

CONTENTS

PREFACE TO AMERICAN EDITION	v
PREFACE TO FIRST EDITION	vii
I. GROUPS	1
Group Postulates. Displacement of a Rigid Body. Symmetry Operations. Point Groups. Space Groups.	
II. ONE-DIMENSIONAL LATTICE	10
Symmetry of the Lattice. One-Dimensional Motives. Two-Dimensional Motives. Three-Dimensional Motives.	
III. LATTICES IN TWO DIMENSIONS	19
Symmetry of the Lattices. Two-Dimensional Motives. Three-Dimensional Motives.	
IV. SOME PROPERTIES OF GROUPS	34
Abstract Groups. Subgroups. Classes of Conjugate Elements. Self-Conjugate Subgroups. Factor Groups. Permutation Groups. Isomorphous Groups. Direct Product Groups.	
V. MATRIX GROUPS	44
Matrices. Linear Transformations. Equivalent Matrices. Reducible and Irreducible Matrix Representations of Groups. Kronecker Square and Symmetrized Kronecker Square Representations. Kronecker Direct Product of Two Representations.	

CONTENTS

VI.	THE WAVE EQUATION AND ITS PROPERTIES	55
	Vibrations of a String. The Wave Equation. Eigenvalues and Eigenfunctions. Linear Operators and Manifolds. Invariant Manifolds. Physical Quantities as Operators. Harmonic Oscillator. Eigenfunctions of Hydrogen-like Atoms. The Rigid Rotator.	
VII.	VIBRATIONS OF A DYNAMICAL SYSTEM	66
	Kinetic and Potential Energies of a Dynamical System. Lagrangian Equations of Motion. Normal Modes of Oscillation. Normal Frequencies. Orthogonality Relation between the Normal Co-ordinates. Symmetry Properties of Normal Modes. Representation Defined by the Cartesian Co-ordinates. Determination of the Normal Co-ordinates. Splitting of the Secular Equation. <i>F</i> and <i>G</i> Matrices.	
VIII.	VIBRATIONAL RAMAN EFFECT AND INFRA-RED ABSORPTION	85
	The Molecule as a Dynamical System. Raman Scattering by a Diatomic Molecule. Infra-Red Absorption and Electric Moment. Selection Rules for Fundamentals. Overtone and Combination Lines. Selection Rules in Some Special Cases.	
IX.	MOLECULAR STRUCTURE AND NORMAL MODES	99
	Triatomic Molecules. Pyramidal Molecules. The Nitrate and the Carbonate Ions. Diatomic and Other Linear Molecules. Sulphur.	
X.	MOLECULAR STRUCTURE AND NORMAL FREQUENCIES. . .	110
	Interatomic Forces. Water. Phosphorus.	
XI.	LATTICES IN THREE DIMENSIONS	124
	Space Lattices. Crystal Classes. Space Groups.	

CONTENTS

XII.	RAMAN AND INFRA-RED SPECTRA OF CRYSTALS	140
	<p>The Internal Structure of a Crystal. Application of Group Theory. Lattice Oscillations in Calcite and Sodium Nitrate. Some Special Cases. Lattice Oscillations in Some Organic Crystals. Raman Spectra and Different Crystalline Modifications. Splitting of Degenerate Modes in Crystals of Lower Symmetry. Special Case of Diamond.</p>	
XIII.	CRYSTAL SYMMETRY AND PHYSICAL PROPERTIES	159
	<p>General Considerations. Crystal Optics. Elasticity and Photoelasticity. Description of the General Method. Results. Enantiomorphism and Optical Activity. Isotropic Solids.</p>	
XIV.	ROTATION GROUPS	171
	<p>The Rotation Groups in Two and Three Dimensions. Unitary Substitutions of Two Variables. Irreducible Manifolds with Respect to U_2. Irreducible Representations of U_2. Characters of the Group U_2. The Irreducible Components of ${}^4D \times {}^\lambda D$. Isomorphism between the Rotation and the Unitary Groups.</p>	
XV.	APPLICATION TO PROBLEMS OF ATOMIC SPECTRA	183
	<p>Solutions of the Wave Equation. Angular Momentum Operators. Quantization of Angular Momentum and Its Components. Vector Addition of Angular Momenta. Reduction of the Product Manifold. Selection Rules and Intensities of Spectral Lines. Pauli Theory. Pauli Exclusion Principle.</p>	
XVI.	OTHER APPLICATIONS	200
	<p>The Hydrogen Molecule. Rotational Specific Heat of Hydrogen. Nuclear Spin. Intensities of Rotational Raman Lines.</p>	

CONTENTS

APPENDICES

I.	REPRESENTATIONS OF FINITE GROUPS	217
II.	TRANSFORMATION OF MATRICES	235
III.	KRAMERS-HEISENBERG DISPERSION FORMULA	242
IV.	EVALUATION OF GROUP CHARACTERS	247
V.	PROPERTIES OF SOME POLYNOMIAL FUNCTIONS	255
VI.	LAPLACIAN OPERATOR	260
VII.	PARAMETER GROUPS	262
VIII.	CHARACTER TABLES AND IRREDUCIBLE REPRESENTA- TIONS IN RESPECT OF VARIOUS POINT GROUPS	266
	INDEX	277
