

## CONTENTS

<b>1. VARIATIONAL PRINCIPLES: INTRODUCTION</b>	<b>1</b>
1.1. Introduction	1
1.2. Euler–Lagrange theory	2
1.3. Canonical theory	5
1.4. Complementary variational principles	10
<b>2. VARIATIONAL PRINCIPLES: SOME EXTENSIONS</b>	<b>14</b>
2.1. A class of operators	14
2.2. Euler–Lagrange theory	18
2.3. Canonical theory	21
2.4. Complementary variational principles	25
2.5. Abstract formalism	26
<b>3. LINEAR APPLICATIONS</b>	<b>33</b>
3.1. A class of linear problems	33
3.2. Associated variational theory	34
3.3. Rayleigh–Ritz method	38
3.4. The Ritz and Temple bounds	40
3.5. Potential theory	41
3.6. Electrostatics	44
3.7. Magnetostatics	45
3.8. Diffusion	47
3.9. The Milne problem	49
3.10. Kirkwood–Riseman integral equation	51
3.11. Perturbation theory	57
3.12. Potential scattering	60
<b>4. NONLINEAR APPLICATIONS</b>	<b>67</b>
4.1. A class of nonlinear problems	67
4.2. Associated variational theory	67
4.3. Liouville equation	72
4.4. Poisson–Boltzmann equation	74
4.5. Thomas–Fermi equation	77
4.6. A nonlinear integral equation	79
4.7. Nonlinear networks	80
4.8. Compressible fluid flow	84
