|---------|-----|
| PREFACE | vii |
|---------|-----|

Chapter 1. Introduction

| | |
|---|----|
| 1. Kinds of Boundary Value Problems to Be Treated | 1 |
| 2. The Generalized Lipschitz Condition | 3 |
| 3. How Existence and Uniqueness Fail for Linear Boundary Value Problems | 6 |
| 4. A Simple Nonlinear Boundary Value Problem | 7 |
| 5. Standard Results concerning Initial Value Problems | 10 |
| Comments and Bibliography | 14 |

Chapter 2. Relations between the First and Second Boundary Value Problems

| | |
|--|----|
| 1. Relation between Uniqueness Intervals | 17 |
| 2. Relation between Existence Intervals | 18 |

Chapter 3. Picard's Iteration

| | |
|-------------------------|----|
| 1. Introduction | 21 |
| 2. Contraction Mappings | 25 |

| | |
|--|----|
| 3. Boundary Value Problems | 27 |
| 4. A More General Lipschitz Condition | 34 |
| 5. An Improved Error Bound for the Picard Iterates | 38 |
| 6. Extensions | 42 |
| Comments and Bibliography | 47 |

Chapter 4. The Distance between Zeros and the Uniqueness Interval

| | |
|--|----|
| 1. Introduction | 50 |
| 2. The Connection between Uniqueness and the Zeros of Unforced Equations | 52 |
| 3. Distance between Zeros for Unforced Equations | 54 |
| Comments and Bibliography | 68 |

Chapter 5. Comparison Theorems

| | |
|---|----|
| 1. Introduction | 70 |
| 2. Main Comparison Theorems | 72 |
| 3. Comparison Theorems for Weak Differential Inequalities | 80 |
| Comments and Bibliography | 85 |

Chapter 6. Principal Existence Theorems

| | |
|---|----|
| 1. Introduction | 88 |
| 2. Solutions of the Comparison Problems | 89 |
| 3. Existence Theorems | 93 |
| Comments and Bibliography | 99 |

Chapter 7. Further Existence and Uniqueness Results

| | |
|--------------------------------------|-----|
| 1. Introduction | 103 |
| 2. Existence in the Nonsingular Case | 104 |
| 3. Existence in the Singular Case | 110 |
| 4. A General Uniqueness Theorem | 112 |
| 5. Illustrative Examples | 117 |
| Comments and Bibliography | 126 |

Chapter 8. Numerical Solution by Initial Value Methods

| | |
|----------------------------|-----|
| 1. Introduction | 128 |
| 2. A Convergence Criterion | 129 |
| 3. Lipschitzian Problems | 131 |
| Comments and Bibliography | 139 |

Chapter 9. Numerical Solution by Boundary Value Methods

| | |
|--|-----|
| 1. Introduction | 141 |
| 2. A Modified Picard Iteration | 144 |
| 3. A Monotone Iteration | 147 |
| 4. Newton's Method | 153 |
| 5. Solution of Linear Problems by a Finite Difference Method | 156 |
| 6. Some Illustrative Examples | 159 |
| Comments and Bibliography | 165 |

| | |
