| Foreword | vii |
| Preface | ix |
| | |
| New Methods in Nonlinear Mechanics | |
| by RICHARD BELLMAN | 1 |
| I. Introduction | 1 |
| II. The Comparative Approach | 2 |
| III. Classical Approach | 2 |
| IV. Discussion | 4 |
| V. The New Approach of Invariant Imbedding | 4 |
| VI. Discussion | 5 |
| VII. Variational Processes | 6 |
| VIII. Geodesics | 7 |
| IX. Dynamic Programming and the Calculus of Variations | 8 |
| X. Approximation in Policy Space | 9 |
| XI. Discussion | 10 |
| References | 10 |
| | |
| Probability as a Science | |
| by HILDA GEIRINGER | 12 |
| | |
| On Random Solutions of Nonlinear Integral Equations | |
| by A. T. BHARUCHA-REID | 23 |
| Text | 23 |
| References | 27 |
| | |
| A Singular Case of Iteration of Analytic Functions: A Contribution to the Small-Divisor Problem | |
| by T. M. CHERRY | 29 |
| I. The "Center Problem" in the Iteration of Analytic Functions | 29 |
| II. Contexts Leading to Small-Divisor Series | 33 |
| III. Generalities Regarding Iteration of Analytic Functions | 36 |
| IV. Construction of Singular Iterations $z_{n+1} = f(z_n)$ | 42 |
| V. Properties of Singular Iterations | 45 |
| References | 50 |
| | |
| Networks of Inextensible Cords | |
| by R. S. RIVLIN | 51 |
| I. Introduction | 51 |
| II. Pure Homogeneous Deformation | 52 |

| | |
|---|-----|
| III. Plane Strain of a Net—Displacement Boundary Conditions | 56 |
| IV. Plane Strain of a Net—Force Boundary Conditions | 59 |
| V. Further Developments | 62 |
| Bibliography | 63 |
| | |
| On Integral Operators Generating Stream Functions of Compressible Fluids | |
| by STEFAN BERGMAN | 65 |
| Introduction | 65 |
| I. Partial Differential Equations Arising in the Theory of Compressible Fluids | 67 |
| II. The Determination of the Stream Function of a Vortex in the Subsonic Region | 71 |
| III. A Method for Generating Solutions of Equation (1.3.5) | 76 |
| References | 86 |
| Bibliography | 87 |
| | |
| Some Problems Concerning Linear Differential Equations Made Non-linear by Unknown or Moving Boundaries | |
| by W. G. BICKLEY | 90 |
| A. Melting or Solidification | 90 |
| B. Consolidation of an Earth Dam | 92 |
| C. Seepage through a Porous Dam | 95 |
| D. Lubrication in a Journal Bearing, with Oil Cavitation | 98 |
| References | 103 |
| General References | 103 |
| | |
| Nonlinear Problems of Combined Conductive-Radiative Heat Transfer | |
| by E. M. SPARROW and E. R. G. ECKERT | 104 |
| Nomenclature | 104 |
| Introduction | 104 |
| The Single Plate-Type Fin | 105 |
| Radiant Interaction between Fin and Tube Surfaces | 109 |
| Radiant Interaction between Fin Surfaces | 116 |
| Radiant Interaction between Fin and Tube and between Neighboring Fins | 120 |
| Concluding Remarks | 121 |
| References | 122 |
| | |
| Statistical Problems Connected with the Solution of a Nonlinear Partial Differential Equation | |
| by J. M. BURGERS | 123 |
| I. A Particular Nonlinear Partial Differential Equation and Its Solution by Means of a Geometrical Construction | 124 |

| | |
|--|-----|
| II. Formulation of a Statistical Problem | 128 |
| III. The Solution of the Auxiliary Differential Equation | 134 |
| Notes | 136 |

Melting Decelerating Bodies

| | |
|--------------------|-----|
| by SIMON OSTRACH | 138 |
| Introduction | 138 |
| Symbols | 139 |
| Analysis | 142 |
| Results | 152 |
| Concluding Remarks | 160 |
| References | 161 |

Thermal Radiation Effects on Hypersonic Flow Fields

| | |
|---|-----|
| by S. I. PAI | 163 |
| I. Introduction | 163 |
| II. Fundamentals of Radiant Energy Transfer | 164 |
| III. Fundamental Equations of Radiation Gas Dynamics | 165 |
| IV. Solutions for Radiation Transfer Equation | 168 |
| V. New Parameters of Radiation Gas Dynamics | 170 |
| VI. Wave Motions in Radiation Gas Dynamics | 173 |
| VII. Shock Waves in Radiation Gas Dynamics | 174 |
| VIII. Jet Mixing in Radiation Gas Dynamics | 176 |
| IX. Plane Couette Flow in Radiation Magnetogas Dynamics | 179 |
| References | 183 |

Mathematical Theory of Compressible Fluids

| | |
|---|-----|
| by E. V. LAITONE | 184 |
| Introduction | 184 |
| List of Symbols | 185 |
| 1. Two-Dimensional Compressible Flow in the Physical Plane | 186 |
| 2. Two-Dimensional Compressible Flow in the Hodograph Plane | 189 |
| 3. Two-Dimensional Compressible Flow about a Closed Body in a Uniform Subsonic Flow | 194 |
| 4. Two-Dimensional Flow through the Sonic Line | 200 |
| References | 206 |

Problems in Nonlinear Nonmechanics

| | |
|--------------------------------|-----|
| by Preston C. HAMMER | 208 |
| Introduction | 208 |
| Information and Communication | 209 |
| Symbols and Symbolic Structure | 211 |
| Handicaps and Communication | 213 |
| Other Observations | 215 |
| Concluding Remarks | 216 |
| References | 216 |

| | |
|---|-----|
| Nonlinear Problems in Ballistics | |
| by CHARLES H. MURPHY | 217 |
| Text | 217 |
| References | 218 |
| | |
| Alternating Direction Methods for Solving Partial Difference Equations | |
| by DAVID M. YOUNG and MARY FANETT WHEELER | 220 |
| 1. Introduction | 220 |
| 2. The Difference Equation | 221 |
| 3. The Linear System | 223 |
| 4. The Peaceman-Rachford Method | 224 |
| 5. The Commutative Case | 228 |
| 6. Laminar Flow Problem | 233 |
| 7. Numerical Results and Conclusions | 244 |
| References | 245 |
| | |
| Subject Index | 247 |
