER 14 ATOMS, MOLECULES, CHEMISTRY AND CONDENSED MATTER</b>		<b>394</b>
14.1	Multi-electron Atoms	396
14.2	Binding of Atoms into Molecules	402
14.3	Do a Hydrogen Atom and a Helium Atom Cohere?	405
14.4	Valence and Valence Bonds	406
14.5	Boron	408

14.6	Carbon and Organic Chemistry	410
14.7	The Elements Beyond Carbon	418
<b>CHAPTER 15</b>	<b>PARTICLES AND ANTIPARTICLES</b>	<b>421</b>
15.1	Consequences of Antiparticles, Feynman Diagrams	426
<b>CHAPTER 16</b>	<b>THE ATOMIC NUCLEUS — Its Constituents and Structure</b>	<b>434</b>
16.1	Yukawa, Pi-mesons and Nuclear Forces	435
16.2	The Nuclear Shell Model	444
16.3	The Collective Model	447
16.4	How Do Nuclei Decay?	450
16.5	Beta-decay and the Weak Interaction	450
16.6	Some Examples of Beta-decay Processes	457
<b>CHAPTER 17</b>	<b>THE PHYSICS OF FUNDAMENTAL PARTICLES</b>	<b>460</b>
17.1	Non-conservation of Parity and Strange Particles	465
17.2	An Observation about Strangeness	470
17.3	The Eight-fold Way	471
17.4	The Strange Story of the $K^0$ , $\bar{K}^0$ Mesons	472
17.5	The Story of the $\Omega^-$	475
17.6	The Invention of the Quark	477

17.7	A New Picture of Nuclear Processes	483
17.8	Nature of the Force between Quarks	486
17.9	Other Quarks	487
17.10	Weak Interactions and Unification	488
<b>CHAPTER 18</b>	<b>THE INFLATIONARY EARLY UNIVERSE</b>	<b>495</b>
18.1	The "Homogeneity Problem"	495
18.2	The "Smoothness Problem"	496
18.3	The "Flatness Problem"	498
<b>CHAPTER 19</b>	<b>RADIATING BLACK HOLES: WHERE QUANTUM MECHANICS, THERMODYNAMICS AND RELATIVITY COME TOGETHER</b>	<b>502</b>
<b>APPENDIX.</b>	<b>An Informal Dialogue Concerning One Not-so-new Science</b>	<b>511</b>
<b>INDEX</b>		<b>541</b>
