Acknowledgments	v
Introduction	1

CHAPTER ONE

Numerical Inversion of Laplace Transforms

1. Introduction	3
2. Instability of Laplace Inversion	3
3. Numerical Inversion of Laplace Transforms	5
4. Gaussian Quadrature	6
5. Gaussian Quadrature and the Hilbert Matrix	6
6. The Legendre Polynomials	8
7. The Shifted Legendre Polynomials	8
8. Explicit Inversion Formula	9
9. Some Test Cases	11
10. Change of Time Scale	17
11. Interlacing Results for Different N	20
12. Alternative Numerical Techniques	21

CHAPTER TWO

A One-dimensional Neutron Multiplication Process

1. Neutron Flux in a One-dimensional Rod	23
2. Computational Approach	26
3. Computational Results	28

CHAPTER THREE

Time-dependent Diffuse Reflection from a Slab

1. Formulation of Problem	31
2. Computational Results	41

3. Automatic Plotting of Results	42
References	50
Appendix 1. Table of Reflection Functions for Time- dependent Isotropic Scattering from a Slab	54
Appendix 2. Coefficients of the First Fifteen Shifted Legendre Polynomials	165
Appendix 3. Roots of the Shifted Legendre Polynomials and Corresponding Weights	169
Appendix 4. Coefficients of the Polynomials $P_N^*(x)/(x - x_i)$	174
Appendix 5. Derivatives of Shifted Legendre Polynomials Evaluated at the Roots	190
Appendix 6. The Elements of the Inverse Matrix without Division by Weights	193
Appendix 7. The Elements of the Inverse Matrix with Division by Weights	209
Appendix 8. Angles Whose Cosines Are Roots of Shifted Legendre Polynomials, in Degrees	226
Appendix 9. Negatives of Logarithms of Roots of Shifted Legendre Polynomials	228
Appendix 10. The FORTRAN Programs	230
1. One-dimensional Neutron Transport	230
2. Two-dimensional Radiative Transfer with Restart and Constant To Extend Time Scale	233
3. Two-dimensional Radiative Transfer with Constant To Extend Time Scale, Explicit Inverse Matrix, and Simultaneous Solution for Several N 's	237
4. Two-dimensional Radiative Transfer with SC4020 Computer Plotting	243
5. Explicit Inverse	250
6. Sample Input Data	253
Index	255
